Himachal Pradesh Technical University, Hamirpur (H.P.)

CURRICULUM(CBCS) TEXTILE ENGINEERING (3rd to 8th Semester) Teaching and Examination Scheme

HIMACHAL PRADESH TECHNICAL UNIVERSITY, HAMIRPUR

CURRICULUM OF B.TECH TEXTILE ENGINEERING

1. Credit System: A system enabling quantification of course work, with one credit being assigned to each unit after a student completes its teaching-learning process, followed by passing in both Continuous Internal Assessment CIA & Semester End Examination (SEE); Further, Choice Based Credit System (CBCS) to be helpful in customizing the course work for a student, through Core &Electives.

2. *Credit Courses:* All Courses registered by a student in a *Semester is to* earn *credits*. In a widely accepted definition, students to earn *One Credit* by registering and passing:

- Cone hour/week/Semester for *Theory/Lecture (L) Courses;* and,
- Two hours/week/Semester for Laboratory/Practical (P) Courses or Tutorials (T).

NOTE: Other student activities not demanding intellectual work or enabling proper assessment like, practical training, study tour and guest lecture not to carry *Credits*.

Lectures	Tutorials	Practical Work	Credits	Total
(hrs./wk./Sem.)	(hrs./wk./Sem.)	(hrs./wk./Sem.)	(L: T: P/D)	Credits
3	0	0	3:0:0	3
2	2	0	2:1:0	3
2	0	2	2:0:1	3
2	2	2	2:1:1	4
0	0	6	0:0:3	3

3. Credit Representation: Credit values for different courses is as given in Table 1:

4. Course Load: Every student to register for a set of *Courses* in each *Semester*, with the total number of their *Credits* being limited by considering the permissible *weeklyContactHours* (*typically: 30/Week*); For this, an average *Course Load* of 24*Credits/Semester* (e.g., 6-7 *Courses*) is generally acceptable. A typical course load per semester which shall be adopted is given in Table. (2) Below:

P. Technical University Hamirpur - 177001

2

Courses	Credits/Course	Total Credits	Contact Hours/Week
			*
Three Lecture Courses	3:0:0	6	6
Two Lecture Courses	2:2:0	6	6
Three Lec +one Tut Courses	3:1:0	8	10
Three Lec elective Course	3:0:0	3	3
Two Lab Courses	0:0:2	2	4
One Mandatory Course	0:0:3	2	3
Total Courses: Six + one	17:3:2	24+3	+ 30

Table 2: Typical Course Load in a Semester

* Widely accepted figure ~ 30 hours/week, to enable the students to engage in homework assignments, self-learning outside the Class rooms/Laboratories, Extra/Co-Curricular activities and *add-on Courses*, if any, for their overall development;

5. Curriculum Structure:

All B.E./B.Tech degree courses will have a curriculum with Syllabi consisting of following type of courses:

- I. Foundation courses (FC): Include Mathematics, Basic Sciences, Engineering Sciences, Skill Based and Humanities and Social Sciences Courses.
- **II. Program Core Courses (PC):** A course, which should compulsorily be studied by a candidate as a core requirement is termed as a Core course. These courses are employability enhancement courses relevant to the chosen program of study. Program core comprises of theory, practical, Project, Seminar etc. Project work/Dissertation is considered as a special course involving application of knowledge in solving / analyzing /exploring a real life situation / difficult problem and a candidate studies such a course on his own with an advisory support by a teacher/faculty member. A Project/Dissertation work may be given in lieu of a discipline specific elective paper.
- **III.Elective Courses:** Elective course is generally a course which can be chosen from a pool of courses and which may be very specific or specialized or advanced or supportive to the discipline/ subject of study or which provides an extended scope or which enables an exposure

Technical University Hamirpur - 177001

to some other discipline/subject/domain or nurtures the candidate's proficiency/skill. Accordingly, elective courses may be categorizes as:

(a) **Program Elective Courses (PE):** Program elective courses include the courses relevant to the chosen program of study. These courses may be offered by the main discipline/subject of study.

(b) **Open Elective Courses (OE):** An open elective course is generic in nature and is chosen generally from an unrelated discipline/subject, with an intention to seek exposure. A core course offered in a discipline /subject may be treated as an elective by other discipline/subject and vice versa and such electives may also be referred to as Open Elective.

IV Mandatory Courses (MC): Mandatory courses are essentially ability and skill enhancement courses. The ability enhancement courses are wherein familiarity is considered mandatory and are recommended by the regulatory bodies such as AICTE, UGC, etc. Environmental Science, English/Communication, etc. are such courses and are mandatory for all disciplines. The skill based or value-based courses on the other hand are aimed at providing hands-on-training, competencies, skills, etc.

V Audit Courses (AC): Audit courses if any shall be offered to supplement the students' knowledge/ skills outside the range of credits.

1.	Foundation Courses (Theory)	L	Т	P/D	Credits
1.	Engineering Math – I	3	1	0	4
2.	Engineering Math – II	3	1	0	4
3.	Engineering Physics	3	1	2	5

- 6. Course Plan: As per AICTE recommendations, a course work of 180 Credits, with 22 credits per Semester on an average with built-in flexibility shall be adequate for the degree. This course work consist of total 190 credits and to attain 180 credits student has to opt for two Program Elective subjects (PE) out of four and one Open Elective subject out of three in any semester.
- 7. The courses need to be completed successfully by a student to qualify for the award of the UG degree. The suggested plan for sequencing the Course Work is given in Table (5)

Table 5: Typical Sequencing Plan for Courses:

	Subject Area Coverage
Semester	
I & II	Foundation Courses common for all Branches; Mandatory Courses;

Dean H.P. Technical University Hamirpur - 177001

III& IV	Foundation Courses common for all Branches(to be continued); Also,
	Mandatory Courses(to be continued, if required);Program(Hard/Soft) Courses
	in two/three groups (like Electrical, Non-Electrical); Area wise Orientation;
	Add-On (Audit) Courses
V-VII	Program Courses (Hard/Soft), Program Elective and Open Elective Courses;
	Branch-wise Orientation; Add –On(Audit) Courses; Seminar
VIII	Program Elective and Open Elective Courses; Project work and Dissertation,
	Internship, Seminar; Add-On (Audit) Courses; Final wrap-up of Programme

Assessment and Evaluation:-

(i) Theory Courses						
Component	Category	Max. Marks				
Ι	(a) Teachers Assessment (Assignments/Quizzes)	16				
	(b) Mid- Semester Examinations/Tests (Two mid-term tests of 2 hrs duration)	20				
	(c) Attendance	04				
II	End-Semester Examination	60				
	Total	100				
(ii) Laborator	ry Courses					
Component	Category	Marks				
Ι	(a) File work and lab performance	15				
	(b) Vive-voce (two mid-term viva-voce tests)	10				
	(c) Attendance	5				
II	End-Semester viva-voce Examination	20				
	Total	50				

Note: The laboratory and project courses will be evaluated by the teachers(s) associated with the course and an external examiner not in the service of the university at the time of examination. In case the external examiner does not turn up for the examination, the head of the department concerned, in

Dean H.P. Technical University Hamirpur - 177001

consultation with the course in-charge, shall call another person to act as the external examiner, even from within the College/other Institutions/University, if necessary.

(iii) Project/Seminar						
Component	Category	Marks				
Ι	Internal Assessment – The distribution and weight age to be decided by course co-coordinator	50				
II	End-Semester Examination	50				
	Total	100				

Note: The Project and Seminar courses will be examined by the teacher(s) associated with the course and one or more Examiners from amongst the teachers of the department to be recommended by the Board of Studies of the department concerned.

(iv) Industrial/Practical Training						
Component	Category		Marks			
I -Marks to be awarded by the respective Industrial/Practical training organization	Technical Quality of the v	vork	25

The course topic and content is likely to change with each offering depending upon the current requirement and expertise available with the department including that of the visiting professionals
- 2. **Technical Seminar**: In the beginning of the semester, every student of the class will be assigned a seminar topic in the emerging / perspective field in the area of textiles such as Spinning, Weaving, Fibres, Testing, Chemical processing and alike. Seminar should be based on the literature survey on any topic of textiles.

SEMESTER-III MA-301: PROBABILITY AND STATISTICS

TEACHING AND EXAMINATION SCHEME:

Teac	hing Sc	heme	Credits		Marks		Duration of End Semester Examination
L	Т	P/D	С	Sessional	End Semester Exam	Total	
2	2	0	3	40	60	100	3 hrs

COURSE CONTENTS:

Unit	Contents	No. of
		hours
I	Probability and Random Variables: Introduction, Basic concepts–Sample space, Events, Counting sample space, Conditional Probability and Independence, Permutations and Combinations, Rules of Probability, Bayes' Theorem. Random Variables – Concept of Random Variable, Percentiles, Probability Distributions – Discrete & Continuous, Mean, Variance and Covariance of Random Variables, Chebychev's inequality.	6
Π	Standard Probability Distributions: Discrete distributions- Uniform, Binomial, Multinomial, Hyper geometric, Poisson, Negative Binomial, Poission; Continuous distributions - Normal, Exponential, Gamma, Weibull and Beta distributions and their properties -Function of Random variables.	6
III	Sampling Distributions: Random sampling, Sampling Distributions of Means, Estimation, Properties of point estimators, Confidence interval, Maximum likelihood and Bayes estimators, Prediction intervals.	6
IV	Testing of Hypothesis: Sampling distributions – testing of hypothesis for mean, variance, proportions and differences using Normal, t, Chi-square and F distributions, tests for independence of attributes and Goodness of fit.	6

Dean τ H.P. Technical University Hamirpur - 177001

Linear Correlation and Regression Analysis: Introduction, Linear Regression model, Regression coefficient, Lines of correlation, Rank correlation.

TE – 301: TEXTILE MACHINES AND PROCESSES

Teaching Scheme Credits Marks **Duration of End** L Т P/D С Sessional End Semester Total Semester Exam Examination 3 2 2 40 0 60 100 3 Hrs

Teaching and Examination Scheme

COURSE OBJECTIVE:

To introduce the various stages involved in the process of conversion of fibres into yarn, fabric garment and to explain the various processes employed in textile chemical processing sector.

COURSE CONTENT:

UNIT	CONTENT	No. of
UNII	CONTENT	Hrs.
Ι	 General and Numbering Systems: - Topic including job and entrepreneurial opportunities of textile technologist, general nomenclature related to textile. Flow chart of conversion of fiber into finished garment. Direct and indirect system, relationship among different numbering systems. Fibres: Classification of natural and manmade fiber, basic requirement of fiber forming polymer and fibres. Elementary idea of polymerization, crystallinity and orientation 	8
II	 Yarn Formation: Objectives of spinning, conventional and non-conventional methods of yarn formation. Elementary idea of conversion of fiber into yarn, objectives of all the processes and machineries involved in it viz. blow room, card, comber, draw frame, speed frame, ring frame. Function of twist on plied yarns. Different methods for the production of synthetic yarn. Difference between staple and filament yarn. Preparatory Process: Objectives of winding, doubling, warping, beam and sectional warping, sizing drawing in process 	9
III	 Fabric Formation: Weaving, knitting and non-woven. Idea of conventional and non-conventional weaving, basic motions of weaving, basic weaves and designs. Chemical Processing: Elementary ideas of singeing, desizing, scouring, bleaching, mercerization. Dyeing: classification and brief methodology its type. Printing: various methods and styles of printing, introduction to J-box, padding mangle, jigger, winch. 	9
IV	Finishing : Classification of finishes, elementary idea of calendaring, sanforization, softening, easy care, flame retardant, anti-static, anti-pilling, water repellent, oil	8

Dean H.P. Technical University Hamirpur - 177001

repellent, anti-bacterial and UV protective finish.

Garment Manufacturing: Garment industry and general nomenclature of garment industry. Main processes required for conversion of fabric into finished garment.

Text Books:

TE – 302: NATURAL FIBRE

Teaching SchemeCredits			Credits	Marks			Duration of End
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
3	0	0	3	40	60	100	3 Hrs

Teaching and Examination Scheme

COURSE OBJECTIVE:

To teach the fundamentals of natural fibres, their cultivation and to impart knowledge on the identification of different natural fibres on the basis of their physical and chemical properties.

COURSE CONTENT:

UNIT	CONTENT	No. of
		Hrs.
I	Introduction : Historical Evolution of Textiles. Definition of Textiles, Fibre, Staple fibre, Filament, Yarn, Thread, Fabric and Clothing. Essential and desirable properties of textile fibres. Requirement of fibre forming polymers. Classification of textile fibres.	8
	Polymers: Degree of Polymerization. Types of polymer, Orientation and crystallinity in fibres. Micro-structure of textile fibre and filament	
II	 Cotton – Varieties: Genetically modified Cotton, Organic Cotton & Coloured Cotton, Cultivation and harvesting, Chemical composition, Chemical structure, Morphological structure, Physical properties, Chemical properties and uses. Bast Fibres: Jute: Cultivation, Retting, Fibre Extraction and Properties. Ramie: Chemical composition, properties and processing of Ramie fibre. Hemp: Physical and chemical properties, Structure, Primary processing of Hemp stalk and Retting. Sisal: Chemical composition, Properties, Fibre structure, Production and early processing. Mudar fibre: Properties and composition. Varieties and uses –Kenaf, Banana and coir fibre 	9
Ш	 Protein Fibres: Wool – Types, Fibre extraction, Chemical Composition, Chemical structure, Morphological structure, Physical properties, Chemical properties and uses.Silk – Types, Production of Raw silk, Wild silk, Spun silk, Chemical composition, Chemical structure, Physical properties, Chemical properties and uses. Spider Silk: Types and Properties. Regenerated Protein Fibres-Principle of manufacture. Casein fibre. Vicara fibre. Ardil fibre. General properties. 	9
IV	Regenerated Cellulosic Fibres- Principle of manufacture, Viscose rayon production, Purification of viscose fibre, Physical properties, Chemical properties	8

Dean H.P. Technical University Hamirpur - 177001

& Uses. Modification of viscose rayon. Other regenerated cellulosic fibres – Tencel, Modal and Bamboo. Unconventional natural fibres.

Identification of Fibres: Feeling Test. Burning test. Microscopic test Staining Test. Chemical test and Density measurement.

Text Books:

- 1. Mishra S P, "*A Text Book of Fibre Science and Technology*," New Age. International (P) Ltd., Pub., New Delhi, (2000).

- 2. Marjory L Joseph, "*Essentials of Textiles*", CBS College Publishing, New York, (1984), ISBN:0030627389

Dean H.P. Technical University Hamirpur - 177001

TE – 303: YARN MANUFACTURE – I

Teach	ning Sch	neme	Credits	Marks			Duration of End
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
2	2	0	3	40	60	100	3 Hrs

Teaching and Examination Scheme

COURSE OBJECTIVE:

To teach the design, constructional features and working principles of spinning preparation machines – ginning machinery, blowroom, card, drawframe and to educate on the processing of different types of fibres and their blends according to the specifications and needs of the customers.

COURSE CONTENT:

UNIT	CONTENT	No. of
т		Hrs.
1	Ginning: Objective of ginning, study of ginning machineries, Pre and post ginning,	8
	baiing of fibers, fatest developments.	
	Blow Room: Objectives, principles of mixing and blending, types of mixing and	
	blending mixing and blending machineries blending performance latest	
	developments in blending machinery	
П	Blow room Principles: Principle of opening and cleaning and its machinery	9
	classification, study of opening and cleaning machine and its modern	-
	developments. Details of lap forming mechanism, feed regulating motion, calendar	
	roller pressure, length measuring device, lap build, lap defects and its remedies.	
	Chute feed to card.	
	Single line processing: Degree of opening and cleaning. Performance assessment	
	of blow room line. Machine and labour productivity, Norms. Calculations	
	pertaining to blow room	
III	Carding: Objectives, principles of roller and clearer card, flat card, detail study of	9
	flat card and its components. Licker-in, cylinder, doffer and flats. Transfer of fiber.	
	Card clothing. Web stripping and coiler system.	
	Semi high production card. High production card. Neps in carding web.	
	Norms Performance assessment and calculations pertaining to carding	
117	Drawing: Objectives, principles of drawing and doubling. Detailed study of draw	0
1 V	frame machine. Top and bottom rollers, top roller cots, roller weighting, drafting	0
	wave roller slip and roller eccentricity	
	Drafting: Various drafting system modern drawframe, autoleveller in Drawframe	
	2 million and a starting system, modern and mane, autorevener in Drawnane,	

Dean H.P. Technical University Hamirpur - 177001

Machine and labour productivity. Norms. Performance assessment and calculation	
pertaining to draw frame machine

Teaching Scheme Credits				Marks	Duration of End		
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
2	2	0	4	40	(0)	100	2 11

Teaching and Examination Scheme

COURSE OBJECTIVE:

To educate about the basic principle of weaving and to teach the design, constructional features and working principles of machine and methods used for weaving preparatory process, primary and secondary motions of weaving.

COURSE CONTENT:

UNIT	CONTENT			
		Hrs.		
Ι	Introduction to weaving: weaving process flow chart, Winding: Objectives, types	9		
	of packages, types of winding machines, uniform buildup of cones, Mechanical and			
	electronic type yarn clearer. Yarn tensioner: Additive, multiplicative, combined and compensating type.			
	Patterning : Reasons and remedies. Yarn path with different traverse ratio, Auto winders Autoconer: Objective, machine parameters.			
	Doubling: Objective and types, TFO: Objectives, machine parameters, properties of			
	TFO yarn, Yarn fault classifying systems, Pirn winding: Objectives, types of pirns,			
	Hacooba pirn winding machine.			
п	Warping: Objectives, types of warping, conditions for warping, comparison of beam warping with sectional warping, basic features of warping machine, different types of creels, reeds, leasing systems, derivation for volume of yarn to be stored on beam, actors effecting warp quality on beam. Calculations related to warping	9		
	Sizing: Objectives, flow chart of sizing process with different zones, sizing machines: Twin and multi cylinder, Features of sizing machine, machine elements, sizing ingredients, size preparation, control points, Latest developments. Performance assessment and calculations.			
III	Drawing In : Importance, manually and automatic drawing process, design with its drawing and lifting plan. Calculation of heald and reed count. Weaving: History of weaving with manual and automatic loom, and modern loom revolutions. Overall concept about looms and its elements. Different motions of looms: Primary, secondary and auxiliary motions.	8		

Dean H.P. Technical University Hamirpur - 177001

	Shedding : Objective, Different types of shedding: Tappet, dobby, jacquard with advantage and disadvantages. Tappet shedding: its limitations, positive and negative shedding, types of shed, early and late shedding, shed timing, importance of bending factor.	
IV	Picking: Objective, Types of conventional picking: over picking and under picking with its mechanism, advantages and disadvantages, different picking accessories and their functions, Calculation of shuttle velocity and derivation for energy of picking, picking force. Picking timing such as late picking and early picking, reasons of false picking and shuttle fly.	9
	Beat up : Objective, Movement of sley, beat up, sley eccentricity and the factors which influence it, derivation for kinematic movement of sley, effects of distance, velocity and acceleration with respect to sley eccentricity on beat up force and timing available for shuttle passage. Calculation based on shedding, picking, sley movement, production, efficiency.

I	 Grammar and Vocabulary: Usage of the French verb "se presenter", a verbof self-introduction and how to greet a person- "saluer". Listening and Speaking: The authentic sounds of the letters of the French alphabet and the accents that play a vital role in the pronunciation of the words. Writing: Correct spellings of French scientific and technical vocabulary. Reading: Reading of the text and comprehension – answering questions. 	6
Π	 Grammar and Vocabulary: Definite articles, "prepositions de lieu" subject pronouns. Listening and Speaking: Pronunciation of words like Isabelle, presentezandla liaison – vousetes, vousappelez and role play of introducing each other –group activity. Writing: Particulars in filling an enrolment / registration form. Reading Comprehension: reading a text of a famous scientist and answering questions. 	6
III	 Grammar and Vocabulary: Verb of possession "avoir' and 1st group verbs"er", possessive adjectives and pronouns of insistence- moi, luiand numbers from 0 to 20. Listening and Speaking: Nasal sounds of the words like feminine, ceinture, parfum and how to ask simple questions on one's name, age, nationality, address mail id and 	6

Dean C H.P. Technical University Hamirpur - 177001

	telephone number.	
	Writing: Conjugations of first group verbs and paragraph writing on self – introduction and introducing a third person.	
	Reading Comprehension: reading a text that speaks of one's profile and answering questions.	
IV	Grammar and Vocabulary: Negative sentences, numbers from 20 to 69, verb"aimer"and seasons of the year and leisure activities.	6
	Listening and Speaking: To express one's likes and dislikes and to talk of one's pastime activities (sports activities), je fais du ping-pong and nasalsounds of words – janvier, champagne.	
	Writing-Conjugations of the irregular verbs: faire and savoir and their usage. Paragraph writing on one's leisure activity- (passé temps favori).	
	Reading: a text on seasons and leisure activities – answering questions.	
V	Grammar and Vocabulary: les verbes de direction- to ask one's way and to give directions, verbes- pouvoir and vouloir and 2nd group verbs, a droite, lapremiere a gauche and vocabulary relating to accommodation.	6
	Listening and Speaking: To read and understand the metro map and henceto give one directions – dialogue between two people.	
	Writing: Paragraph writing describing the accommodation using the different prepositions like en face de, derriere- to locate.	
	Reading Comprehension: A text / a dialogue between two on location and directions- ouest la poste/ la pharmacie, la bibliotheque?

Teaching and Examination Scheme

Note: Practical as per the topics in the syllabus for the course will be conducted in the laboratory class. Following is the suggested list of exercises out of which a minimum of 8-10 experiments must be performed by a student during the semester:

List of Experiments

- 1. Preparation of lea and hank and calculation of fineness
- 2. Calculation of count of yarn using different instruments
- 3. Determination of twist.
- 4. To study the objectives of different beaters/openers.
- 5. To study the working principle of trash analyzer.
- 6. To study the working principle and path of the material in a carding machine.
- 7. To study the working principle and path of the material in a draw frame.
- 8. To study the working principle and path of the material in a roving frame
- 9. To study the working principle and path of the material in a ring frame.
- 10. To study the working principle and path of the material in a winding machine.
- 11. To study the working principle of conventional weaving machine.
- 12. To study the working principle of non-conventional weaving machine.
- 13. To study the working principle and yarn path of circular and flat knitting machine.
- 14. Study of all the processing machines.
- 15. Dyeing of fabric/yarn with direct dyes.
- 16. Study of different techniques of printing.
- 17. Study of Non-Conventional spinning machine used in Textile industry.

TE – 306: TEXTILE FIBRE LABORATORY

Teaching Scheme Credits			Credits		Duration of End		
L	Т	P/D	С	Sessional	essional End Semester Total		Semester
					Exam		Examination
0	0	2	1	30	20	50	3 Hrs

Teaching and Examination Scheme

Note: Practicals as per the topics in the syllabus for the course will be conducted in the laboratory class. Following is the suggested list of exercises out of which a minimum of 8-10 experiments must be performed by a student during the semester:

List of Experiments

Physical and Chemical identification of following Textile fibre(s)

- 1. Identification of Cotton
- 2. Identification of Wool
- 3. Identification of Silk
- 4. Identification of Bast fibres
- 5. Identification of Polyester
- 6. Identification of Nylon
- 7. Identification of Acrylic
- 8. Identification of Polypropylene

Identification of fibres in blend and % fibre content in blend

- 9. Analysis of P/C blended fabric
- 10. Analysis of P/V blended fabric
- 11. Analysis of P/W blended fabric
- 12. Estimation of fibre/filament fineness using projection microscope.
- 13. Determine the thermal behavior of fibre by using DSC and TGA.
- 14. Identification of physical structure of fibre by XRD, SEM and NMR.
- 15. Identification of chemical structure of fibre by FTIR spectroscopy.

H.P. Technical University Hamirpur - 177001

TE – 307: YARN MANUFACTURE - I LABORATORY

Teaching and Examination Scheme

Note: Practical as per the topics in the syllabus for the course will be conducted in the laboratory class. Following is the suggested list of exercises out of which a minimum of 8-10 experiments must be performed by a student during the semester:

- 1. Study of general outline of opener and clearer machine employed in B/R line process.
- 2. Study of following in Shirley trash analyser machine.
 - Chief organs.
 - Gearing arrangements.
 - Teeth inclination and teeth per inch.
- 3. Determination of trash content and analysis of waste by using trash analyzer machine.
- 4. Study of carding machine with technical details.
- 5. Study of gearing mechanism calculation of the speed of different organs of carding machine.
- 6. Calculation of draft between different zone and production of carding machine.
- 7. Study of card settings for different fibre lengths and types.
- 8. Maintenance and overhauling of carding machine.
- 9. Study of distribution of fibrous waste in a carding machine.
- 10. Study of the `NEP -COUNT' in a card.
- 11. Study of drafting arrangement and top roller weighting system of draw frame machine.
- 12. Calculation of the total draft and its distribution in draw frame machine.
- 13. Effects of break draft and roller settings on sliver uniformity.
- 14. Measurement of nip-load pressure, roller eccentricity and shore hardness of top roller drafting Rollers.
- 15. Maintenance and overhauling of draw frame machine.

H.P. Technical University Hamirpur - 177001

TE – 308: FABRIC MANUFACTURE - I LABORATORY

Teaching Scheme Credits			Credits		Duration of End

0	0	2	1	30	20	50	3 Hrs

Teaching and Examination Scheme

Note: Practical as per the topics in the syllabus for the course will be conducted in the laboratory class. Following is the suggested list of exercises out of which a minimum of 8-10 experiments must be performed by a student during the semester:

- 1. Study of the motion transmission system in winding machine.
- 2. Study of the effect of slub catcher, yarn tensioner and yarn guide on package formation.
- 3. Study of Package stop motion in cone winding machine.
- 4. Calculation of winding speed on grooved drum winding system and study of anti- patterning system incorporated to it.
- 5. Study of precision winding machine and mechanism of package building.
- 6. Study of the motion transmission system in Pirn winding machine.
- 7. Study of working principle of TFO machine and silent features of machine with yarn characteristics.
- 8. Study of working of Autoconer automatic winding machine with its machine elements.
- 9. Analysis of various fabric design with its drafting and lifting plan.
- 10. Construction of sections in sectional working machine and plan the width of a section according to the give striped fabric keeping in view the pattern.
- 11. To study the passage of yarn on a sizing machine and the features of various parts/ mechanism of the sizing machine.
- 12. To select the proper reed and heald for a weaver's beam keeping in mind the beam, loo size and fabric construction.
- 13. Study of shedding mechanism of shuttle loom and cam positioning with respect to loom cycle.
- 14. Study of picking mechanism of shuttle loom with picker movement in relation with crank shaft rotation and calculation of average velocity of shuttle.
- 15. Study of sley movement, construction and calculation of sley eccentricity

P. Technical University Hamirpur - 177001

SEMESTER-IV

MA-401: OPTIMIZATION AND CALCULUS OF VARIATIONS

TEACHING AND EXAMINATION SCHEME:

Teac	hing Sc	heme	Credits		Marks		Duration of End Semester Examination
L	Т	P/D	С	Sessional	End Semester Exam	Total	
2	2	0	3	40	60	100	3 hrs

Unit	Contents	No. of
		hours
Ι	 Introduction: A survey of some simplified examples of common real world situations leading to optimization problems, basic formulation and theory of optimization problems. Linear programming: Linear programming (optimization of linear functions subject to linear constraints): basic theory; simplex method; duality, practical techniques. 	6
II	 Linear programming: Basic LPP - solution techniques (Simplex, Artificial Basis), Complimentary Slackness Theorem, Fundamental theorem of Duality, degenerate solutions, cycling; Applications - elements of dynamic programming including Hamiltonian, Bellman's optimality principle. Transportation and Assignment Problems: Solution of a balanced transportation problem, degeneracy in transportation problems and alternate solutions, Mathematical problems in formulation of assignment problems. 	7
Ш	 Nonlinear programming: Nonlinear programming (optimization of nonlinear functions subject to constraints) with Lagrange multipliers, Karush-Kuhn-Tucker optimality conditions, convexity, duality. Approximation methods for nonlinear programming: Line search methods, gradient methods, conjugate gradient methods; Networking techniques – PERT and CPM. 	6

Dean H.P. Technical University Hamirpur - 177001

IV	Calculus of Variations: Basic definitions - functionals, extremum, variations, function								
	spaces; Necessary conditions for an extremum, Euler-Lagrange Equation, convexity								
	and it's role in minimization, minimization under constraints; Existence and								
	nonexistence of minimizers; Applications - Isoperimetric problems, Geodesics on the								
	surface.

HS-409: HUMAN VALUES AND PROFESSIONAL ETHICS

TEACHING AND EXAMINATION SCHEME:

Teaching Scheme			Credits		Marks		Duration of End Semester Examination
L	Т	P/D	С	Sessional	End Semester Exam	Total	
2	2	0	3	40	60	100	3 hrs

Unit	Contents					
Ι	Introduction –Need and Basic Guidelines	6				
	1. Understanding the need , basic guidelines, content and process of value Education					
	2. Self-Exploration – purpose, content and process, 'Natural Acceptance' and Experiential Validation – as the mechanism for self-explanation.					
II	Process for Value Education	7				
	 Continuous Happiness and Prosperity – A look at basic Human Aspirations. Right Understanding, Relationship and Physical Facilities – basic requirements for fulfillment of aspirations of every human being with their correct priority. Understanding Happiness and prosperity – A critical appraisal of the current scenario. Method to fulfill the human aspirations; understanding and living in harmony at various levels. 					
III	Harmony in Human Beings	7				
	 Understanding human being as a co-existence of the self and the body. Understanding the needs of Self ('I') and 'Body' – Sukh and Suvidha. Understanding the Body as an instrument of 'I' (I being the doer, seer and enjoyer) 					

Dean τ H.P. Technical University Hamirpur - 177001

Har	mony in Myself and body	6		
1.	Understanding the characteristics and activities of 'I' and harmony in 'I'			
2.	Understanding the harmony of I with the Body: Sanyam and Swasthya: correct appraisal of Physical needs, meaning of Prosperity in detail.			
Harmony in Family, Society and Nature				
1.	Understanding harmony in the family, society and nature.			
2.	Understanding values in human relationship; meaning of Nyaya and Program for its fulfillment to ensure Ubhay-tripti.			
3.	Trust (Vishwas) and Respect (Samman) as the foundational values of relationship.			
	Har 1. 2. Har 1. 2. 3.	 Harmony in Myself and body Understanding the characteristics and activities of 'I' and harmony in 'I' Understanding the harmony of I with the Body: Sanyam and Swasthya: correct appraisal of Physical needs, meaning of Prosperity in detail. Harmony in Family, Society and Nature Understanding harmony in the family, society and nature. Understanding values in human relationship; meaning of Nyaya and Program for its fulfillment to ensure Ubhay-tripti. Trust (Vishwas) and Respect (Samman) as the foundational values of relationship.

TE – 401: MAN MADE FIBRE

	8			-			
Teac	Teaching Scheme Credits			Marks			Duration of End
L	Т	P/D	С	Sessional	Sessional End Semester Total		Semester
					Exam		Examination
2	2	0	3	40	60	100	3 Hrs

Teaching and Examination Scheme

COURSE OBJECTIVE:

To educate on the difference between manmade and natural fibres and to describe different methods of manmade fibre manufacturing and explain how the process parameters can affect fibre properties and characteristics

UNIT	CONTENT	No. of
		Hrs.
Ι	Introduction to man-made fibres: Definition of man-made fibres. Brief history of	9
	manmade fibres. Relative merits and demerits of manmade fibres and natural	
	fibres. Synthesis of raw materials from petrochemicals: Elementary idea of	
	synthesis of raw materials viz. DMT, TPA, MEG, Caprolactam, Acrylonitrile,	
	propylene. Raw materials for rayons.	
	Polymer Production: PET through TPA and DMT route, Nylon 66 and Nylon 6 -	
	Acrylic - Polypropylene - Elastomeric - Polyvinyl and Aramid fibres.	
II	Fundamentals of the fibre spinning process: Physical fundamentals of the fibre	9
	spinning process - spinnability of liquids, rheology of spinning, mechanics of	
	spinning, formation of fibre structure .	
	Melt Spinning Equipments: Melting device, Grid and extruder, Static mixer, Pre-	
	filtration, Manifold, Spin pack, Spinneret, Quenching chamber, Spin finish	
	application, Take-up winding. Staple fibre line production details, high speed	
	spinning - Polyester, Polyamide and Polypropylene.	
III	Wet and Dry Spinning: Preparation of dope, extrusion and fibre formation.	9
	Comparison of wet and dry spinning processes. Dry-jet-wet spinning, Gel spinning.	
	Viscose rayon and variants.	
	Drawing and Heat Setting: Neck drawing, drawing systems, influence of drawing	
	on structure and properties of fibres. Types of heat setting, influencing parameters	
	on heat setting, influence of heat setting on fibre behaviour.	
IV	High performance fibres: Polymerization, spinning of high performance fibres	9
	and their applications. Modified Synthetic Fibres: Differentially dyeable fibres,	

Dean H.P. Technical University Hamirpur - 177001

Antistatic fibres, Flame retardant fibres, Micro fibres Bicomponent fibres - Cationic dyeable polyester, Polyblend fibres, Tencel.

Quality Control: Methods for Molecular weight measurements, Thermal characteristic measurements. Testing of filament yarns and staple fibres- denier, tenacity, elongation modulus. - draw force, shrinkage force.

Text Books:

- 2. McIntyre. J.E, "Synthetic Fibres", Univ of Leeds, UK,(2000)

- 1. Gupta V R and Kothari V K, "*Manufactured fibre Technology*", Chapman & Hall Pubilication, (1997).
- 2. Klein W, "Man Made Fibres and their processing", Vol.6, The Textile Institute, (1996)

Dean H.P. Technical University Hamirpur - 177001

TE- 402: TEXTILE CHEMICAL PROCESSING-I

Teac	hing Sc	ng Scheme Credits Marks			Duration of End		
L	Т	P/D	С	Sessional	End Semester Total		Semester
					Exam		Examination
3	0	0	3	40	60	100	3 Hrs

Teaching and Examination Scheme

COURSE OBJECTIVE:

To impart overall knowledge about the concepts of textile wet processing, pretreatment before wet processing for textiles and to teach dyeing technology, printing technology and finishing technology for textiles.

UNIT	CONTENT	No. of
		Hrs.
Ι	 Introduction: Overview, flowsheet and justification of chemical processing of textile materials and blend, prelims of preparation: grey testing-stamping-mending-stitching, Overview on the chemical processing of knitted fabrics. Singeing and Desizing: Objectives, suitability of material. Singeing methods: plate, roller and gas singeing, merits and demerits, precautions, advancement, bio- 	8
	singeing. Objectives and methods of desizing: hydrolytic & oxidative processes, viz. rot, acid, enzyme, chlorine. Chlorite and bromire methods, influence of controlling parameters, merits and demerits of each method; mechanism of removal of starch in all these processes, evaluation of desizing efficiency.	
II	Scouring: Objective, impurities in cotton and their chemical nature and possible methods of removal, importance of alkali scouring, surfactants, enzymatic scouring. Factors affecting scouring, methods of scouring, different scouring equipment e.g., High pressure kier, steamer, their construction, working principle, capacity, solvent scouring, scouring of colored cotton, method of evaluation of scouring efficiency	9
	Bleaching: Objective, classification of bleaching methods, different bleaching agents, their relative merits and demerits, hypochlorite, chlorite, peroxide bleaching, their mechanisms, bleaching parameters, methods of bleaching, role of chemicals used in bleaching, method of evaluation of bleaching efficiency, principle/mechanism, properties, and method of application of optical whitening agents.	
III	Mercerization: Objectives, mechanism related to various physical and chemical changes in cotton during mercerization.Process parameters and operation, causticization.	9

Dean H.P. Technical University Hamirpur - 177001

	Barium activity number, its determination& interpretation. Wet and hot mercerizati	
	on. Ammonia treatment of cotton. Performance of different mercerization processes	
	Treatment with liquid ammonia: Objective, methods, relative merits and demerits,	
	evaluation.	
	Heat setting: Objectives, types, mechanism of setting in each type. Heat setting	
	conditions, controls and	
	efficiency. Heat setting of polyester, nylon, acetate and their blends, machines	
	involved in heat setting, Evaluation of heat setting efficiency	
IV	Mechanical Finishes: Introduction to finishing, its importance and classification.	8
	Physical and chemical softening processes, selection of chemical and evaluation of	
	softening. Calendaring - objectives, its types, construction and function of various	
	calendaring m/c; Influencing parameters of calendaring. Sanforizing - objectives,	
	method, mechanism and machineries involved. Evaluation of sanforizing.	
	Chemical finishes: Problem of creasing, anti-crease finish on cotton. Choice of	
	chemical, catalyst and process parameters. Drawback and advantages associated	
	with use of various anti-crease chemicals. Measures to reduce release of	
	formaldehyde. Water repellency and water repellent finishes on cotton. Evaluation	
	of water repellency, flame retardant finish, anti-static, anti-pilling, Novel finishing	
	techniques: elementary idea of enzymatic finish, plasma treatment, Nano finishing	
	and micro-encapsulation

TE – 403: YARN MANUFACTURE-II

Teaching Scheme		Credits		Marks		Duration of End	
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
2	2	0	3	40	60	100	3 Hrs

Teaching and Examination Scheme

COURSE OBJECTIVE:

To teach the design, constructional details and working principles of spinning machines (comber, speed frame, ring frames, alternative spinning systems) and to educate the inter-relationship of the process of conversion of fibres to yarns and the related machinery features.

UNIT	CONTENT	No. of
		Hrs.
Ι	Combing process: Objectives, combing for shorter and medium varieties of	9
	cotton, cottons suitable for combing, preparation of stock for combing, combing	
	cycle, role of machine components and settings.	
	Noil extraction at backward feed and forward feed comber, mathematical	
	problems, norms, performance assessment. Machine and labour productivity.	
	Recent developments	
II	Process related to roving formation: Objectives, functions of different machine	8
	components and high drafting system, roving twist in speed frame, winding	
	principles and equations related to bobbin leading and flyer leading,	
	Building motion: Cone profile, numerical problems, norms, performance	
	assessment. Machine and labour productivity. Developments in speed frame	
III	Ring spinning Process: Function and mode of operation of ring frame, role of	9
	drafting system, yarn guiding devices, forces acting between ring and traveler,	
	yarn tension variation, balloon tension at maximum diameter, tasks of traveller,	
	limiting speed, classification, form of traveler, traveler mass and material,	
	different ring-traveller combinations, fiber lubrication, running on new-ring.	
	Winding process: Cop building, cylinder and conical tip, spinning geometry,	
	causes of end breaks, numerical problems, norms, and performance assessment.	
	Machine and labour productivity. Latest developments including compact	
	spinning.	

Dean H.P. Technical University Hamirpur - 177001

IV	Non-conventional spinning processes : Principle of open end spinning, rotor spinning, chief organs and their functions, yarn properties in comparison with ring-spun yarn.	8
	Friction and air jet spinning : Principle of friction spinning, function of chief organs, yarn properties and comparison of Dref-II and Dref-III friction spinning machines, basic principle to air jet spun yarn, functions of chief organs, yarn properties, numerical problems, norms, performance assessment. Machine and labour productivity.

Teaching and Examination Scheme

Teaching Scheme			Credits	Marks			Duration of End
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
3	0	0	3	40	60	100	3 Hrs

COURSE OBJECTIVE:

To teach the design, constructional details and working principles of spinning machines (comber, speed frame, ring frames, alternative spinning systems) and to educate the inter-relationship of the process of conversion of fibres to yarns and the related machinery features.

UNIT	CONTENT	No. of
		Hrs.
Ι	Let-off System: Objective and types, types of tension variation, Warp and cloth	8
	control, different types of let-off systems, control of tension variation.	
	Take-up: Objective, Types of take-up and their mechanisms, periodic faults, anti	
	crack motion, dividend calculation, and control of pick density, calculation	
	related to it.	
II	Warp Stop: Objective, Types of warp stop motions and their functioning,	9
	mechanism, advantage and disadvantage. Weft Stop: Objective, Types of weft	
	stop motions and their functioning, mechanism, advantage and disadvantage.	
	Warp protector: Objective, Types of warp protector motions and their	
	functioning, mechanism, advantage and disadvantage. Temple: objective,	
	importance and types.	
III	Weft Replenishment System: Pirn replenishment mechanism: Cimmco and Ruti	8
	C, its limitations, different types of feelers used for it. Shuttle changing	
	mechanism, bobbin loader mechanism and automatic loom winder.	
	Box changing motion: Objective, types, its advantage and disadvantage,	
	Working mechanism of multiple box motions: weft mixing, cow burn, sliding	
	gear box, pick at will	
IV	Dobby: Scope of dobby, different types of dobby: Keighley, climax, cam, paper,	9
	rotary, positive, cross border and their mechanism pegging system as per design	
	of weave.	
	Jacquard: Scope of jacquard, working of different types of jacquards: single lift

Listening and Speaking – the semi- vowels: Voilà, pollutant. Writing - thedays of the week, months, technical subjects, time, "les spécialitésscientifiques et l' annéeuniversitaire, paragraph writing about time table. Reading: Reading of the text and comprehension – answering questions. 	6
П	 Grammar and Vocabulary: The adjectives, the nationality, feminine & masculinenoun forms "les métiersscientifiques". Listening and Speaking – Vowels: soirée, année, près de, très. Writing: Countries name, nationality, "les métiersscientifiques", numbers from:69 to infitive and some measures of unit. Reading Comprehension: reading a text. 	6
III	Grammar and Vocabulary: near future, The demonstrative adjectives, Express the aim by using the verb, Listening and Speaking –"La liaison interdite – enhaut". Writing – some scientific terms, French expressions to accept an invitation. Sentence framing. Reading Comprehension – reading a text.	6
IV	Grammar and Vocabulary: the verbs: manger, boire, the partitive articles Listening and Speaking: "le 'e' caduc Writing- the food, the ingredients, fruits,	6

Teaching and Examination Scheme

Note: Practical as per the topics in the syllabus for the course will be conducted in the laboratory class. Following is the suggested list of exercises out of which a minimum of 8-10 experiments must be performed by a student during the semester:

- 1. Desizing of cotton material.
- 2. Scouring of cotton goods
- 3. Scouring of polyester goods
- 4. Scouring of P/C blended goods
- 5. Scouring of wool fibre
- 6. Scouring of woven cotton fabric using Jigger
- 7. Bleaching of cotton with H2O2
- 8. Bleaching of cotton with NaClO2
- 9. Bleaching of cotton with NaOCl
- 10. Bleaching of Polyester
- 11. Bleaching of P/C blend
- 12. Bleaching of jute yarns / fabric
- 13. Bleaching of knitted cotton fabric using Winch
- 14. Degumming of silk
- 15. Mercerisation of cotton material

Dean H.P. Technical University Hamirpur - 177001

TE – 406: YARN MANUFACTURE - II LABORATORY

Teaching and Examination Scheme

Note: Practical as per the topics in the syllabus for the course will be conducted in the laboratory class. Following is the suggested list of exercises out of which a minimum of 8-10 experiments must be performed by a student during the semester

- 1. To estimate head to head difference in noil level & study the effect of feed per nip on percentage in nep level during combing. (mill based study).
- 2. To study the drafting, twisting and winding zone of speed frame.
- 3. To study the building motion in speed frame & the differential motion of speed frame.
- 4. Calculation of bobbin speed, break draft constant, draft constant and twist constant and production of speed frame.
- 5. To study the influence of machine and process parameters on roving unevenness (mill based study).
- 6. To study the drafting, twisting, winding zone and the building motion in ring frame.
- 7. Calculation of draft constants, twist constant, coils per inch and production of ring frame.
- 8. To ascertain the effect of break draft and total draft on yarn unevenness and strength (mill based study).
- 9. Estimation of spinning tension as a function of traveller weight, yarn count and balloon height (mill based study).
- 10. To perform various settings and maintenance operation on ring frame such as:
 - Ring rail levelling
 - Spindle gauging
 - Spindle eccentricity
 - Lappet eccentricity
- 11. To study the influence of spindle speed and traveller weight on hairiness.
- 12. Study the chief organs, mechanism and calculations of open end and friction spinning machines.
- 13. To study the timing diagram of a comber and the nature of movement of nipper assembly
- 14. To study the function of top comb and its depth of penetration with reference to noil extraction and fractionating efficiency (mill based study).
- 15. To study the effect of type of feed and detachment setting on noil percentage and fractionating efficiency.

P. Technical University Hamirpur - 177001

TE – 501: THEORY OF TEXTILE MACHINES

Teaching Scheme Credits Marks **Duration of End** Т С **End Semester** Total Semester L P/D Sessional Exam Examination 3 2 4 40 60 100 3 Hrs 0

Teaching and Examination Scheme

COURSE OBJECTIVE:

To know about various machine parts, its mechanisms, benefits of different cams and follower motions scheme and to construct cylindrical cam profiles graphically. To impart Knowledge on kinematic properties of gears, design of several types of belt and chain drives balancing and also about basic concepts of vibrations caused due to unbalance of rotating mass.

UNIT	CONTENT	No. of
		Hrs.
Ι	Basic concepts: Kinematics of machine, kinematics link and their different type,	10
	types of kinematics pair, degree of freedom, kinematics chain, mechanism and	
	inversion of four bar chain, single slider and double slider crank mechanism.	
	Velocity Analysis: Motion of a link, velocity of a point on a link by relative	
	velocity method, velocities of four bar mechanism, single slider crank mechanisms,	
	rubbing velocity at a pin joint. Velocity of a point on a link by instantaneous centre	
	method, properties and types of I-centre, Kennedy theorem and methods of locating	
	I-centres in a mechanism.	
II	Belt, rope and chain drive: Types of belt drives, velocity ratio, law of belting,	9
	concept of slip and creep, length of belt, ratio of driving tensions for flat belt and v-	
	belt, power transmitted, effect of centrifugal tension on power transmission,	
	condition for maximum power transmission, initial tension in the belt. Use of V-	
	belt, rope, chain, chain length and angular speed ratio, relative advantage and	
	disadvantage of chain and belt drives.	
	Gears: Classification of gears, terminology used in gear, law of gearing, velocity	
	of sliding, forms of teeth, construction, properties and comparison of an involute	
	and cycloidal teeth, effect of centre distance variation on the velocity ratio, length	
	of path of contact, arc of contact, number of pairs of teeth in contact, interference,	
	minimum number of teeth on the pinion and wheel to avoid interference, minimum	
	number of teeth on the pinion for involute rack to avoid interference, undercutting,	
	terminology of helical and worm gears.	

Dean H.P. Technical University Hamirpur - 177001

III	Gear trains: Definition, types: simple, compound, reverted and epicyclic gear trains, velocity ratio of epicyclic and compound epicyclic gear trains.	9
	Cams and follower: Types of cams and followers, cam terminology, types of	
	motion of the follower, analysis of motion of the follower, analysis of motion of the	
	follower for cams with specified contours.	
IV	Flywheels : Turning moment diagram for steam engine, four stroke internal combustion engines, fluctuation of energy, maximum fluctuation of energy, coefficient of fluctuation of energy, energy stored in flywheel, use of flywheel.	8
	Application in Textiles : Belts, chains and gear drives in textile machines. Different types of cam and followers used in textile machines.

2

To teach the working principle and standard test procedures of various testing instruments for measuring the properties of fibre/yarn and to educate on the analysis and the interpretation of test results for taking appropriate further actions.

60

40

COURSE CONTENT:

UNIT	CONTENT	No. of
		Hrs.
Ι	Introduction: Aim and scope of testing, Sample and Population, Sampling	8
	techniques for fibre, yarn and fabrics, Sampling Error	
	Moisture in Textiles: Absolute humidity, Relative Humidity, Moisture content,	
	Moisture regain, Factors affecting regain of textile materials, effect of moisture on	
	fibre properties, measurement of atmospheric conditions, Shirley moisture meter.	
II	Testing of Fibres: Measurement of Length distribution of Cotton fibre, fineness,	8
	maturity, neps, strength, elongation, trash-content, fibre contamination	
	measurement, grading of different cotton, application of HVI and AFIS,	
	measurement of fiber friction and crimp	
III	Testing of Yarn: Yarn numbering and conversion system, Importance and	9
	measurement of Yarn twist in continuous filament, spun and plied yarns. Tensile	
	testing: Properties, various type of measuring instruments and their working	
	principles, factors affecting tensile properties, elastic recovery, effect of impact	
	loading and fatigue behavior, yarn friction.	
IV	Evenness testing of yarns, nature and causes of irregularities, principles and	9
	methods of evenness testing, evaluations and interpretation of evenness results,	
	concept of index of irregularity, variance length curves and spectrogram analysis.	
	Yarn faults, classification, Classimat fault analysis utility and principle of different	
	types of instruments. Yarn hairiness, principle of measurement, measuring	
	instruments.

Teaching Scheme		Credits		Duration of End			
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
3	0	0	3	40	60	100	3 Hrs

Teaching and Examination Scheme

COURSE OBJECTIVE:

To impart knowledge about colour measurements, dyeing and printing of textile materials and to teach the design, constructional and operational features of textile dyeing and printing machinery.

UNIT	CONTENT	No. of
		Hrs.
Ι	Theories of Colour and Dyeing: Additive and subtractive theories. Primary,	9
	secondary, tertiary, complementary and contrasting colours. Tristimulus values.	
	Metamerism/ isomerism, colour-co-ordinates, CIELAB values, Reflectance factor,	
	Kubelka-Munk equation, computer colour matching. Dye-fibre interaction, free	
	volume theory.	
	Dyeing of Textiles: Introduction to thermodynamics and kinetics of dyeing,	
	Dyeing technology of natural and manmade textiles with direct, reactive, vat,	
	insoluble azoic, Sulphur and indigosol, acid, metal-complex, basic and disperse	
	dyes. Auxiliaries used in dyeing, Dyeing with Pigments. Dyeing machinery	
II	Dyeing of Blends: Classification of blends, shades and methods for dyeing of	8
	blends. Suitability of each method for dyeing of specific blend.	
	Denim Processing: Introduction. Denim fabric construction. Indigo dyeing	
	machines – rope, sheet and loop form. Dyeing technology for denim with indigo.	
	Precautions in Indigo dyeing. Yarn requirements for quality denim fabrics.	
	Finishing and washing of denim fabric. Types of denim fabrics.	
III	Styles of printing: Direct, Resist (mechanical and chemical) and Discharge	9
	printing on natural and synthetic fabric. Printing of cotton with reactive dyes, wool, silk nylon with acid and metal complex dyes. Printing of polyester with disperse	
	dves.	
	Methods of printing: Block –Flat-bed Screen – Rotary – Roller – Ink-Jet (digital)	
	- Transfer (wet and heat) - Photographic printing. Pigment printing - Printing of	
	blends. Printing thickeners and auxiliaries. After treatment for printed materials	
IV	Identification of dyes: Identification of dye on dyed natural and manmade textiles.	8

Dean H.P. Technical University Hamirpur - 177001

Washing and drying: Importance, Washing ranges, Fabric handling devices,Drying: Introduction and types. Mechanical dryingmangling, suction drying and centrifuging. Thermal drying – cylinder drying,stenter drying and radiation drying; merits and demerits of each method.

TE - 504: NON - CONVENTIONAL YARN MANUFACTURE

Teaching Scheme		Credits		Duration of End			
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
2	2	0	3	40	60	100	3 Hrs

Teaching and Examination Scheme

COURSE OBJECTIVE:

To teach the design, constructional details and working principles of Non – conventional spinning machines (rotor, air-jet, friction, compact and other spinning systems) and to educate about the difference and inter-relation among the properties of different yarn structures.

COURSE CONTENT:

UNIT	CONTENT	No. of
		Hrs.
Ι	Introduction: Fibre characteristics requirements for different leading spinning	9
	technologies. Possibilities and limitations of different spinning technologies.	
II	Rotor Spinning: Principle and raw material preparation. Specifications of	8
	different organs and effect of each on the process and product quality. New	
	developments. Assessment of Rotor spun yarn structures and properties	
	Air-jet Spinning: Principle and raw material preparation. Process and machine	
	parameters affecting product quality. Principle of vortex yarn manufacture.	
	Difference between air jet spun and vortex spun yarn structure.	
III	Friction Spinning: Principle and raw material preparation, process and machine	8
	parameters affecting product quality. Assessment of DREF-II and DREF-III yarn	
	structures and properties.	
	Compact Spinning: Principle and raw material preparation. Comparative	
	assessment of the structure and performance with respect to ring yarn.	
IV	Other Spinning system: Self twist, twist less, warp spinning, Electrostatic	9
	spinning, Core spinning, Siro spinning, Bobtex yarn manufacture, solo spun yarn	
	manufacture. New Developments

L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
3	0	0	3	40	60	100	3 Hrs

Teaching and Examination Scheme

COURSE OBJECTIVE:

To teach the fundamentals of fibre structure and physical characterization methods and to provide knowledges of fibre properties such as moisture, mechanical, optical, frictional, electrical and thermal properties in terms of structure of the fibres.

UNIT	CONTENT					
		Hrs.				
Ι	Fiber structure: Traditional view of fibre structure- Two-phase models: The	9				
	fringed micelle, The fringed fibril, Chain folding, Continuous structure models and					
	Intermediate views. Degree of order and degree of orientation.					
	Structure investigation: Methods of investigation of fibre structure. Identification					
	of chemical structure by IR spectroscopy. Identification of physical structure by X-					
	ray, Electron Microscopy, NMR.					
II	Moisture absorption: Definitions of humidity, moisture regain and moisture	9				
	content. Relation between regain and relative humidity. Effect of stress and					
	temperature on regain. Heat of sorption. Swelling of fibres. Quantitative theory of					
	moisture absorption.					
	Fibre friction: Technological importance. Static and Kinetic Friction, Nature of					
	Friction, Fibre on Fibre Friction and Fibre on other material Friction. Measurement					
	of friction. Factors affecting Coefficient of friction, Effect of load and area of					
	contact, Lubrication					
III	Tensile properties: Ideal Stress-strain behavior, Deviation from ideal stress strain	9				
	behavior, stress strain behaviour of commercial fibres, effect of external and					
	structural factors on stress-strain behaviour of fibres, Different experimental					
	methods, Factors influencing results of tensile experiment. Weak link effect theory.					
	Elastic recovery. Effect of test conditions on recovery. Cyclic testing. Fibre fracture					
	and fatigue.					
	Viscoelastic Properties: Molecular mechanism of viscoelastic behaviour, Creep					
	and stress relaxation. Models of viscoelastic behaviour: Kelvin and Maxwell					

Dean H.P. Technical University Hamirpur - 177001
	model. Bending and torsional properties of fibre. Structural effect on extension	
	behaviour. Dielectric properties: Definition and effect of different parameters on	
	dielectric properties.	
IV	Electrical Properties: Basic concept of Electrical conductivity, Electrical	9
	conductivity of polymer fibres, effect of different factors on the electrical resistance	
	of fibres. Static electricity: Introduction and significance. Measurement of static	
	electricity. Explanation of static phenomena. Anti-Static treatment.	
	Optical properties: Polarization and Light, Refractive index and birefringence.	
	Birefringence and orientation of fiber. Reflection and lustre, Absorption and	
	dichroism. Thermal properties: Thermal methods: DSC, DMA/TMA & TGA.	
	Structural changes on heating. Thermal transitions: first and second order	
	transition. Free volume theory, factors affecting glass transition temperature.	
	Melting Factors affecting melting temperature	
	moning, i actors arecting moning temperature

L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
2	0	0	2	40	60	100	3 Hrs

COURSE OBJECTIVE:

To impart knowledge regarding Geotextile, selection of right type of fibre, yarn and fabric for the end-use application of geotextile. To teach about the pre-requisite performance properties of textiles to be used as Geotextile.

UNIT	CONTENT	No. of
		Hrs.
Ι	Introduction: Usefulness of geotextiles, Classifications, Essential properties of	7
	geotextiles	
	Geosynthetics types, functions and application areas of geotextiles, fibres and	
	fabric selection criteria for geotextile applications	
II	Natural Fibre Geotextiles: Development of natural materials as geotextiles,	7
	Natural fibres Applications for natural geotextiles.	
	Engineering properties of geotextiles, Performance of natural fibre geotextiles for	
	soil strengthening	
III	Mechanics of reinforcement, filtration and drainage by geotextiles and functions,	7
	material construction and manufacturing processes in case of geotextiles.	
	Evaluation of geotextiles with and without soil, evaluation of filtration and	
	drainage functions, reinforcement, creep, moisture barrier characteristics, durability	
	and ageing.	
IV	Application of Geotextile: Geotextiles and reinforced soil structures: Retaining	7
	walls, embankment, foundation. Geotextiles in roads and railways: separation,	
	draining and filtering.	
	Geotextiles in environmental control: covers and liners, landslides, and erosion	
	control.

TE-509: FASHION DESIGNING

Teaching Scheme			Credits	Marks	Duration of End		
L	Т	P/D	С	Sessional	Total	Semester	
					Exam		Examination
2	0	0	2	40	60	100	3 Hrs

Teaching and Examination Scheme

COURSE OBJECTIVE:

To impart knowledge on human body measurements, creating pattern, and to develop commercial pattern with design aspect by manipulating the basic pattern and to apply historic costume knowledge to modern fashion design construction.

UNIT	CONTENT	No. of
		Hrs.
Ι	Introduction to textiles: Natural and synthetic Fibers – Classification, uses. Types	7
	of Yarn and Fabric, fabric design, and uses.	l
		l
	Introduction to Fashion: Introduction to fashion and apparel design. Origin of	1
	fashion, concept, analysis, trends and creations, style-fad-trends. Fashion theories-	l
	trickle down, trickle across and bottom up theory, Factors affecting fashion	l
II	Elements of design: Basic concept of design, elements of art, Definition of line	7
	shape, form, size, space, texture and colour. Structural and decorative dress	l
	designing, creating varieties through designs.	l
		l
	Principles of Design: Definition Harmony, Proportion, Balance, Rhythm,	l
	Emphasis.	l
III	Anatomy for designers: Human Proportion and figure construction. Methods of	7
	determining individual proportions.	l
		l
	Psychology of Cloths: First impression, role of socio- psychological and	l
	economical aspects.	
IV	Fashion promotion, Display of fashion materials: Importance, source technique	7
	and window display, classic fashion shows. Important fashion centers of the world	l
	and India.	1
		1
	Cultural Knowledge: Societal sense and aesthetics, Indian aesthetics, western	l
	medieval aesthetics, Modern and Postmodern aesthetics	1

TE – 511: TEXTILE TESTING-I LABORATORY

Teac	hing Sc	heme	Credits		Marks			
L	Т	P/D	С	Sessional	Semester			
					Exam		Examination	
0	0	2	1	30	20	50	3 Hrs	

Teaching and Examination Scheme

Note: Practical as per the topics in the syllabus for the course will be conducted in the laboratory class. Following is the suggested list of exercises out of which a minimum of 8-10 experiments must be performed by a student during the semester

- 1. To prepare a Bear Sorter diagram and determine the following:
 - Mean Length
 - Effective length
 - Short fibres Percentage
 - Dispersion Percentage
- 2. Determine 2.5 % S.L., 50 % S.L., and uniformity ratio of a given cotton using fibrograph. Compare the fibrogram of manmade fibre with cotton.
- 3. Determine the micronaire value of a given cotton sample by Air-Flow method. Convert the result into SI units and give a suitable rating to the fibre sample.
- 4. Determine maturity coefficient and maturity ratio of a given sample by caustic soda method. Give appropriate rating to the fibre sample.
- 5. Determine Pressley Index of a cotton sample by Pressley Tester at zero and 3mm gauge length and convert result into tenacity. Compare and comment on the results at different gauge lengths.
- 6. Determine the bundle strength and elongation of a given manmade fibre using Stelometer. Study the effect of rate of loading on tensile properties of the fibre.
- 7. Study evenness and imperfection in the given yarn and compare the results with uster statistics. Study the spectrogram and irregularity trace to determine type of irregularity present.
- 8. Prepare yarns Appearance Boards and compare with ASTM standards.
- 9. Study the hairiness of a given yarns using Hairiness Tester. Compare the results of Evenness Tester and Hairiness Tester with ASTM grade.
- 10. Determine coefficient of friction of a spun yarn and see the effect of waxing on coefficient of friction.
- 11. Determine the Lea C.S.P by Lea CSP Tester and Autosorter and compare the results.
- 12. Determine the percentage crimp and corrected count with the help of crimp Tester.
- 13. Determine the crimp rigidity by using hot crimp contraction method.
- 14. Determine various parameters like 2.5 % S.L., 50 % S.L. Strength, fineness, maturity ratio, uniformity ratio, trash percentage etc by using HVI and AFIS.

P. Technical University Hamirpur - 177001

TE – 512: TEXTILE CHEMICAL PROCESSING-II LABORATORY

Teac	hing Sc	cheme	Credits		Duration of End

Teaching and Examination Scheme

Note: Practical as per the topics in the syllabus for the course will be conducted in the laboratory class. Following is the suggested list of exercises out of which a minimum of 8-10 experiments must be performed by a student during the semester

- 1. To dye cotton with direct dye
- 2. To dye cotton with reactive dyes
- 3. To dye cotton with sulphur dyes
- 4. To dye cotton with vat dyes
- 5. To dye cotton with Azoic colours
- 6. To dye wool fibre with
 - ➢ Reactive dyes
 - Acid dyes
 - Metal complex dyes
- 7. To dye polyester with disperse dyes
- 8. To dye nylon with acid dyes / metal complex dye
- 9. To dye acrylic with basic dyes
- 10. To dye silk with acid dyes / acid mordant dyes
- 11. Identification of dyes on dyed textiles
- 12. To print cotton fabric with hand block method in direct style, discharge style and resist Style
- 13. Study of fastness properties of different dyed samples
- 14. Flame retardant finishing and Water proof finishing of cotton fabric using padding mangle
- 15. To finish cotton fabric with
 - > Water repelling agent
 - Softening agent
 - ➢ Urea − formaldehyde
- 16. Study and working of Jigger, winch, jet and HTHP beam dyeing m/cs. Padding mangles, Garment Dyeing Machine, Fabric Dyeing Machine, Soft over Flow Dyeing Machine and Infra Color Dyeing Machine. Singeing m/c, J-box, kier, mercerizing machine, loose fibre, yarn and package

TE – 513: NON - CONVENTIONAL YARN MANUFACTURE LABORATORY

Teac	ching Sc	heme	Credits		Marks		
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
0	0	2	1	30	20	50	3 Hrs

Teaching and Examination Scheme

Note: Practical as per the topics in the syllabus for the course will be conducted in the laboratory class. Following is the suggested list of exercises out of which a minimum of 8-10 experiments must be performed by a student during the semester

- 1. Study of construction, material flow and working mechanism of rotor spinning.
- 2. Study of drafting, twisting and winding operation and determination of draft & production of rotor spinning.
- 3. Estimation of minimum twist required to spin yarn continuously in ring and rotor spinning. Estimation of twist loss in rotor spinning.
- 4. Effect of opening roller speed on rotor spun yarn characteristics and estimation of fibre breakage by the opening roller of rotor spinning machines
- 5. Study of operating principle, material flow and various parts of air jet spinning.
- 6. Study of drafting, twisting and winding operation of air jet spinning.
- 7. Study the chief organs, mechanism and calculations of friction spinning machines.
- 8. Study of drafting, twisting and winding operation of friction (Dref II and Dref III) spinning.
- 9. Study of Compact spinning, methods of fibre compacting, modification and attachments.
- 10. Assessment and control of variability in ring, rotor and air-jet spun yarns
- 11. Comparative study of ring, rotor and air jet yarn structure and properties
- 12. Study of time and motion study.
- 13. Study the construction, material flow and working mechanism of electrostatic spinning machine.

P. Technical University Hamirpur - 177001

Teaching and Examination Scheme

Note: Practical as per the topics in the syllabus for the course will be conducted in the laboratory class. Following is the suggested list of exercises out of which a minimum of 8-10 experiments must be performed by a student during the semester

- 1. To study the positive and negative aspects of shuttle and shuttle less loom.
- 2. To study the different selvedge formation: Tuck-in, Leno, Fused and Knitted selvedge.
- 3. To study the working of positive let-off and electronic let-off and their advantages.
- 4. To study the accumulators used in Shuttleless weaving machines
- 5. Study of weft preparation for picking in Shuttle less weaving machines
- 6. To Study the weft insertion mechanism of projectile weaving machine with its advantages
- 7. Study of weft transmission process to the projectile loom
- 8. To study the working of Rapier loom system and sequence of weft insertion.
- 9. Study different methods to drive the Rapier head in a rapier loom
- 10. To study the working of Air jet loom and sequence of weft insertion in air jet weaving.
- 11. To study the working principle of confuser, relay nozzle and profile reed
- 12. To study about the mechanism of Water jet picking system and principle involved in the operation of weft supply system.
- 13. To study about the circular multi-phase weaving machine, merits and demerits of circular multi-phase weaving machine.
- 14. Study the mechanism of weft insertion and fabric formation in narrow fabric weaving machine.
- 15. Study the mechanism of carpet manufacturing process.

H.P. Technical University Hamirpur - 177001

TE-515: COMMUNITY PROJECT

Teaching and Examination Scheme:

Tea	Teaching Scheme			Marks			Duration of End Semester Examination
L	Т	P/D	С	Sessional	End Semester Exam	Total	
0	0	2	1	30	20	50	3 hrs.

Suggested List of Activities/Projects :

Students are expected to complete a project in groups or alone as deemed fit by the faculty and department. They should work under supervision of Faculty member/s of department, or in collaboration with other departments, or preferably with Industry. The project should demonstrate application of the fundamentals learnt during the course of study and should also be innovative.

Dean H.P. Technical University Hamirpur - 177001

TE – 516: SPECIAL MODULE IN TEXTILE ENGINEERING

Teac	ching Sc	heme	Credits		Marks		Duration of End
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
0	2	0	1	30	20	50	3 Hrs

Teaching and Examination Scheme

The course aims at introducing new or highly specialized technological aspects in textile engineering. The course topic and content is likely to change with each offering depending upon the current requirement and expertise available with the department including that of the visiting professionals.

Dean H.P. Technical University Hamirpur - 177001

SEMESTER – VI

TE – 601: TEXTILE TESTING-II

Teaching and Examination Scheme

Teac	ching So	heme	Credits		Marks		Duration of End
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
2	2	0	3	40	60	100	3 Hrs

COURSE OBJECTIVE:

To teach the working principle and standard test procedures of various testing instruments for measuring the properties of fabric/garment and to educate on the analysis and the interpretation of test results for taking appropriate further actions.

UNIT	CONTENT	No. of
		Hrs.
Ι	Testing of yarn: Innovations in yarn testing instruments (dynamic, continuous and	9
	on-line testing of yarn quality). Testing of Fabric: Measurement of fabric	
	dimensions and other physical properties such as thickness, GSM, cover factor,	
	crimp, and shrinkage.	
	Fabric Strength testing: Tensile, Tearing and bursting strength tests, factors	
	affecting test results, Evaluation and interpretation of tensile test results.	
II	Fabric Comfort: Introduction, importance and classification of Comfort. Testing	9
	of Air Permeability, water permeability, thermal properties and flame resistance	
	properties of fabric.	
	Fabric handle: Fabric low stress mechanical properties such as smoothness,	
	stiffness, softness and shear, drape behaviour, factors influencing fabric handle,	
	Kawabata and FAST, Serviceability testing parameters such as abrasion resistance	
	snagging test, honey dew and stickiness measurement.	
III	Test related to fabric appearance such as pilling, crease and wrinkle recovery,	8
	colour fastness, Barre defect and other fabric defects.	
	Testing of Garments: Tests related to garment appearance and performance such	
	as measurement of seam pucker, seams slippage and seam strength etc.	
IV	Statistical Techniques: Concept of reproducibility and repeatability, methods	9
	pertaining to fibre, yarn and fabric testing, concept of quality, quality assurance,	
	textile product labelling, international quality parameters and standards like Uster	
	standards, AATCC, JIS and ASTM.

TE - 602: TEXTILE DESIGN AND ANALYSIS

Teac	hing Sc	heme	Credits		Marks		Duration of End
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination

Teaching and Examination Scheme

COURSE OBJECTIVE:

To teach the basics of fabric structure, fabric properties, different weaves and methods of production. To provide knowledge in order to apply colour theory.

UNIT	CONTENT	No. of
		Hrs.
Ι	Introduction: Concept of fabric designing through fabric structure and textile	9
	printing. Importance of fabric structure and analysis, detection of directions of warp	
	and weft, method of fabric presentation, weaving plans.	
	Basic Weaves: Method of construction, features and uses of plain weave and its	
	derivatives, twill weave and its derivatives, Satin and sateen weaves and their	
	derivatives. Colour Theory: Light and pigment Theory, Tint, Hue and Shade.	
	Absorbent Fabrics: Method of preparation, features and uses of Diamond and	
	Diaper Weaves, Honey comb weaves, Huck-a-back and Mock leno weaves.	
II	Crepe Weave: Special feature, construction of the weave, method of preparation of	8
	its derivatives and uses. Bedford Cord weaves: Method of construction, features,	
	cross-sectional view, derivatives and uses.	
	Welts and piques: Special features, construction of weave, mechanism of	
	indentation formation	
	Stripe and Check Weaves: Features, criteria for selection of weaves for	
	combination, rules governing the joining of different weaves. Method of	
	preparation and uses.	
111	Colour and Weave Effect: Weave and colour combinations, features, method of	9
	preparation of Continuous line effect, Hounds tooth, Birds eye, Crows foot, Hair	
	Termy Weaver, Definition elegation process of formation of nile graphical	
	representation of terry weave. Backed fabrics: Definition factures classification	
	and usage warp backed and weft backed cloth reversible backed fabric wadded	
	hacked fabric	
	Sucked fusite.	

Dean H.P. Technical University Hamirpur - 177001

	Backed fabrics: special features, construction, methods of insertion of stitch marks, different types of Backed fabrics.	
IV	 Gauze and leno weaves: special features, mechanism of change in path of warp, methods to produce Gauze weaves, doup and characterstics. Double Cloth: Definition, features, classification and uses. Method of preparation of self-stitched and center stitched double cloths, salient feature and uses. Wadded double cloth. Calculations: Raw material calculations to produce different weaves. Technical specification of important fabrics. 	9

TE – 603: GARMENT TECHNOLOGY

Teaching Scheme		Credits		Marks		Duration of End	
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
3	0	0	3	40	60	100	3 Hrs

Teaching and Examination Scheme

COURSE OBJECTIVE:

To teach the basics of fabric structure, fabric properties, different weaves and methods of production. To provide knowledge in order to apply colour theory.

UNIT	CONTENT	No. of
		Hrs.
Ι	Garment Manufacturing: Introduction, Indian apparel industry. Different	8
	garment production systems. Selection of Fabrics: Garment from Woven, knitted	
	and various other fabrics available in market, their characteristics and applications	
	to suit to different purposes	
	Pattern making: Introduction to pattern making and garment, Construction.	
	Different terminologies. Drafting, Basic bodies blocks, Muslin pattern. Commercial	
	pattern, Basic block construction, grading of pattern, size, size charts.	
II	Spreading and lay planning: Introduction to symmetrical and asymmetrical	9
	fabrics, criteria of spreading, mode of fabric spreading, methods of spreading,	
	spreading m/cs. Principles of lay plan, types of lay plan. Marker making Garment	
	Cutting: Introduction to cutting room processes, cutting methods and their merit	
	demerits. Bundling system.	
	Garment Sewing: Introduction to sewing m/c and its parts, sewing room processes and working details. Different types of sewing m/c and its suitability	
	Different sewing m/c driving system. Attachment of sewing m/c Sewing needle	
	and its sizes.	
III	Sewing stitches and seams types: Stitch formation, types of stitches, seam	9
	classification, seam geometry seam strength and slippage, seam puckering. Thread	
	calculation and its consumption	
	Trimming and Garment accessories: Definition, types, trimming methodologies	
	and accessories application. Garment finishing: Fasteners, thread tucking, care and	
	size labeling system, checking, pressing, folding and packing, packing standards	
	for domestic and export markets.	

Dean H.P. Technical University Hamirpur - 177001

IV	Garment Processing : Preparatory processes. Apparel dyeing, printing, washing and finishing processes. Apparel dyeing machines	8
	Quality Control in Garment manufacturing: Control in pattern making, grading, fabric laying, marking, sewing and finishing, control of garment defects. Computer Application in Garment Manufacturing: Application in pattern making, grading, lay planning, sewing and finishing. Concepts of computer integrated manufacturing (CIM) to the garment industry.

TE – 605: THEORY OF TEXTILE STRUCTURE

Teac	ching Sc	heme	Credits		Marks		Duration of End
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
3	2	0	4	40	60	100	3 Hrs

Teaching and Examination Scheme

COURSE OBJECTIVE:

To enable the students to understand the fundamentals of the yarn and fabric structure, measures of structural parameters and factors influencing them and to provide an elementary idea about tensile, bending, shear and drape behaviour of fabric.

COURSE CONTENT:

UNIT	CONTENT	No. of
		Hrs.
Ι	Yarn Structure: Types of yarn, the idealized helical yarn structure, yarn count and	8
	twist factors, twist contraction and retraction, Limit of Twist, packing of fibres in	
	yarn: closed and open.	
II	Fibre Migration: Ideal migration, Parameters affecting migration, characterization	9
	of migration behaviour, mechanism of migration in single and plied structure,	
	techniques of determining the position of fibre in a yarn.	
	Structural Mechanics: Extension of yarn under small load. Analysis of tensile	
	forces of yarn under stress. Prediction of breakage, Nature of rupture for continuous	
	filament yarn. Extension and breakage of spun yarn: Traditional view and	
	approach by Hearle and E1-Sheikh	
III	Fabric Geometry: Engineering approach to the analysis of fabric, Peirce and	9
	Olofsson models, relationship between h, p, c, Crimp interchange, Jammed	
	Structure, concept of similar cloth. Minimum possible cover factor. Kemp model,	
	close limit of weaving concept of pierce elastic thread model, Geometry of plain	
	knitted fabric	
IV	Blended Yarn: Blended yarn structure, Humburgers Theory. Structure property	9
	relationship of ring, rotor, air-jet, friction spun yarn.	
	Mathematical models and their applications in the study of tensile, bending, shear,	
	compression and buckling of woven fabrics

TE – 606: MECHANICS OF TEXTILE PROCESS

Teac	ching Sc	heme	Credits		Marks		Duration of End
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
3	2	0	4	40	60	100	3 Hrs

Teaching and Examination Scheme

COURSE OBJECTIVE:

To educate on the basic concepts in machine dynamics, automation opportunities in spinning mills, various design concepts on shedding tappets, speed frame cone drums and ring frame. To describe the influence of different processing parameters on the performance, efficiency, properties and quality of yarn/fabric produced

UNIT	CONTENT	No. of
		Hrs.
Ι	Processes Opening and cleaning: Elementary ideas of tuft opening and dust and	9
	foreign matter separation. Analysis of piano feed regulating motion. Evaluation	
	of Blow Room performance.	
	Carding : Mechanics of fibre entanglement and hook formation during carding.	
	Theories of carding. Transfer mechanism of fibres. Cylinder load and transfer	
	efficiency. Fibre configuration and estimation of degree of disorder. Effect of	
	different parameters on hook formation.	
II	Draw frame: Role of draw frame on yarn quality and process parameters. Hook	8
	removal inroller drafting. Drafting Force and its impact on drawing quality.	
	Combing: Theoretical aspects of combing. Fractionation in combing. Parameters	
	affecting FEI and combing efficiency and theoretical estimation of FEI	
III	Speed frame: Mechanism of package building and twisting in speed frame.	8
	Differential Gearing and Designing of cone drums in Speed Frame	
	Ring Spinning: Drives on modern ring frames. Yarn tension in ring spinning.	
	Balloon theory in spinning.	
IV	Preparatory to Weaving: Mechanics of package building during winding,	9
	Winding rate, relationship between bobbin diameter and winding rate, relationship	
	between bobbin diameter and spindle speed, Splicing and yarn tension during	
	unwinding, Cone angle and traverse in sectional warping, Stretch control in sizing,	
	Pirn sloughing,	
	Weaving: Kinematics of sley and heald motion, Shed depth and interference

TE - 607: POST SPINNING OPERATION

Teaching and Examination Scheme

Teac	hing Sc	heme	Credits		Marks		Duration of End
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
3	0	0	3	40	60	100	3 Hrs

COURSE OBJECTIVE:

To teach the design, constructional details and working principles of post pinning machines and to educate on the need and different methods of texturing.

UNIT	CONTENT	No. of
		Hrs.
Ι	Introduction: Introduction and objective of post spinning operation. Operations	8
	involved in post spinning. Drawing: Introduction of drawing filament/fibre.	
	Theoretical considerations of drawing. Concept of neck drawing. Prediction of	
	neck formation. Significance and stabilization of neck. Drawing unit. Drawing	
	behavior of thermoplastic polymers. Influence of drawing parameters on structure	
	and properties of fibres. High speed spinning and spin draw process. Drawing of	
	pre-oriented yarns and draw-warping.	
II	Heat-setting: Introduction and concept of heat-setting. Objective of heat-setting.	9
	Different nature of set. Heat-setting behaviour of fibres. Methods of heat-setting.	
	Influence of heat-setting parameters on structure and properties of fibres. Settability	
	and measurement of set.	
	Tow conversion: Introduction of Tow to Top conversion. Different methods for	
	tow to top conversion.	
III	Bulk yarn: Introduction of bulk yarn. Objectives of producing bulk yarns.	9
	Different methods of producing bulk yarns. Principles of manufacturing acrylic	
	high bulk yarn. Concept and classification textured yarns.	
	Texturing Methods: Different texturing methods and brief working principles of	
	different texturing methods. Principles of false twist texturing. Material and	
	Machine variables and their influence on the structure and properties of false twist	
	textured yarn.	
IV	Concept of air-jet texturing. Material and process variables in air-jet texturing	8
	and their influence on the structure and properties of air-jet textured yarns. Testing	
	and evaluation of textured yarns. Recent developments in texturing. Air

TE - 608: PROCESS AND QUALITY CONTROL IN SPINNING & WEAVING

Teac	hing Sc	heme	Credits		Marks		Duration of End
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
3	0	0	3	40	60	100	3 Hrs

Teaching and Examination Scheme

COURSE OBJECTIVE:

To enable the students to understand and apply process and quality control measures during spinning of yarn and weaving of fabric and to educate the students to select appropriate parameters of fibre quality and process parameters for maintaining and improving the product quality and process performance

UNIT	CONTENT	No. of
		Hrs.
Ι	Raw Material Quality: Introduction - Definition and scope of process and quality	9
	control in textiles- norms and standards. Mixing- fibre selection, mixing quality and	
	cost. Bale management techniques - Contamination removal techniques.	
	Significance of modern developments on mixing quality.	
	Waste and Neps in Blow Room, Carding and Combing: Yarn realization -	
	Types of waste, control of invisible loss. Blow room - Control of waste, Nep	
	generation and Fibre rupture. Carding - control of waste, Nep removal efficiency	
	and fibre rupture in carding, Online monitoring and control of neps on modern	
	cards. Comber - control of comber waste and nep removal, optimization of comber	
	noils. Influence of machine and process parameters on waste removal.	
II	Yarn Quality: Count variation - Assessment of within and between bobbin count	9
	variations, control of count variations in preparatory machines. Strength variation -	
	assessment and causes, process variability, causes, control of variability.	
	Unevenness and imperfections-measurement and assessment, analysis and	
	interpretation of diagram.	
	Productivity Analysis: Factors affecting the productivity in ring spinning.	
	Productivity indices. Methods for maximizing production in spinning machinery -	
	Factors affecting spinning tension in ring spinning - Control of yarn end breakage	
	rate in ring spinning - Factors affecting yarn end breakage rates in ring spinning -	
	Control of fly generation and twist variations in ring spinning.	
III	Weaving Preparatory: Winding-quality of knots and splices, process parameters.	8
	Pirn winding, improving build of the pirn, process parameters, control of	
	productivity. Warping- process parameters, control of end breakages, warp beam	

Dean H.P. Technical University Hamirpur - 177001

	quality and productivity. Sizing- approach, scope, control and optimization.	
	Drawing-In and Warp Tyeing - Control of extra ends on the weaver's beam,	
	selection & care of reeds.	
IV	Loom Shed: Loom shed - Controlling loom productivity, efficiency and fabric	8
	quality - Online process control, quality control and monitoring in weaving - Cost	
	control in weaving process parameters, Control of hard waste in ring frame,	
	winding, warping, sizing, drawing in, pirn winding and loom shed. Analysis and	
	Control measures for woven and knitted fabric defects.

TE – 609: APPAREL MARKETING & MERCHANDISING

Teac	ching Sc	heme	Credits		Marks		Duration of End
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
3	0	0	3	40	60	100	3 Hrs

Teaching and Examination Scheme

COURSE OBJECTIVE:

To acquaint the students about the concepts of marketing and merchandizing in the apparel industry in India and procedure involved in the export of apparel.

UNIT	CONTENT	No. of
		Hrs.
Ι	Marketing: Marketing Management Demand states and Marketing tasks. Marketing Concepts. Marketing system, Marketing Environment. Marketing organization	8
	Marketing Research: Procedure and characteristics of good marketing research.	
	Forecasting and Demand Measurement. Measures of Market Demand. Estimating current demand and future demand	
Π	Buying Behavior: Factors influencing buying behavior, Stages of decision buying process. Marketing Strategy: Strategic Planning. Competitive Marketing Strategies.	8
	Market Segmentation: Levels. Patterns. Procedure. Effective segmentation. Market targeting. Product Life Cycle: Concept. Marketing strategies for various stages of life cycle. New Product Development: Stages of new product development.	
III	Product and Branding Strategy: Product–line decisions–product–line analysis, product– line length and line modernization, Featuring and Pruning. Brand decisions – branding challenges, brand–name decision, brand – building tools, brand strategy decision, brand asset management and brand auditing and repositioning. Packaging and Labeling.	9
	Pricing Strategies: Price setting – steps. Price Adaptation Strategies – Geographical pricing, price discounts and allowances, promotional pricing, discriminatory pricing and product –mix pricing.	
IV	Managing Retailing, Wholesaling & Market Logistics: Retailing – types, marketing decisions and trends. Wholesaling – types, marketing decisions and	9

Dean H.P. Technical University Hamirpur - 177001

trends. Market Logistics – objectives and decisions.

Merchandising: Introduction. Dimensions of product change. Nature and timing of merchandising responsibilities – line planning, line development, product development and line presentation.

Materials Sourcing and Selection: Introduction. Role of sourcing in an apparel industry. Materials sourcing processes. Selection of fabrics. Predicting aesthetics and performance. Evaluation of fabric quality.

Teaching Scheme			Credits		Duration of End		
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
3	0	0	3	40	60	100	3 Hrs

Teaching and Examination Scheme

COURSE OBJECTIVE:

To enable the students to learn about structure of fabric, different types and methods of construction of pile fabrics and design the structure for different applications.

UNIT	Γ CONTENT						
		Hrs.					
Ι	Gauze and Leno: Basic shed formation - Different types of Doup healds - Russian	8					
	Cords - Earing Mechanism - Madras - Muslin structure.						
	Warp Pile Fabrics: Produced by various methods: (a) Face-to-Face Principle (b)						
	with aid of Wires, All over or continuous pile structure – Figured pile structure.						
II	Narrow Fabrics: Construction of ribbons and tapes - Zip fastener tapes.	9					
	Brocades - Warp rib - Weft rib - Multi weft brocades.						
	Arrangement of Figures : Unit Repeating Designs - drop design - half drop design						
	- Half drop bases - diamond base - Ogee base - Diagonal waved line base -						
	rectangular base - sateen system of distribution.						
III	Tapestry Structures: Simple weft face tapestries – Repp-stitched weft face	8					
	tapestry structures - Combined warp and weft tapestry structures						
	Figured Pique Fabrics: Classification of the structure - loose back piques - half						
	fast back piques.						
IV	Lappet Weaving: Lappet wheel construction - Lappet Mechanism - Swivel	9					
	weaving Mechanism. Special Jacquards: Self twilling - Sectional - Inverted						
	hook - Border - Compound jacquards.						
	Spool and Gripper Axminster Carpets: spool Axminster system - Gripper						
	Axminster system – Spool – Gripper system

TE – 611: TEXTILE TESTING-II LABORATORY

Teaching Scheme			Credits		Duration of End		
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
0	0	2	1	30	20	50	3 Hrs

Teaching and Examination Scheme

Note: Practical as per the topics in the syllabus for the course will be conducted in the laboratory class. Following is the suggested list of exercises out of which a minimum of 8-10 experiments must be performed by a student during the semester

- 1. Characterize a woven fabric with respect to its dimensional properties.
 - a. thread density b. yarn number c. yarn crimp d. weave
 - e. cover factor f. areal density g. skewness h. Thickness
- 2. Determine the tensile strength and elongation of a woven fabric and compare the loadelongation curve with non-woven and knitted fabric.
- 3. Determine the tear resistance of a fabric using Elmendorf Tear Tester.
- 4. Determine the bursting strength of a fabric on a hydraulic bursting tester.
- 5. Determine the abrasion resistance and pilling resistance of a fabric.
- 6. Determine the crease and wrinkle recovery of fabric and observe effect of loading time and recovery time on crease recovery.
- 7. Determine the Drape coefficient of a fabric sample.
- 8. Determine the Air permeability and Flammability of a fabric.
- 9. Determine the thermal resistance of a fabric by Guarded hot plate method.
- 10. Determine the stiffness of a fabric by Shirley stiffness tester.
- 11. Determine the Classimat fault analysis (yarn fault classifying system)
- 12. Determine the water permeability and water vapour permeability of a fabric.
- 13. Detrmine the moisture management property and drying rate of a fabric and analyze the wear comfort of clothing.
- 14. Determine and compare the seam strength, seam slippage and seam puckering of a fabric sewn with different types of sewing threads.
- 15. Study of various low stress mechanical properties of fabric by using FAST.

					Exam		Examination
0	0	2	1	30	20	50	3 Hrs

Teaching and Examination Scheme

Note: Practical as per the topics in the syllabus for the course will be conducted in the laboratory class. Following is the suggested list of exercises out of which a minimum of 8-10 experiments must be performed by a student during the semester

List of Experiments

1. Analysis of different fabric samples to know their particulars as stated:-

- A. For Yarns:-
- Ends and Picks/inch
- Warp and Weft Count
- Warp Crimp and Weft Crimp
- Ply and Twist.

B. For Fabrics:-

- Tape length,
- Reed width,
- Denting order,
- Weight of warp and Weft and fabrics,
- Weight per square yard,
- Warp and weft cover,
- Colour plan and use.

Study of the following fabrics samples:-

- Plain and derivatives
- Twill and derivatives
- Diamonds and Drapers
- Honey comb
- Huck-a-back
- Mockleno
- Welts and Piques
- Single Knitted -Single Jersey structure
- Knitted -Interlock Structure

- Stripe and Cheques
- Satin / Sateen
- Crepe
- Terry pile
- Colour and Weave effect
- Double Cloth
- Corduroy
- Double Knitted-Rib Struc ture
- 2. Art work development for Dobby / Jacquard design using computer and realization of production data
- 3. Evaluation of a CAD woven software.

H.P. Technical University Hamirpur - 177001

TE - 613: GARMENT TECHNOLOGY LABORATORY

Teaching and Examination Scheme

Note: Practical as per the topics in the syllabus for the course will be conducted in the laboratory class. Following is the suggested list of exercises out of which a minimum of 8-10 experiments must be performed by a student during the semester

- 1. Study of sewing machine its types, its construction parts and functions and use of sewing machines.
- 2. Construction of hand stitches Basting, Running, Hemming, Back stitch and its Variations
- 3. Construction of seams Plain, French, Lapped, Flat fell, Hongkong, eased and Top stitched
- 4. Construction of Gathers, Pleats and Tucks
- 5. Development of patterns for simple designs using basic blocks
- 6. Construction of basic blocks to assemble a garment
- 7. Construction of garment stitching and finishing
- 8. Study of various types of cutting methods used for cutting a garment.
- 9. Study of Paper patterns Types, Contents of paper patterns, uses of paper patterns.
- 10. Study of various Tools used in Garment construction Measuring, Marking, embroidery, cutting, pressing, general tools.
- 11. To get the Knowledge and operation of CAD package for pattern making/digitizing/grading/ marker making
- 12. Study and prepare Body measurements charts and Direct and standard system of measurement.
- 13. Study and collect different woven fabrics, blended fabrics, and knitted fabrics used in garments and their use in garments.
- 14. Study about different collar types Peter pan, cape, mandarin, shirt, scalloped, sailor & rippled collar.
- 15. Study about Introduction to grading, grading principles, methods of grading, grading machine.
 - Darts

- Waist bands
- Pockets

- Placket slit and seam
- Neckline finish
- Sleeve attachments

TE-614: TECHNICAL SEMINAR

Teac	ching Sc	heme	Credits		Marks		Duration of End
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
0	0	2	1	50	50	100	3 Hrs

Teaching and Examination Scheme

Topic

In the beginning of the semester, every student of the class will be assigned a seminar topic in the emerging / perspective field in the area of textiles such as Spinning, Weaving, Fibres, Testing, Chemical processing and alike. Seminar should be based on the literature survey on any topic of textiles.

Seminar Preparation and Presentation

Student will collect the information on the above subjects and submit the report on the dates specified by the concerned faculty. The seminar report will be of minimum 15 pages and maximum 25 pages. The spacing between the lines will be 1.5. The font size will be 12 point Times New Roman. The list of reference must be given at the end of seminar report. The list of reference should be written as per the Textile Research Journal format. The student has to present seminar in front of the faculty member of the department and his/her classmates. The faculty member, based on the quality of the work and preparation and understanding of the candidate, shall do an assessment of the seminar internally.

H.P. Technical University Hamirpur - 177001

SEMESTER-VII

TE – 701: KNITTING TECHNOLOGY

Teaching and Examination Scheme

Teac	ching Sc	heme	Credits		Marks		Duration of End
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
2	2	0	3	40	60	100	3 Hrs

COURSE OBJECTIVE:

To provide thorough knowledge of the mechanism involved in warp, weft and flat knitting machines and to provide exposure to the latest developments in knitted fabric structure manufactured in advanced knitting machines

UNIT	CONTENT	No. of
		Hrs.
Ι	Fundamentals of Knitting: Process, comparison of weaving and knitting, warp	9
	and weft knitting, classification of weft knitting machines. Yam quality	
	requirements for weft knitting. Mechanical elements of weft knitting-needles, and	
	their types, sinkers, cams, cylinder, feeder and take-up, their function and	
	operation, knitting cycle and yarn path.	
	Structural Elements of Weft Knitting: Needle loop, sinker loop, technical face,	
	technical back., open loop, closed loop, knit stitch, tuck stitch, purl stitch, miss	
	stitch, course, wale, stitch density and loop length.	
II	Weft Knitted Structures: Basic weft knitting machines- single jersey, rib, purl and	8
	interlock, their structures, machine construction, fabric characteristics, use and	
	derivatives, notations and needle gaiting.	
	Flat Knitting Machines: Process of loop formation, cam track, features, and	
	structures produced.	
III	Patterning in weft knitting: Devices for patterning in weft knitting, Electronic	8
	needle selection. Science of Knitting: Concept of loop length, knitting tension,	
	spirality, fabric faults in weft knitting.	
	Weft knitted geometry and calculations: Weft knitted fabric geometry,	
	dimensional states and dimensional parameters such as stitch length, WPI, CPI,	
	stitch density, GSM, Tightness Factor etc., Production calculation in weft knitting,	
	calculation of optimum knitting conditions.	
IV	Warp Knitting: Introduction, classification of warp knitting, Patterning in warp	9

Dean H.P. Technical University Hamirpur - 177001

knitting, tricot and raschel machines description, stitches in warp knitting, and structures in warp knitting. Yarn preparation for warp knitting, let off and take up in warp knitting.
Warp Knit fabric geometry: study of dimensional parameters such as stitch length, WP1, CPI, rack, run in, quality, areal density and structural ratio. Production calculation in warp knitting. Latest developments: Knitting machines, other structures in knitting, blanket manufacturing.

TE – 702: TECHNICAL TEXTILE

Teaching and Examination Scheme

Teac	hing Sc	heme	Credits		Duration of End		
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
3	0	0	3	40	60	100	3 Hrs

COURSE OBJECTIVE:

To provide an overview on the concept, and various sectors of technical textiles and to impart knowledge of manufacturing of technical textiles and their properties.

UNIT	CONTENT	No. of
		Hrs.
Ι	Introduction: Definition and scope for technical textiles, brief idea about technical	8
	fibres, role of yarn and fabric construction, composite material.	
	Filtration textiles: Definition of filtration parameters, theory of dust collection and	
	solid liquid separation, filtration requirements, concept of pore size and particle	
	size, role of fiber, fabric construction and finishing treatments.	
II	Geotextiles: Brief idea about geosynthetics and their uses, essential properties of	9
	geotextiles, geotextile testing and evaluation, application examples of geotextiles.	
	Medical textiles: Classification and fibres used – requirements. Detailed study and	
	application of textiles in: implantable - non-implantable - extracorporeal devices.	
III	Protective Clothing: Brief idea about different type of protective clothing,	8
	Waterproof fabrics – breathable fabrics – Fire protection – Heat and cold protection	
	- Ballistic protective clothing - Camouflage textiles - NBC protection	
	Sports and recreation textiles: Functional requirement of different type of	
	product and their construction	
IV	Automotive textiles: Brief idea about the important properties and requirements in	9
	automotive textiles, Tyre cord design – Manufacturing techniques. Airbags:	
	materials and properties – Manufacturing techniques – Seat belts and fabrics – liner	
	fabrics.	
	Other uses of technical textile: Textiles in agriculture, electronics, power	
	transmission belting, hoses, canvas covers and tarpaulins.

Teac	Feaching SchemeCreditsMarks			eaching Scheme Credits				Marks		Duration of End
L	Т	P/D	С	Sessional	End Semester	Total	Semester			
					Exam		Examination			
	1									

Teaching and Examination Scheme

COURSE OBJECTIVE:

To impart knowledge on the fundamental principles of management as applied to the textile industry and to educate the students on the interaction of government and society with the textile industry and its effect and their management.

UNIT	CONTENT	No. of
		Hrs.
Ι	Location and Layout: Plant location and site selection, Factors affecting location,	8
	Plant layout, Different types of layouts, Layout plan for spinning, weaving and	
	process house.	
II	Air conditioning and humidification: Humidification systems used in Textile	9
	Mills, Developments in humidification systems, Heat load, Calculations of total	
	heat, air circulation required.	
	Machine Balancing: Calculation for different machines required for carded and	
	combed yarns, weaving, preparatory and chemical processing	L
III	Costing: Elements of cost, Cost sheet, costing the products, conversion cost, cost	8
	reduction techniques, impact of end breaks in ring spinning on productivity and	
	cost.	
	Power consumption : Energy consumption in textile machines, Measures to reduce	
	power consumption.	
IV	Working environment: Measures of good working environment, Different types	9
	of noise and remedial measures to minimize noise of different departments, terms	
	related to lighting, illumination level required for different departments, lighting	
	plan for different departments, Material handling equipments, Classification of	
	material handling equipment, work load, work assignment.	
	Maintenance Management: Maintenance systems, Maintenance cost,	
	Maintenance schedules, Maintenance scheduling, Down time management,	
	Accidents and safety engineering, Fire prevention and protection

TE – 704: STATISTICS AND QUALITY CONTROL FOR TEXTILE INDUSTRY

Teac	Teaching Scheme		Credits		Marks		
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
3	2	0	4	40	60	100	3 Hrs

Teaching and Examination Scheme

COURSE OBJECTIVE:

To enable the students to understand about total quality management, different TQM tools, techniques, Quality standards and to solve any problem of real situation probabilistically and able to classify the problem into continuous and discrete.

UNIT	CONTENT	No. of
		Hrs.
Ι	Quality Management: Definition of quality and its importance, different	9
	approaches to quality, Description of Deming's fourteen points and Ishikawa's	
	seven tools of quality, utility of statistical method for quality control and	
	improvement, concept of Total Quality Management (TQM), ISO 9000 Standards,	
	Quality Function Deployment (QFD) and Quality Costs.	
	Basic Approaches to Quality Control: Definition of quality control, tools of	
	quality control: flow chart, brain storming, fish bone diagram, check sheets, bar	
	graph, charts, Pareto analysis, histogram, scatter diagram	
II	Statistical Quality Control: Statistics as basis of quality control, variation as basis	9
	of statistical quality control, Population and sample, descriptive and inductive	
	statistics, discrete and continuous variables, collection and classification of data,	
	frequency distributions, measures of central tendency, measures of dispersion,	
	random variables and probability distribution.	
III	Statistical Analysis for Continuous Function: Population and sampling	9
	distribution of mean, statistical estimation theory, point's estimates, concept of	
	single tail and double tail test, Student's t distribution, confidence limit, tests of	
	hypotheses and significances, type I and type II errors, difference between two	
	sample means. Test for single variance, Chi-square test, F distribution, test for the	
	difference between two variances, confidence limits for variance and ratio of two	
	variances, choice of sample size.	
	Statistical Analysis for Discrete Function: Application of binomial and Poisson's	
	distribution, normal approximation, test for a single proportion and difference	
	between two proportions, application of chi-square distribution, contingency table.	

Dean H.P. Technical University Hamirpur - 177001

	Subjective Tests: Rank correlation, tied rank, coefficient of concordance.						
IV	Acceptance Sampling: Basic idea about acceptance sampling, OC curve,	9					
	producer's risk and customer's risk. Control Charts: Advantages using quality						
	control charts, random and assignable causes, and action and warning limits, X, R,						
	p, n p and c chart, Process Capability Ratio (CP and CPK), concept of 6 sigma						
	process control, brief idea about CUSUM and EWMA chart.						
	Anova and regression: Some basic concepts of analysis of variance, method of						
	least squares, linear regression methodology, correlation and standard error.

					Exam		Examination

Teaching and Examination Scheme

COURSE OBJECTIVE:

To enable the students to understand about quality management in Apparel Manufacture, different levels of inspection and the importance of national and international standards.

UNIT	CONTENT	No. of
		Hrs.
Ι	Quality Specifications and Standards in Raw Materials: Purchasing	8
	specifications- Testing and Inspection of raw materials-fabric-fabric inspection	
	system-sewing threads-Zippers-Buttons-Interlining.	
	Quality Control in Spreading, Cutting and Bundling Products: Spreading	
	properties. Properties of fabrics- Plaids and naps- Tension in Spreading fabrics-	
	Quality factors in cutting and drill- Bundling and ticketing as related to quality.	
II	Stitch and Seam Quality Measurement: Stitch size- Stitch tension-Seam	8
	elasticity and elongation- Fabric distortions - Seam size- Seam slippage and Seam	
	strength Fabric Sewability- Principles for selecting proper stitch and seam types.	
	Quality Factors in Sewing: Control of sewing, seaming and assembly defects-In	
	process inspection in sewing.	
III	Quality Control in Pressing and Packing: Quality requirement for pressing	9
	operation- Quality control in functional package for apparel- Merchandise package-	
	Stock storage shipping package.	
	Statistical Sampling: Acceptable Sampling- Acceptable Quality level (AQL) -	
	Single sampling- Double Sampling. Care Labelling of Apparel: American Care	
	labelling System-British Care Labelling System- International Care Labelling	
	System- Canadian Care Labelling System- Japanese Care labelling System -	
	Symbols and meanings.	-
IV	Quality Control Tools for Apparel Manufacture: Flowcharts - Control charts-	9
	Cause and Effect diagrams-Pareto charts- Check sheets and scatter diagram.	

Dean H.P. Technical University Hamirpur - 177001

Quality Control Of Finished Garments: Visual inspection and definition of	
defects and tolerance- Method of measuring. Quality Management in Garment	
Industry: ISO series of standards- Introduction to TQM-Concepts of TQM Kaizen –	
Bench marking techniques

TE – 706: FUNCTIONAL FINISHES

Teac	hing Sc	heme	Credits		Marks		
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
3	0	0	3	40	60	100	3 Hrs

Teaching and Examination Scheme

COURSE OBJECTIVE:

To impart knowledge about the different finishing treatment need to be given to textile materials and methods of application of those finishing treatment along with their merits and demerits.

UNIT	CONTENT	No. of
		Hrs.
I	Introduction: Chemical and mechanical finishing. Challenges and importance of chemical finishing. Application of chemical finishes. Softening Finishes: Mechanisms of the softening effect. Types of Softeners. Compatibility and combinability of softeners. Evaluation and testing methods. Troubleshooting for softening finishes.	8
	Hand Building Finishes: The hand building effect, Textiles with hand building finishes. Evaluation methods. Trouble shooting for hand building finishes. Repellent finishes: Mechanisms of repellency, Repellent chemistry, Evaluation of textiles treated with repellent Finishes, Troubleshooting for repellent finishes	
Π	 Easy care finish: Mechanisms of easy-care and durable press Finishing, Chemistry of easy-care and durable press finishes, Evaluation methods. Non-Slip Finishes: Mechanisms of non-slip finishes. Application methods and combinability. Evaluation, Trouble shooting for non-slip finishes. Elastomeric Finishes: Introduction. Mechanism of elastomeric effect. Evaluation. 	9
	Trouble shooting for elastomeric finishes. Anti-Pilling Finishes: Pilling mechanism, chemistry of anti-pilling finishes, Evaluation of anti-pilling finishes	
III	Flame-retardant finishes: Mechanisms of flame retardancy, Flame-retardant chemistry, flame retardants for various fibres. Anti-static finish: Mechanisms of antistatic finishes, Chemistry of antistatic finishes, Evaluation of antistatic finishes	9
	Ultraviolet Protection Finishes: Mechanism of UV protection. Evaluation. Trouble shooting for UV protection finishes, Antimicrobial Finishes: Properties of an effective antimicrobial finish. Mechanisms of antimicrobial finishes. Evaluation. Trouble shooting for antimicrobial finishes	

Dean H.P. Technical University Hamirpur - 177001

IV	Novel Finishing techniques: enzymatic finishes, plasma finishes, nano-finishing, microencapsulation.	8
	Novel finishes Anti-odour and fragrance finishes. Mosquito repellent finish, self- cleaning finish

TE – 707: PROCESSING OF MAN MADE FIBRES AND BLENDED TEXTILES

Teaching Scheme			Credits	Marks			Duration of End
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
3	0	0	3	40	60	100	3 Hrs

Teaching and Examination Scheme

COURSE OBJECTIVE:

To teach the principles, processes and technologies employed for the chemical processing of manmade fibre, yarns and their blends.

UNIT	CONTENT	No. of
		Hrs.
Ι	Introduction: Structural study of man-made and their blends Stability of man-	8
	made fibres against chemical treatment. Classification of blends: Objectives of	
	blending. Classification, compatibility of components in a blend.	
II	Pretreatment of manmade and blends : Pretreatment of polyester, nylon, acrylic,	9
	acetate fibres and their blends, viz. singeing, desizing, scouring, bleaching,	
	mercerizing and heat setting. Dyeing of man-made: Dye-fibre attachment. Role of	
	fibre structure in dyeing of man mades. Dyeing of polyester in HTHP machines,	
	carrier dyeing, thermosol dyeing. Mechanism of carrier action. Dyeing of nylon	
	with acid, metal complex, disperse, reactive and direct dyes. Dyeing of acrylic with	
	disperse, acid and cationic dyes. Dyeing of differentially dye able man mades.	
	Dyeing of blends: Characterization of fibre, blends, dyeing of primary, binary and	
	ternary blends, viz. A, B, D, A-B, A-D, D-B and A-D-B.	
III	Blend dyeing methods: Single bath single step, single bath two step and two bath	9
	two step methods to produce different shades. Blend dyeing shades: Reserve,	
	cross, shadow and solid shades. Possibilities of producing various shades on a	
	specific blend.	
	Drinting of mon-mode and blands , Direct projet and discharge styles of minipage	
	Printing of man-made and blends : Direct, resist and discharge styles of printing	
	of polyester and its blends. Fightent printing. Carbonized prints. Transfer printing	
117	Finishing of mon-modes and blands: Machanical finishing of mon-mode. Ontical	0
1 V	whitening on that mades and durable press finishes. Soil release, water repailant and	ð
	flame retardant finishes on man made and blands. Anti-static finish	
	name retargant ministres on man-made and biends. And-static ministr.	
	Finishing of terry-woolen textiles: Crabbing, blowing, cropping, anti-felting,

TE – 708: FASHION ART AND DESIGN

Teaching Scheme			Credits	Marks			Duration of End
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					E		Examination
					Exam		Examination

Teaching and Examination Scheme

COURSE OBJECTIVE:

To impart knowledge on colour theory, principles of fashion, human body measurements, creating pattern, fashion presentation, and to develop commercial pattern with design aspect by manipulating the basic pattern.

UNIT	CONTENT	No. of
		Hrs.
Ι	Introduction to Fashion, Fashion origin and evolution, Elements of Design -	8
	Lines, Dots, Shapes, form, Shape, size, texture, color, Prints, Color - meaning of	1
	color and its significance and uses, visible color spectrum, Hue, value, intensity,	1
	saturation, color theory – primary, secondary, complimentary, Compound colors.	1
	Principles of fashion, Fashion cycle and differentiation on the basis of length of	1
	fashion cycle. Fashion theories- trickle down, trickle across and bottom up theory,	1
	Factors affecting fashion, Fashion Inspiration, Levels of Fashion Acceptance-	1
	Fashion leader, fashion role model, fashion follower, Fashion victims.	1
II	Anatomy for designers: Human Proportion and figure construction. Methods of	9
	determining individual proportions.	1
		l I
	Apparel construction: elementary idea of conversion of fabrics to garments.	l
	Drafting and pattern making of basic body blocks. Structural and decorative dress	l
	designing, creating varieties through designs.	I
	Psychology of Clothes: First impression, role of socio- psychological and	l
	economical aspects	1
III	Fashion communication: An in-depth understanding of promotional activities,	9
	corporate journalism and publications, events planning, international public	l
	relations, communication plans. Understanding of web and multimedia design,	l
	computer graphics, illustration, product design, exhibition design, visualizing and	l
	art direction, typography and photography as communication tools.	1
	Styling and its introduction, Introduction to Fashion Journalism, Display and	l
	Exhibit design, and Fashion Communicative devices in commercial publicity: letter	1
	styles, designs, pictorial presentation, slogans, colour variations	1

Dean H.P. Technical University Hamirpur - 177001

IV	Fashion Presentation: Definition and basic elements in a mood board, Basic	8
	information needed in Client boards, ways to identify customer and their needs,	
	Forecasting and Trend analysis, Color forecasting (pantone, etc) and use of fashion	
	websites (WGSN, style sight, Trend stop, mud pie, etc.), Collage and its creation,	
	Swatch cutting and preparing fabric for presentation, Fashion show, Basic	
	preparation of Fashion show – sound, light, models, ramp, choreographer, buyer	
	invites, hair & make-up, accessories, publicity/advertisement and invite design.

TE – 709: TEXTURED YARN TECHNOLOGY

Teaching Scheme		Credits		Marks		Duration of End	
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
3	0	0	3	40	60	100	3 Hrs

Teaching and Examination Scheme

COURSE OBJECTIVE:

To impart knowledge on the science and technology of texturing, characteristics of raw materials and techniques and parameters required for formation of textured yarn and to familiarize with the applications of textured yarns and fabrics.

UNIT	CONTENT	No. of
		Hrs.
Ι	Basics of Texturization: Purpose - Need for bulking of synthetic fibres -Types of	8
	texturized yarns - Classification of process - Comparison of texturised and	
	untexturised yarns and fabrics –Application of texturised yarns - Role of spin finish	
	on texturised yarns High speed spinning of synthetics fibre forming polymers,	
	advantage and disadvantages of HSS, high speed spinning speeds, structure	
	development during high speed spinning.	
II	Dimensional Stability : Heat setting – need-factors involved – types -mechanism –	9
	effects on fibre morphology and mechanical properties - fundamentals of thermo-	
	mechanical texturing – Helanca process.	
	Texturization Techniques: Draw Texturising-Advantages - Simultaneous and	
	sequence draw texturising - Working principles and machines, False Twist	
	Texturising-Principle - Single heater and double heater - False twist texturising	
	machines. Twisting elements - Factors influencing Twist - Properties of Textured	
	yarn - Effect of feed material and process variables	
III	Air Jet Texturization: Basics of air jet texturing – types of yarns produced –	9
	process variables -over feed, air pressure temperature and water content. Nozzles,	
	evaluation of textured yarn - Measurement of shrinkage force - Crimp contraction	
	and dye uniformity - Texturamat - M.Dynafil tester.	
IV	Developments in Texturization Methods: Stuffer box and edge crimping methods	8
	- principles, limitations, and applications - knit-de-knit and gear crimping	
	methods. Bi-component filament texturing - texturing of polypropylene and jute	
	fibres – Chemo-mechanical and thermo-mechanical texturing.

TE – 711: KNITTING TECHNOLOGY LABORATORY

Teac	Teaching SchemeCreditsMarks					Duration of End	
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
0	0	2	1	30	20	50	3 Hrs

Teaching and Examination Scheme

Note: Practical as per the topics in the syllabus for the course will be conducted in the laboratory class. Following is the suggested list of exercises out of which a minimum of 8-10 experiments must be performed by a student during the semester

List of Experiments

- 1. To study the path of yarn through plain knitting machine.
- 2. To study the different knitting elements including the cam system.
- 3. To study the driving mechanism of plain knitting m/c.
- 4. To study the cloth take-up mechanism of plain knitting m/c.
- 5. To study the rib knitting m/c including arrangement of dial and cylinder needles, cam system and driving mechanism.
- 6. To study the Interlock knitting m/c including arrangement of dial and cylinder needles, cam system and driving mechanism.
- 7. To study cam system of V bed rib knitting m/c.
- 8. To study driving mechanism of V bed rib knitting m/c.
- 9. Preparation of Fabric sample (rib, circular, half cardigan and full cardigan) in V-bed rib knitting machine.
- 10. To study the effect on loop length with the change in cam setting in flat knitting machine.
- 11. To study the effect of variation in yarn input tension on the loop length in V-bed rib flat knitting machine.
- 12. To study plain, rib and Interlock knitted fabrics (course per inch, wales per inch, loop length etc.)
- 13. Study of Socks and fleece knitting machine

H.P. Technical University Hamirpur - 177001

TE-712: INDUSTRIAL/PRACTICAL TRAINING

Teaching and Examination Scheme:

Tea	ching Sch	eme	Credits		Marks		Duration of End
т	т	D/D	C	Sectional	End	Total	Semester Examination
L	1	F/D	C	Sessional	Ena	Total	
					Semester		
					Exam		
0	0	0	2	50	50	100	3 hrs.

Note: Industrial training of 6 weeks duration attended after 6^{th} semester for 6 weeks during summer vacations, and evaluated in 7^{th} semester.

Dean H.P. Technical University Hamirpur - 177001

TE-713: PROJECT WORK-I

Tea	ching Sch	eme	Credits		Marks		Duration of End Semester Examination
L	Т	P/D	С	Sessional	End Semester Exam	Total	
0	0	4	2	50	50	100	3 hrs.

Teaching and Examination Scheme:

Note: Students are expected to complete a project in groups or alone as deemed fit by the faculty and department. They should work under supervision of Faculty member/s of department, or in collaboration with other departments, or preferably with Industry. The project should demonstrate application of the fundamentals learnt during the course of study and should also be innovative.

Dean H.P. Technical University Hamirpur - 177001

TE – 714: SPECIAL MODULE IN TEXTILE ENGINEERING

Teac	ching Sc	heme	Credits		Marks		Duration of End
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
2	0	0	2	30	20	50	3 Hrs

Teaching and Examination Scheme

The course aims at introducing new or highly specialized technological aspects in textile engineering. The course topic and content is likely to change with each offering depending upon the current requirement and expertise available with the department including that of the visiting professionals.

Dean H.P. Technical University Hamirpur - 177001

TE – 715: TECHNICAL SEMINAR

Teaching Scl		heme	Credits		Duration of End		
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
0	0	2	1	30	20	50	3 Hrs

Teaching and Examination Scheme

Topic

In the beginning of the semester, every student of the class will be assigned a seminar topic in the emerging / perspective field in the area of textiles such as Spinning, Weaving, Fibres, Testing, Chemical processing and alike. Seminar should be based on the literature survey on any topic of textiles.

Seminar Preparation and Presentation

Student will collect the information on the above subjects and submit the report on the dates specified by the concerned faculty. The seminar report will be of minimum 15 pages and maximum 25 pages. The spacing between the lines will be 1.5. The font size will be 12 point Times New Roman. The list of reference must be given at the end of seminar report. The list of reference should be written as per the Textile Research Journal format. The student has to present seminar in front of the faculty member of the department and his/her classmates. The faculty member, based on the quality of the work and preparation and understanding of the candidate, shall do an assessment of the seminar internally.

H.P. Technical University Hamirpur - 177001

SEMESTER-VIII

PROGRAM ELECTIVE - III

TE – 801: TEXTILE REINFORCED COMPOSITE

Teaching and Examination Scheme

Teac	hing Sc	heme	Credits		Marks		Duration of End
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
3	0	0	3	40	60	100	3 Hrs

COURSE OBJECTIVE:

To enable the students to learn about Reinforcements, matrices used for the composites, manufacturing process and application of composites

COURSE CONTENT:

UNIT	CONTENT	No. of
		Hrs.
Ι	Introduction Definition of composites, Classification of composites, Constituents-	8
	reinforcement, matrix, interface, Critical fibre length, Rule of mixtures. Application	
	of composites.	
II	Basic Constituents Materials In Composites: Types and Properties of	9
	reinforcements, Matrix Materials. Interface - mechanisms and theories. Prepregs:	
	Introduction - Manufacturing techniques - property requirements, Compaction.	
	Textile Preforms- weaving, knitting and braiding. Multi-axial multiply non-crimp	
	fabrics	
III	Techniques for Manufacture of Composites: Introduction - manufacturing	8
	processes - open mould process, closed mould process and continuous process.	
	Metal matrix composites, Ceramic matrix composites - types-importance and	
	processing.	
IV	Mechanical Properties of Textile Composites: Testing of Reinforced Plastics -	9
	Tensile, flexural, Impact, Interlaminar shear and compression properties.	
	Application of Polymer Composites: Composites application in aerospace,	
	construction industry, and sports products. Electrical, Polymer composite for	
	biomedical and vibration damping	

Text Books:

TE – 805: SMART TEXTILES

Teaching and Examination Scheme

Teaching Scheme			Credits	Marks			Duration of End
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
3	0	0	3	40	60	100	3 Hrs

COURSE OBJECTIVE:

To impart knowledge on the functional properties and applications of interactive textiles, responsive textiles and wearable electronics and to impart knowledge on the types and applications of smart textiles.

UNIT	CONTENT					
		Hrs.				
Ι	Smart technology for textiles and clothing: Introduction and overview,	9				
	Electrically active polymer materials: Polymer gel, application of non-ionic					
	polymer gel and elastomers for artificial muscles					
	Thermally sensitive textiles: Basics of Heat-storage, Thermally sensitive					
	materials, designing and manufacture of thermo-regulated textiles and clothing,					
	properties and applications					
II	Polymeric membranes: PVA and PAAc network, Polymers prepared by plasma	8				
	and radiation grafting.					
	Fiber Bragg gratings: Fabrication of grating, Mechanical properties of FBG,					
	Optical response of FBG sensors under various deformations, Applications, Smart					
	textile composites integrated with fibre optic sensors					
III	Embroidery and smart textiles: Adaptive and responsive textile structures	8				
	(ARTS), Wearable motherboard: Manufacture, Properties and Applications					
	Wearable technology: Wearable motherboard: Manufacture, Properties and					
	Applications; Wearable technology for snow clothing					
IV	Tailor-made intelligent polymers for biomedical applications: Fundamental	9				
	aspects of shape memory materials, Concept of biodegradable shape memory					
	polymers, degradable thermoplastic elastomers having shape memory properties,					
	degradable polymer networks having shape memory properties					
	Textile scaffolds in tissue engineering: Ideal scaffold system, Scaffold materials,					
	textile scaffolds - Micro structural aspects, Mechanical aspects

PROGRAM ELECTIVE - IV

TE – 806: WASTE MANAGEMENT AND POLLUTION CONTROL IN TEXTILE

Teaching Scheme		Credits		Duration of End			
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
3	0	0	3	40	60	100	3 Hrs

Teaching and Examination Scheme

COURSE OBJECTIVE:

To describe the process parameters and control measures in each stage of yarn and fabric manufacturing process to produce quality product at reduced cost of production, create the awareness to control the effluents due to wet processing and to provide knowledge in different methods of treating the effluents from wet processing.

UNIT	CONTENT	No. of
		Hrs.
Ι	Spinning waste: Its generation, classification, its re-use and management. Soft	9
	waste, hard waste. Different types of pollution in spinning industry.	
	Weaving waste: Its generation, different types, its re-use and management.	
	Different types of pollution in weaving industry. Its impact on human being	
II	Textile waste water characteristics: Chemical nature of discharged bath after	8
	each process, contribution of chemicals to the waste water load. Concept of	
	biological and chemical oxygen demand	
III	Textile waste water problem: Effect of waste-water on sewage and land.	9
	Chemical used in textile industry: Toxicity of various chemicals, viz alkalis,	
	oxidizing and reducing agents, acids, carriers, resins and bleaching agents etc. Role	
	of each chemical on waste water load.	
IV	Treatment of textile effluents: Primary, secondary and tertiary treatments in ETP.	8
	Colour removal, various chemicals used in ETP.	
	Effluent Testing: Testing of BOD, COD, TOC and interpretation of results

TE - 807: ENERGY MANAGEMENT AND CONSERVATION IN TEXTILE INDUSTRY

Teac	ching So	heme	Credits		Duration of End		
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
3	0	0	3	40	60	100	3 Hrs

Teaching and Examination Scheme

COURSE OBJECTIVE:

To make the students conversant with different sources of energy, Concept of energy management, energy conservation and energy consumption pattern in different production process in textile industry.

COURSE CONTENT:

UNIT	CONTENT	No. of
		Hrs.
Ι	Sources of Energy: Sources of Energy: hydro, thermal, wind, solar, biofuels and	8
	nuclear Limitations of Natural resources. Types of energy sources used in textile	
	industry. Unexploited energy sources and problems in their exploitation.	
	Concept of energy management - need for energy conservation- global energy	
	scenario with specific reference to India -Demand side Management (DSM).	
II	Energy consumption patterns: Present energy consumption trends, Growth and	9
	Demand pattern. Energy use in production processes – Fibre production, Spinning,	
	Weaving, Knitting, Sizing Dyeing and Finishing, Clothing Manufacture. Energy	
	use in Auxiliary Machinery – Boiler, Humidification plants, compressors.	
	Component wise consumption - Specific energy consumption (UKG). Conservation	
	of energy.	
	Energy Audit: Concept, Types of audit, Instrumentation, methodology, analysis.	
	Electrical and Thermal audit	
III	Energy Conservation: Techniques of energy saving: Energy efficient equipment	9
	for various processing machines and ancillaries, Preparatory, Spinning, Post	
	Spinning, Weaving Wet Processing - Humidification/Air conditioning, Lighting,	
	Compressors, Boilers, Generators. Different types of fuels. Economics of energy	
	conservation techniques.	
IV	Non-Conventional Energy Sources: Solar energy: Different type of collectors –	8
	Photovoltaic cell - Wind energy - Bio energy - cogeneration. Environmental impact	
	on energy. Analog - Digital - Computerized instruments Measurement techniques.	
	Maintenance of instruments. Improving the efficiency of usage of Electricity Fuel	
	and Steam. Utilization of heat exchanger

TE – 808: CLOTHING COMFORT

Teaching and Examination Scheme

Teac	hing Sc	heme	Credits	Marks			Duration of End
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
3	0	0	3	40	60	100	3 Hrs

COURSE OBJECTIVE:

To enable the students to learn about important characteristics of the fabric responsible for its comfort properties and different phenomena which take place in the fabric related to the comfort properties of the fabric.

COURSE CONTENT:

UNIT	CONTENT	No. of
		Hrs.
Ι	Comfort – types and definition; human clothing system; Psychology and comfort -	9
	perception of comfort, psychological research techniques, comfort sensory	
	descriptors, psychophysics, scales of measurement, scales to measure direct	
	responses, wear trial technique, comfort perception and preferences.	
	Thermo physiological comfort - clothing and thermal comfort; Thermal comfort -	
	thermoregulatory mechanisms of the human body, two-node model of thermal	
	regulation, dynamic thermal interaction between the body and clothing, role of	
	clothing on thermal regulations.	
II	Heat and moisture transfer – wearer's temperature regulations, effect of physical	8
	properties of fibres, behavior of different types of fabrics, dynamic heat and	
	moisture transfer in fabric, moisture exchange between fiber and air, boundary	
	conditions, method of solution, moisture sorption of wool fabrics, behavior of	
	fabrics made from different fibers.	
III	Psychological comfort - Transient temperature and moisture sensations, coolness	8
	to the touch, warmth, dampness, clamminess and moisture buffering during	
	exercise, environmental buffering; Neuro physiological comfort - basis of sensory	
	perceptions; Measurement techniques - mechanical stimuli and thermal stimuli.	
IV	Fabric tactile and mechanical properties - fabric prickliness, itchiness, stiffness,	9
	softness, smoothness, roughness, and scratchiness; Garment fit and pressure	
	comfort; predictability of clothing comfort performance - prediction of fabric hand,	
	prediction of clothing thermophysiological comfort, predictability of sensory	
	comfort, predictability of subjective preferences; application of clothing comfort	
	research.

TE – 809: GREEN PROCESSING OF TEXTILES

Teaching Scheme Credits Marks				Marks		Duration of End	
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
3	0	0	3	40	60	100	3 Hrs

Teaching and Examination Scheme

COURSE OBJECTIVE:

To teach ecology related issues connected with the Textile Industry, their consequences and the Standards applicable and to impart knowledge on the technologies that are in line with preservation of ecology in the area of textile chemical processing

COURSE CONTENT:

UNIT	CONTENT	No. of					
		Hrs.					
Ι	Eco Standards and Eco-Labels: Regulations concerning azo dyes- banned	8					
	amines, Pesticides, Heavy metals, Formaldehyde and Pentachlorophenol in textiles.						
	Global eco standards and eco-labels. Ecomark scheme of India. Criteria for an eco-						
	label based on the life cycle. Eco-Management: Concept of eco-management, eco-						
	audit, certification and labeling of ecofriendly textiles						
Ш	 Eco-Testing of Textiles: Testing of banned chemicals such as free formaldehyde, pesticides, pentachlorophenol, heavy metals, azo dyes containing aromatic amines & benzidine and halogen carriers. Principle of Instruments used – Chromatography (HPLC, GC) and Mass Spectrometry and Atomic Absorption/Emission Spectrometry. Approach To Eco-Friendly Processing: Concept of Sustainable Textiles, Fibre 	9					
	origin, Approach and Alternative methods/chemicals in Pretreatments, Eco-friendly dyes and dyeing, Eco-Friendly Finishing – formaldehyde free finishing, Halogen free FR finish. Comfort and Hygiene Finishing using natural agents like Neem						
	Aloe vera – Chitosan for anti-microbial finishing						
III	Advanced Processing Techniques: Principle and advantages of dry processing. Plasma treatment – principle, plasma as a source of reducing the effluent and energy consumption, as a source of enhancing the dyeing properties, as a source of finishing of textiles in eco-friendly manner. Super critical carbon dioxide processing of textiles, Surface modification by VUV irradiation – VUV lamp, Laser modification, Dielectric Barrier Discharge, and Corona. Electrochemical reduction - Ultrasonic dyeing. Concept of low level application of chemicals	9					
IV	Enzymatic Processing of Textiles: Enzyme treatments: Enzymes in preparatory	8					

Dean H.P. Technical University Hamirpur - 177001

processes - desizing, scouring, bleaching – Amylase, pectinase, protease, catalase, lipase etc. Enzymes used as discharging agents in printing – Laccase, Enzymes used in finishing – Bio finishing by cellulase. Enzymes for surface modification of natural and synthetic fibres

Text Books:

TE – 810: FINANCIAL MANAGEMENT IN TEXTILE INDUSTRY

Teac	ching Sc	heme	Credits	Marks			Duration of End
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
-		0			10	100	0.77

Teaching and Examination Scheme

COURSE OBJECTIVE:

To enable the students understand basics of financial management that is required for the textile industry and to learn about sources of capital, cost of capital and capital budgeting.

COURSE CONTENT:

UNIT	CONTENT	No. of
		Hrs.
Ι	Introduction to Financial Management: Definition – Nature & Scope-Finance	9
	Functions – Goals of Financial Management - Financial Manager's Role.	
	Elements of Costs: The cost of material, labor, overhead and waste in relation to	
	textile production and finishing. Mill Organization in conjunction with the costing	
	systems: Production Management	
II	Cost of Capital	8
	Concept of cost of capital- Determining Component Cost of Capital- Specific Cost	
	of Capital- Overall cost of capital – Capital Structure- Designing Capital Structure	
III	Working Capital Management	8
	Principles and Concepts- Determinants - Operating Cycle - Cash Management-	
	Short Term finance- Inventory Management- Receivable Management	
IV	Long Term Sources of Finance: Long term finance: Shares, debentures and -term	9
	loans, lease, hire purchase, venture capital financing, Private Equity- Trade Credit-	
	Bank Finance- Commercial Paper	

Text Books:

1. M.Y. Khan and P.K.Jain "*Financial management, Text, Problems and cases*" Tata McGraw Hill, 5th edition, 2008.

2. I. M. Pandey "Financial Management", Vikas Publishing House Pvt. Ltd., 8th edition, 2007.

- 1. James C. Van Horne "Financial Management & Policy" Prentice Hall of India, .2009

- 3. Prasanna Chandra "*Fundamentals of Financial Management*" Tata McGraw- Hill 2009.
- 4. Khan Jain "*Financial Management*" Tata McGraw- Hill 2009.
- 5. Periyaswamy, Financial Management, Tata McGraw-Hill 2009

H.P. Technical University Hamirpur - 177001

TE – 811: PROJECT WORK – II

Teaching and Examination Scheme

Teac	hing Sc	heme	Credits	Marks			Duration of End
L	Т	P/D	С	Sessional	End Semester	Total	Semester
					Exam		Examination
0	0	16	8	50	50	100	3 Hrs

COURSE OBJECTIVE:

To enable the students understand basics of financial management that is required for the textile industry and to learn about sources of capital, cost of capital and capital budgeting.

The project involves the following:

> Preparing a project - brief proposal including

- Problem Identification
- A statement of system / process specifications proposed to be developed (Block Diagram / Concept tree)
- List of possible solutions including alternatives and constraints
- Cost benefit analysis
- Time Line of activities
- A report highlighting the design finalization [based on functional requirements & standards (if any)]
- ➤ A presentation including the following:
 - Implementation Phase (Hardware / Software / both)
 - Testing & Validation of the developed system
 - Learning in the Project

Consolidated report preparation

Project Report: Project report should be of 60 to 70 pages.

For standardization of the project reports the following format should be strictly followed.

Project report contents:

- i. Title Sheet
- ii. Certificate
- iii. Acknowledgement
- iv. Index
- v. Abstract
- vi. Introduction
- vii. Literature survey
- viii. Plan of Work.

H.P. Technical University Hamirpur - 177001

- ix. Results and Discussion
- x. Conclusions
- xi. References
- xii. Annexures, etc if any.

The references should be given in the following standard format:

- For Books: "Authors", "Title of Book";; Publisher; Year of the Edition;
- For Papers: "Authors", "Title of Paper"; "Name of journal", "Year", "Issue No," Page No".

Project report format:

- i. Page size : Trimmed A4
- ii. Left Margin 1.5"
- iii. Right Margin 1"
- iv. Top Margin 1"
- v. Bottom Margin 1"
- vi. Para Text : Times new roman 12 fonts

vii. Title:16 bold

- viii. Sub title: 14 Bold
- ix. Line Spacing : 1.5 Lines
- x. Page Numbers: Right aligned at footer.
- xi. The text should be justified.

Dean H.P. Technical University Hamirpur - 177001

TE-812: INDUSTRIAL PROJECT

Teaching Scheme			Credits	Marks			Duration of End
							Semester Examination
\mathbf{L}	Т	P/D	С	Sessional	End	Total	
					Semester		
					Exam		
0	0	16	8	50	50	100	3 hrs.

Teaching and Examination Scheme:

Note: Industrial Project of Four months duration is to be carried out by the student in industry_under the joint supervision of faculty advisers from institution as well as from the industry

Suggested List of projects:

1. Any productive project involving application of engineering fundamentals to solve problems encountered by human kind, in collaboration with industry, R&D institutes, institutes of international/national/state importance as deemed fit by the faculty members/concerned supervisor.

Dean H.P. Technical University Hamirpur - 177001
