

# HIMACHAL PRADESH TECHNICAL UNIVERSITY HAMIRPUR

## Syllabus and Examination Scheme

*for*

### **M.Tech. (CSE)**

As per National Education policy (NEP)- 2020  
(w.e.f. the Academic Year 2023-2024)

## 1. Preamble

M.Tech (CSE) program is named as Master of Technology in Computer Science and Engineering. The syllabus for this program is framed under Choice Based Credit System (CBCS) with core, elective (discipline specific and value added) and other interdisciplinary courses incorporated as its components following the University Grants Commission (UGC) guidelines. Department of Computer Science also made an attempt to revise the curriculum of M.Tech (CSE) in alignment with National Education Policy-2020 and UGC Quality Mandate for Higher Education Institutions-2021. With NEP-2020 in background, the revised curricula articulate the spirit of the policy by emphasizing on integrated approach to learning; innovative pedagogies and assessment strategies; multidisciplinary and cross-disciplinary education; creative and critical thinking; ethical and Constitutional values through value-based courses. The CBCS also enables the students to select subjects as per their interest. Also, diverse lab experiments as well as field visits/demonstrations allow students to understand the fundamental aspects of the subject. This program is relevant to young students/ professionals who are looking to develop their analytical and research skills regarding important issues in computer science. Furthermore, continuous assessment is an integral part of the CBCS, which will facilitate systematic and thorough learning towards better understanding of the subject.

## 2. Program Objectives (POs)

Apply the knowledge of mathematics and computing fundamentals to various real-life applications for any given requirement. Design and develop applications to analyse and solve all computer science related problems. This is accomplished through the following learning goals and objectives:

- **Knowledge of mathematics and computing fundamentals.** Apply the knowledge of mathematics and computing fundamentals to various real-life applications for any given requirement.
- **Design and develop applications.** Design and develop applications to analyse and solve all computer science related problems.
- **Effective Communication.** Students will use various forms of business communication, supported by effective use of appropriate technology, logical reasoning, and articulation of ideas. Graduates are expected to develop effective oral and written communication especially in business applications, with the use of appropriate technology (business presentations, digital communication, social network platforms and so on).
- **Leadership and Teamwork.** Students will acquire skills to demonstrate leadership roles at various levels of the organization and leading teams. Graduates are expected to collaborate and lead teams across organizational boundaries and demonstrate leadership qualities, maximize the usage of diverse skills of team members in the related context.

Dean - Academic  
H.P.T. University  
H.P.T. University  
H.P.T. University  
H.P.T. University  
H.P.T. University

- **Global Exposure and Cross-Cultural Understanding.** Graduate will be able to demonstrate a global outlook with the ability to identify aspects of the global business and Cross -Cultural Understanding.
- **Integrate and apply efficient tools.** Integrate and apply efficiently the contemporary IT tools to all computer applications.
- **Designing innovative methodologies.** Create and design innovative methodologies to solve complex problems for the betterment of society.
- **Applying inherent skills.** Apply the inherent skills with absolute focus to function as a successful entrepreneur.
- **Social Responsiveness and Ethics.** Students will demonstrate responsiveness to contextual social issues/ problems and exploring solutions, understanding ethics, and resolving ethical dilemmas. Demonstrate awareness of ethical issues and can distinguish ethical and unethical behaviour.

### 3. Program Learning Outcomes (PLOs)

The main outcomes of the CSE (M.Tech.) program are given here. At the end of the program a student is expected to have:

- An understanding of the theoretical foundations and the limits of computing.
- An ability to adapt existing models, techniques, algorithms, data structures, etc. for efficiently solving problems.
- An ability to design, develop and evaluate new computer-based systems for novel applications which meet the desired needs of industry and society.
- Understanding and ability to use advanced computing techniques and tools.
- An ability to undertake original research at the cutting edge of computer science & its related areas.
- An ability to function effectively individually or as a part of a team to accomplish a stated goal.
- An understanding of professional and ethical responsibility.
- An ability to communicate effectively with a wide range of audience.
- An ability to learn independently and engage in lifelong learning.
- An understanding of the impact of IT related solutions in an economic, social and environment context.

### 4. Curriculum Structure

M.Tech degree, two years PG programme will have a curriculum with Syllabi consisting of following type of courses:

- **Core Course:** A course, which should compulsorily be studied by a candidate as a core requirement is termed as a Core course.
- **Discipline Specific Elective (DSE) Course:** Elective courses may be offered by the main

Dean, Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

discipline/subject of the study is referred to as Discipline Specific Elective.

- **Value addition, Skill Enhancement & Inter Departmental Elective Course:** Generally, a course which can be chosen from a pool of courses and which may be very specific or specialized or advanced or supportive to the discipline/interdepartmental subject of study or which provides an extended scope or which enables an exposure to some other discipline/subject/domain or nurtures the candidate's values/proficiency/skill is called an Elective Course. These courses are value-based and/or skill-based and are aimed at providing hands-on-training, competencies, skills and to improve the employability skills of students.

## 5. SCHEME OF EXAMINATION

The pass percentage in each subject will be 40%.

- **Theory Examination**

Irrespective of credits, each paper will be of 100 marks (60 marks for theory exam and 40 marks for internal assessment) and duration of paper will be 3 hours.

- **Practical Examination**

Each paper will be of 100 marks (60 marks for external practical exam and 40 marks for internal assessment) and duration of paper will be 3 hours.

- **Project Report / Dissertation**

The project / Dissertation will be evaluated by the internal panel approved by Principal cum Director of the college and external examiner from the panel approved by the university authority/evaluation branch, HPTU, Hamirpur. The Head of the Department will assign a guide/supervisor, to each candidate for his/her project /Dissertation work. The candidate shall be required to maintain his/her project diary (logbook) of work in the organization or under the Guide. Each student will be required to give at least two seminars on his/her project work/ Dissertation work. Each student is required to submit three copies of his/her project reports in the Department after completion of the project work which will be evaluated by external examiner. Most of the students are expected to work on a real-life project / Research preferably in some industry/ Research and Development Laboratories/Educational Institution/Software Company. The student can formulate a project problem / Research problem with the help of her/his Guide and submit the project proposal / Research proposal of the same in the college within 10 days at the starting of Major Project. Approval of the project proposal is mandatory which will be evaluated by internal examiner appointed by respective college Principal or Director or university. If approved, the student can commence working on it and complete it by using the latest versions of the software packages / Research Tools for the development of the project / Dissertation. The format for synopsis to be submitted in the third semester and the final thesis dissertation format is attached in Annexure-I and Annexure-II.

Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

- **Instructions for paper setter**

In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted. The question paper for the end semester examination may have any one of the following patterns:

**Section A (UNIT I)** Two questions of long answer type of which one is to be attempted for 12 Marks.

**Section B (UNIT II)** Two questions of long answer type of which one is to be attempted for 12 Marks.

**Section C (UNIT III)** Two questions of long answer type of which one is to be attempted for 12 Marks.

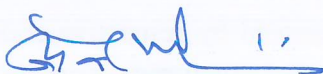

**Section D (UNIT IV)** Two questions of long answer type of which one is to be attempted for 12 Marks.

**Section E (Compulsory)** 6 to 8 short answer type questions for 2 to 1.5 marks each and total for 12 Marks.

Total marks (A + B + C + D + E) 12+ 12 + 12 +12+12 = 60 marks

### **End Semester Examination (ESE)**

For theory course, the question paper for the final examination will consist of five sections- A, B, C, D & E. Sections A, B, C, D will have two questions each from the corresponding units I, II, III & IV of the syllabus. Section E will be compulsory and will have short answer type questions covering the whole syllabus. Each question will be of 12 or 8,4 or 6,6 marks. The candidates will attempt five questions in all, i.e. one question each from the sections A, B, C, D, and the compulsory question from section E. The question paper is expected to contain problems with a minimum weightage of 25% of the total marks from each unit.

### Periodical Examination (PE)

During one semester, there will be two periodical examinations for theory and practical subjects. The question paper will consist of three sections A, B and C having total 20 marks. Section A will be compulsory and will have short answer type questions consisting of five parts, each of one mark covering the syllabus mentioned. Sections B and C will contain descriptive type questions of five and ten marks respectively. Sections B and C will have two questions and the candidates will attempt three questions in all, i.e. one question each from the sections B and C. Section-A is compulsory.

## 6. Purposed Subject Code System

Each subject code is denoted by alpha-numerals, alphabets before hyphen indicates course name and four numerals after hyphen indicates level, semester, and subject number respectively.

- For Example: CSE-6201
- First three alphabets “CSE” is degree indicator.
- First number “6” defines the Level 6 for level 6 subjects.
- Second number “2” defines the semester.
- Third and fourth number are for subject number.

## 7. Assessment & Evaluation

- **IA-Internal Assessment (Theory)**

Periodical Examination (PE) -I and Periodical Examination (PE) -II = Weightage of **20**  
Marks (Average of PE-I and PE-II)

Teacher's Assessment (Assignment discussion/ presentation/Quizzes/Overall behaviour)=  
15 Marks

Attendance = 05 Marks

Sr. No.	Percentage of Lecture Attended	Marks Awarded
1	From 75% to 80%	01
2	Above 80% to 85%	02
3	Above 85% to 90%	03
4	Above 90% to 95%	04
5	Above 95%	05

- **IA-Internal Assessment (Practical)**

Periodical Examination (PE) (Written/Presentation & Viva-Voce) = **20**

Teacher's Assessment (Lab /Work Performance/Report/File Work) = **15**

Attendance = **05**

- **EA-External Assessment (Theory)**

ESE-End-Semester Examination = 60 for all courses.

**Total marks for theory evaluation = (20 + 15 + 05 + 60 =100) for all courses.**

- **External Assessment (Practical)**

  
Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

ESE-End-Semester Examination (written script, performance, External viva-voce etc.) = 60

*Total marks for practical evaluation = 20+20+60 =100*

**8. Overall General Instructions:**

Each paper will be of 100 marks (60 marks for external and 40 marks for internal) and the

  
Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

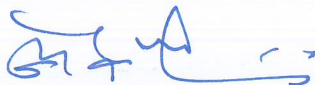

duration of paper will be 3 hours. The candidate shall be declared to have passed the examination if the candidate secures not less than 24 marks in the End Semester Examinations of each paper and secures not less than 16 marks in the Internal Assessment (IA) and overall aggregated marks is 40 in both the external and internal taken together.

- Each theory lecture per hour will be considered as one credit and two practical hours as one credit. For each theory course of 04 credits, there will be 4 lecture hours of teaching per week and for each theory course of 02 credits, there will be 2 lecture hours of teaching per week. For each practical course of 02 credits, there will be 04 lecture hours of teaching per week and for practical course of 04 credits, there will be 08 lecture hours of teaching per week. For the other course categories, the lecture hours per credit would be same as those of having theory subjects.
- In each semester, the students are required to perform at least ten experiments out of the listed experiments.
- For Seminar, Industrial Training, Research Project, Summer Internship, Survey, SWAYAM, MOOC, NPTEL; the internal and external assessment shall be same as that of theory/practical courses i.e., 100 (60 % ESE & 40 % IA) marks.
- The distribution of internal & external assessment for Project work, Seminar and other course categories will be same as that of Core Compulsory course/Discipline Specific Courses and also as per the format mentioned above. (Read all the instructions mentioned in each course content semester-wise)
- Teaching hours per semester for each 04-credit theory course will be minimum 60 hours and of 02 credit theory course will be minimum 30 hours.
- For Research project, Seminar/SWAYAM/MOOC/NPTEL/Industrial Internship/Survey, the time frame for the duration of classes, examination, format for writing the report and evaluation system will be as per the format given as well as may be decided by the Department/University itself or organizing/host/collaborative institutions time to time after the approval from BoS.
- On the basis of the interest/availability of the students from other departments, any other relevant course for the Inter-departmental Courses (ID) may be offered at the spot after the approval from Authority/Department.
- Students having the attendance below 75% in each course will not be allowed to appear in the final examination. The students having attendance lying between 70-75% may be allowed to submit the examination form and finally to appear in the examinations only after the approval from the Dean/concerned authority. Similarly, the students having attendance lying between 65-70% may be allowed to submit the examination form and finally to appear in the examinations only after the approval from the Vice-Chancellor only on the request basis.
- For Theory examinations (Internals), two examinations; Periodical Examination-I and Periodical Examination-II will be conducted and for the practicals and other course categories, only one periodical examination will be conducted-as the internal examination along with other parameters as mentioned in the instructions (mentioned above).
- Both the periodical examinations are mandatory. If, in any case, the student is not able to appear

  
Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

in any of the above examinations, then the option of Make-up Examination will be given to the student. For that, he/she has to report before that examination to the concerned teacher/head of the department. Within 3 days, he/she has to submit the documents related to the cause and finally get permission from the concerned Authority. After getting the permission, the student has to appear in the examination within 10 days with the weightage of 80% only. For example, if the student scoring 15 marks with the weightage of 100%, then he/she will be given 12 marks (80% weightage).

- Duration: One year divided into two semesters. Total duration is of 02 years (04 semesters)
- Medium of instruction: English and Passing Standard: As mentioned in the Ordinance.
- In regard to maintain the record of the answer-sheets, after the completion of one year, all the used answer-sheets of internal examinations, project reports, practical note-books etc. would be allowed to be disposed off.

# SEMESTER-I

CSE-6101 Computer Networks							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
3	1	0	4	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

### Course Objectives (COs)

- To introduce the concept, terminologies, and technologies used in modern data communication and computer networking.
- To identify importance of OSI and TCP/IP models.
- To make students to get familiarized with different protocols and network components.

<b>Unit I</b>	<b>15 Lectures</b>
<b>Data Communication:</b> Network Components, Protocol & Standards, Standard Organization, Topologies, Transmission modes, Categories of Networks, Uses, Applications. <b>The OSI Reference Model:</b> Layered architecture, Functions of layers. <b>TCP/IP reference model:</b> Comparison of OSI & TCP/IP models. <b>Physical layer:</b> Theoretical basis for data communications, Communication satellites, Public switched telephone networks, mobile telephone system, Cable television.	
<b>Unit II</b>	<b>15 Lectures</b>
<b>Data Link and Mac Layer:</b> Design issues, Framing techniques, Flow control, Error Control, Error Detecting code and Error Correcting codes, Data link Control and Protocols-- For noiseless Channel – Simplest Protocol, Stop-and Wait Protocol, For Noisy Channel-- Stop-and-Wait ARQ, Go-Back-N ARQ, and Selective-Repeat ARQ Protocol, HDLC Protocol, and PPP Protocol, Multiple Access-- Random Access-- MA, CSMA, Controlled Access.	
<b>Unit III</b>	<b>15 Lectures</b>
<b>Network Layer:</b> Network layer design issues, Addressing, Routing algorithms-shortest path routing, flooding, distance vector routing, link state routing, Congestion Control algorithms, Internetworking, Network layer in Internet – IP Address, OSPF, BGP, Mobile IP. <b>Transport Layer:</b> Concept of transport service, elements of transport protocols, Remote procedure call.	
<b>Unit IV</b>	<b>15 Lectures</b>
<b>Session Layer :</b> Design issues, Functions, Session layer Protocols. <b>Application layer:</b> services protocols & Network Security: DNS, SMTP, FTP, TELNET, HTTP, WWW. <b>5G Use Cases and System Concept:</b> Use cases and requirements, 5G system concept.	

  
 Dean - Academic  
 H.P. Technical University  
 Hamirpur - 177 001, HP

### Course Learning Outcomes (CLOs)

- Allow the student to gain expertise in some specific areas of networking such as the design and maintenance of individual networks.
- Analyze, specify and design the topological and routing strategies for an IP based networking infrastructure.
- Specify and identify deficiencies in existing protocols and then go onto formulate new and better protocols.

### Suggested Readings:

- B.A. Forouzan, "Data Communication & Networking", 4th Edition Tata Mcgraw Hill.
- A.S. Tanenbaum, "Computer Networks", Prentice Hall, 1992, 4<sup>th</sup> edition.
- William Stallings, "Data & Computer Communication", McMillan Publishing Co. Black, "Data Networks", PHI, 1988.
- Fred Halsall, "Data Communications, Computer Networks", Pearson Education.

Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

CSE-6102 Advanced Computer Architecture							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
3	1	0	4	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

#### Course Objectives (COs)

- To understand the advance hardware and software issues of computer architecture.
- To understand the multi-processor architecture & connection mechanism.
- To understand multi-processor memory management.

<b>Unit I</b>	<b>15 Lectures</b>
<b>Introduction to parallel processing:</b> Introduction, Architecture, Classification (SISD, SIMD & MIMD), Evolution of Parallel Processors, <b>Conditions of Parallelism:</b> Data and resource dependences, Data Dependency Analysis- Bernstein's Condition, Hardware and Software Parallelism.	
<b>Unit II</b>	<b>18 Lectures</b>
<b>Scalability and Performance evaluation:</b> Principles of Scalable Performance, Performance Metrics And Measures, Speedup Performance Laws: Amdahl's Law, Gustafson's Law, Scalability Analysis and Approaches, CPU Performance Evaluation. <b>Pipeline:</b> Linear and Nonlinear Pipeline Processor, Pipeline Performance, Instruction Pipeline Design, Instruction Pipeline, Mechanisms for Instruction Pipeline, Dynamic Instruction Scheduling, Branch Handling Techniques, Arithmetic Pipeline Design, Computer Arithmetic Principles.	
<b>Unit III</b>	<b>15 Lectures</b>
<b>Memory Hierarchy &amp; Organization:</b> Cache Memories, Cache Coherence and its Issues, Cache Addressing Models, Direct Mapping and Associative Caches, CISC Scalar Processors, RISC Scalar Processors, Superscalar Processors, VLIW Architectures, Hierarchical Memory Technology, Memory Capacity Planning, Virtual Memory Technology.	
<b>Unit IV</b>	<b>12 Lectures</b>
<b>System Interconnection:</b> Multiprocessor System Interconnection and Multi Computers, Network Properties and Routing, Hierarchical Bus Systems, Static Interconnection Networks, Dynamic Interconnection Networks.	

Deana Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

### Course Learning Outcomes (CLOs)

- Interpret the performance of a processor based on metrics such as execution time, cycles per instruction (CPI), Instruction count etc
- Predict the challenges of realizing different kinds of parallelism (such as instruction, data, thread, core level) and leverage them for performance advancement
- Apply the concept of memory hierarchy for efficient memory design and virtual memory to overcome the memory wall

### Suggested Readings:

- Kai Hwang, "Advanced computer architecture", 2nd Edition, Tata McGraw Hill, 2010
- Morris Manno, "Computer System Architecture", Revised 3rd Edition, Pearson Publications, 2017
- J. P. Hayes, "Computer Architecture and Organization", 3rd Edition, Tata McGraw Hills, 2017
- D. A. Patterson, J. L. Hennessy, "Computer Architecture: A quantitative approach", Morgan Kauffmann Publishers, 2011.
- Hwang and Briggs, "Computer Architecture and Parallel Processing", Mc GrawHills.
- R. W. Hockney, C. R. Jesshope, "Parallel Computer 2", 2nd Edition, Adam Hilger.

Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

CSE-6103 Software Engineering and Project Planning							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
3	1	0	4	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

#### Course Objectives (COs)

- Knowledge of basic SW engineering methods and practices, and their appropriate application.
- Understanding of the role of project management including planning, scheduling, risk management, etc.
- Understanding on quality control and how to ensure good quality software.

<b>Unit I</b>	<b>15 Lectures</b>
<b>Project Planning:</b> Characteristics of a software project, Software scope and feasibility, resources, the SPM plan. Software Process Models. <b>Software Project Estimation:</b> Size/scope estimation, Decomposition techniques. <b>Effort estimation:</b> Sizing, Function point, LOC, FP vs LOC. <b>Schedule estimation:</b> GANTT Charts, Activity networks. <b>Cost estimation: Models:</b> COCOMO I, COCOMO II.	
<b>Unit II</b>	<b>15 Lectures</b>
<b>Quality Planning:</b> Quality control, Quality assurance, Formal Technical Reviews, The SQA Plan, ISO and CMM standards. <b>Risk Management:</b> Reactive vs proactive Risk strategies, Risk projection, Risk Refinement, Risk Monitoring, Monitoring and management, RMMM plan.	
<b>Unit III</b>	<b>15 Lectures</b>
<b>Measurement and Tracking Planning:</b> Earned Value Analysis. <b>Team Management:</b> Team structures: hierarchical, Egoless, chief programmer, mixed; Team software Process; Resource leveling, Building a team: Skill sets.	
<b>Unit IV</b>	<b>15 Lectures</b>
<b>Configuration Management:</b> Baselines, Configurable items, SCM repository, SCM process, version control change control, configuration audit. <b>Project Monitoring and Control:</b> Audits and Reviews.	

#### Course Learning Outcomes (CLOs)

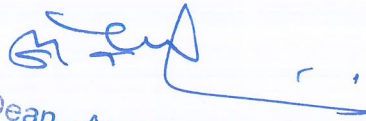

- Basic knowledge and understanding of the analysis and design of complex systems.
- Ability to apply software engineering principles and techniques.
- Ability to develop, maintain and evaluate large-scale software systems.
- To manage time, processes and resources effectively by prioritizing competing demands to achieve personal and team goals Identify and analyzes the common threats in each domain.

  
 Dean - Academic  
 H.P. Technical University  
 Hamirpur - 177 001, HP

**Suggested Readings:**

- Software Project Management, Bob Hughes and Mike Cotterill, Tata McGraw Hill 5th edition, 2009
- A practitioner's Guide to Software Engineering, Roger Pressman, Tata McGraw Hill 2014 8<sup>th</sup> edition
- Headfirst PMP: A Brain Friendly Guide To Passing The Project Management Professional Exam, 2013

Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

CSE-6104 Advanced DBMS							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
3	1	0	4	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

### Course Objectives (COs)

- The main objective of this course is to enable students to the fundamental concepts of databases and distributed database.
- To recognize the importance of database analysis and design in the implementation of any Database application and to understand the process normalization.
- It also gives the knowledge of the roles of transaction processing and concurrency control in DBMS.

<b>Unit I</b>	<b>15 Lectures</b>
<b>Database Management System:</b> Introduction, Types of Data Models, Schema, relationships, Keys Concept, RDBMS. Normalization: Functional Dependencies, various normal forms.	
<b>Unit II</b>	<b>15 Lectures</b>
<b>Introduction to Object oriented Database:</b> Introduction, Objects, Inheritance, structured and unstructured objects. Temporal Databases: Introduction, data models.	
<b>Unit III</b>	<b>15 Lectures</b>
<b>Transaction Management:</b> Transactions basic concepts, and Schedules, Serializability Concept, Concurrency Control Mechanisms- Locking protocols, Timestamp based, and optimistic approaches. Deadlocks Management in DBMS- prevention, handling and avoidance.	
<b>Unit IV</b>	<b>15 Lectures</b>
<b>Distributed databases:</b> Introduction, Distributed DBMS architectures, Need of distributed databases, Distributed query processing, Distributed concurrency control.	

### Course Learning Outcomes (CLOs)

- Apply normalization techniques.
- Understand how transactions are processed in a database.
- Discuss/explain the concepts of Distributed Databases and Data Warehousing.
- Discuss/explain some database security issues.

### Suggested Readings:

- Data base Management Systems, Raghu Ramakrishnan, Johannes Gehrke, TMH, 3rd Edition, 2003.
- Data base System Concepts, A. Silber Schatz, H.F. Korth, S. Sudarshan, McGraw hill, VI edition, 2006.
- Fundamentals of Database Systems 5th edition. Ramez Elma Sri, Shamkant B. Navathe, Pearson Education, 2008.
- Introduction to Database Systems, C.J. Date, Pearson Education

Dean Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

CSE-6105 Advanced Operating System							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
3	1	0	4	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

### Course Objectives (COs)

The main objective of this course is to provide conceptual as well as practical knowledge about Operating system (Windows and UNIX).

<b>Unit I</b>	<b>15 Lectures</b>
<b>Introduction:</b> Definition, Functions of an OS, Evolution. Types of advance operating systems, <b>Process Management:</b> Process- Process Concept, Process Scheduling, Operation on Processes, Cooperating Processes, Threads, Inter-Process Communication, <b>CPU Scheduling</b> – various algorithms.	
<b>Unit II</b>	<b>15 Lectures</b>
<b>Process Synchronization, Deadlock Management:</b> detection, prevention and handling. <b>Memory Management:</b> Logical & physical address space, Swapping, Continuous Allocation, fragmentation, paging, segmentation, Page Replacement, Page Replacement Algorithms, counting algorithms Thrashing.	
<b>Unit III</b>	<b>15 Lectures</b>
<b>File System Interface:</b> File Concept, Access Methods, File System Implementation, Free Space Management, <b>Directory Implementation</b> –linear list, hash table, Efficiency and Performance, Recovery – consistency checking, backup and restore. <b>Secondary Storage Structure:</b> Disk Structure, Disk Scheduling Algorithms.	
<b>Unit IV</b>	<b>15 Lectures</b>
<b>Distributed Systems:</b> Introduction, Design issues, Communication in distributed Systems. <b>Synchronization in Distributed Systems:</b> Clocks synchronization, Mutual Exclusion. <b>Memory and Deadlock Management in distributed Systems.</b> <b>Case Study:</b> UNIX system, <b>Case Study:</b> MS-DOS.	

### Course Learning Outcomes (CLOs)

- Understand the different services provided by Operating System at different level.
- Learn the real life applications of Operating System in every field.
- Understand the use of different process scheduling algorithm and synchronization techniques to avoid deadlock. They will learn different memory management techniques like paging, segmentation and demand paging etc.

  
 Dean - Academic  
 H.P. Technical University  
 Hamirpur - 177 001, HP

**Suggested Readings:**

- Silberschatz, Galvin, "Operating System Concepts", Addison Wesley Publishing Company.
- Tanenbaum, A.S., "Modern Operating System", Prentice Hall of India Pvt. Ltd.
- William Stallings, "Operating Systems", Macmillan Publishing Company.
- Deitel H.M., "An Introduction to Operating System", Addison Wesley Publishing Company.

  
Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

UHV-6100 Universal Human Values and Professional Ethics							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
2	0	0	2	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

### Course Objectives (COs)

- To help students distinguish between values and skills, and understand the need, basic guidelines, content and process of value education.
- To enable the students to imbibe, internalize the values and ethical behavior in the personal and Professional lives.

<b>Unit I</b>	<b>8 Lectures</b>
Right understanding, Relationship and physical facility (holistic development and the role of education), Understanding value education, Self-exploration as the process for value education, Continuous happiness, and prosperity-the basic human aspirations exploring human consciousness, Happiness and prosperity-current scenario, Method to fulfill the basic human aspirations, Exploring natural acceptance	
<b>Unit II</b>	<b>8 Lectures</b>
Understanding human being as the co-existence of the Self and the Body, distinguishing between the needs of the Self and the Body, Exploring the difference of needs of Self and Body, The Body as an instrument of the self-understanding, Harmony in the self-program to ensure Self-regulation and Health exploring harmony of Self with the Body.	
<b>Unit III</b>	<b>8 Lectures</b>
Harmony in the family-the basic unit of human interaction, 'Trust'-the foundational value in relationship, Exploring the feeling of trust, 'Respect'-as the right evaluation, Exploring the feeling of respect and other feelings, Justice in human-to-human relationship, understanding harmony in the society, Vision for the universal human order, exploring systems to fulfill human goal.	
<b>Unit IV</b>	<b>6 Lectures</b>
Ethics -definitional aspects, Nature of ethics, Scope of ethics, The philosophical basis of ethics, Family ethics, Ethics at the workplace and professions, Relevance of ethics in society.	

### Course Learning Outcomes (CLOs)

- Students will be able to understand the harmony in nature and existence and work out their mutually fulfilling participation in nature.
- Students will be able to relate ethical concepts and materials to ethical problems in specific professions and professionalism.
- Students will be made available to be aware about the types of ethical challenges.

  
 Dean - Academic  
 H.P. Technical University  
 Hamirpur - 177 001, HP

**Suggested Readings:**

- R R Gaur, R Asthana, G P Bagaria, The Textbook A Foundation Course in Human Values and Professional Ethics, 2nd Revised Edition, Excel Books, New Delhi, 2019.
- R R Gaur, R Asthana, G P Bagaria, The Teacher's Manual Teachers' Manual for A Foundation Course in Human Values and Professional Ethics, 2nd Revised Edition, Excel Books, New Delhi, 2019.
- R. R. Gaur, R. Sangal, G. P. Bhagaria, A Foundation Course in Value Education, Excel Books Publisher.
- Ek Parichaya, A Nagaraj, Amar Kantak, Jeevan Vidya, Jeevan Vidya Prakashan, 1999.
- A.N. Tripathy, 2003, Human Values, A Foundation Course in Human Values and Professional Ethics, New Age International Publishers.
- Mohandas Karamchand Gandhi, The Story of My Experiments with Truth.

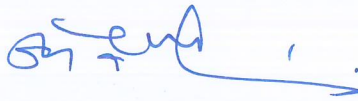

Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

CSE-6106P Advanced DBMS Lab							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
0	0	2	1	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

Sr. No.	List of Experiments
	Exercises based on
1.	Data Definition Language Commands
2.	Data Manipulation Language Commands
3.	Data Control Language, Transfer Control Language Commands
4.	In Built Functions
5.	Nested Queries and Join Queries
6.	Set operators
7.	Views
8.	Control Structure
9.	Procedure and Function
10.	Trigger

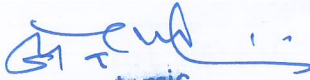

Note: 8-10 experiments are to be performed based on the topics listed above.

  
 Dean - Academic  
 H.P. Technical University  
 Hamirpur - 177 001, HP

CSE-6107P Advanced Operating System Lab							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
0	0	2	1	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

Sr. No.	Name of Experiment
1.	Study and explain the types of operating systems (their types with structure, functionality, dependencies, application software with their differences).
2.	Installation of any one of the operating system (UBUNTU, CENT-OS).
3.	Write a C-program to present the Output of different file operation.
4.	Write a C-program to implement any file allocation technique (Linked, Indexed or Contiguous)
5.	Write a C-program to Present the Output of following CPU Scheduling algorithm.
6.	Write a C-program to Present the Output of following Page Replacement Algorithm.
7.	Write a C-program to implement memory management algorithm for memory management.
8.	Write a C-program to present the Output for Producer– Consumer problem concept.
9.	Simulate Bankers algorithm for Deadlock Avoidance
10.	Write a C-program to implement Disk scheduling algorithms.

Note: 8-10 experiments are to be performed based on the topics listed above.

  
 Dean - Academic  
 H.P. Technical University  
 Hamirpur - 177 001, HP

## **SEMESTER-II**

CSE-6201 AI & ML							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
3	1	0	4	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

### Course Objectives (COs)

- To provide conceptual as well as practical knowledge of Artificial Intelligence and related technologies.
- To develop the AI skills in students.

<b>Unit I</b>	<b>15 Lectures</b>
<b>Approaches to AI:</b> Turing Test and Rational Agent Approaches; State Space Representation of Problems, Heuristic Search Techniques, Game Playing, Min-Max Search, Alpha Beta Cutoff Procedures.	
<b>Unit II</b>	<b>15 Lectures</b>
<b>Knowledge Representation and Reasoning:</b> Representation and Reasoning using predicate logic, Inference in first order logic, forward and backward chaining. Probabilistic reasoning, Bayesian networks, Dempster Shafer theory, Probabilistic Reasoning over time: Hidden Markov Models, Kalman Filters.	
<b>Unit III</b>	<b>15 Lectures</b>
Uninformed search and Informed search based on heuristics, Local search algorithms and optimization problems, <b>Adversarial search:</b> Games, Optimal decisions in games, Alpha-beta pruning, Online search. Learning from examples, Forms of Learning, Inductive Learning, Learning decision trees, learning in problem solving, Learning Probabilistic models, Bayesian learning, Learning in neural and belief networks. Learning with hidden variable.	
<b>Unit IV</b>	<b>15 Lectures</b>
<b>AI Applications:</b> Expert system, decision support systems, speech and vision, natural language processing, semantic web, robotics, AI-based programming Tools.	

### Course Learning Outcomes (CLOs)

- Understand the concepts of Artificial Intelligence and intelligent agents.
- Understand and learn knowledge representation and reasoning for the problem-solving solving.
- Apply basic search techniques for problem-solving.
- Understand and apply learning techniques.
- Apply and utilize AI knowledge for application in the real world.

  
 Dean - Academic  
 H.P. Technical University  
 Hamirpur - 177 001, HP

**Suggested Readings:**

- Artificial Intelligence: A Modern Approach, S Russel and P Norvig, 3rd Edition, 2015 Prentice Hall.
- Introduction to Artificial Intelligence and Expert Systems, Dan W. Patterson, Pearson Education.
- Artificial Intelligence and Expert Systems — Patterson PHI.

  
Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

CSE-6202 Wireless Sensor Network							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
3	1	0	4	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

### Course Objectives (COs)

- To understand the basics of Sensor Networks.
- To learn various fundamental and emerging protocols of all layers.
- To study about the issues pertaining to major obstacles in establishment and efficient management of Ad-hoc and sensor networks.
- To understand the nature and applications of sensor networks.
- To understand various security practices and protocols of Sensor Networks

Unit I	15 Lectures
<p>Introduction and overview of Wireless Sensor Networks (WSN), Commercial and Scientific Applications of WSN, Category of Applications of WSN, Challenges for WSN, Enabling Technologies for WSN.</p> <p><b>Single node Architecture:</b> Hardware Components, Energy Consumption of Sensor nodes, Operating Systems and Execution Environments, Examples of Sensor Nodes, <b>Network Architecture:</b> WSN Scenarios, Optimization Goals and figures of Merits, Design principles for WSNs, Service Interfaces for WSNs, Gateway Concepts.</p>	
Unit II	15 Lectures
<p><b>Physical Layer:</b> Wireless Channel and Communication Fundamentals, Physical Layer &amp; Transceiver Design Considerations in WSN.</p> <p><b>MAC Protocols:</b> Fundamentals, MAC Protocols for WSNs, IEEE802.15.4 MAC Protocol, Routing Protocols: Gossip and agent based unicast protocols, Energy Efficient Unicast, Broadcast and Multicast, Geographic Routing, Transport Control Protocols: Traditional Protocols, Design Issues, Examples of Transport Protocols, Performance of Transport Control Protocols.</p>	
Unit III	15 Lectures
<p><b>Sensor Tasking and Control:</b> Information-Based Sensor Tasking, Joint Routing Information Aggregation, Sensor Network Databases: Challenges, Query Interfaces, In-Network Aggregation, Data Centric Storage, Data Indices and Range queries, Distributed Hierarchical Aggregation, Temporal Data.</p>	
Unit IV	15 Lectures
<p><b>Operating Systems for Sensor Networks:</b> Introduction, Design Issues, Examples of Operating Systems, Node Level Simulators, Performance and Traffic Management Issues: WSN Design Issues, Performance Modelling of WSNs, Emerging Applications and Future Research Directions.</p> <p><b>Mobility and Handoff Management in 5G :</b> Network deployment types, Interference management in 5G, Mobility management in 5G, Dynamic network reconfiguration in 5G.</p>	

### Course Learning Outcomes (CLOs)

- Describe the overview of wireless sensor networks and enabling technologies for wireless sensor networks.
- Apply the design principles of WSN architectures and operating systems for simulating environment situations.
- Apply various concepts for assignment of MAC addresses.
- Select the appropriate infrastructure, topology, joint routing and information aggregation for wireless sensor networks.
- Analyse the sensor network platform and tools state-centric programming

### Suggested Readings:

- Feng Zhao, Leonidas Guibas, "Wireless Sensor Networks; An Information Processing Approach", Elsevier, 2007.
- C. S. Raghavendra, Krishna M. Shivalingam, Taieb Znati, "Wireless sensor networks", Springer Verlag.
- H. Edgar, Jr. Callaway, "Wireless Sensor networks, Architectures and Protocols", CRC Press
- Kazem Sohraby, Daniel Minoli, Taieb Znati, "Wireless Sensor Networks: Technology, Protocols, and Applications", John Wiley & Sons.
- Holger Karl, Andreas Willig, "Protocols and architectures for wireless sensor networks", John Wiley & Sons.

  
Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

CSE-6203 Programming Paradigms							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
3	1	0	4	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

#### Course Objectives (COs)

- Introducing students to functional, logic and concurrent programming paradigms.
- Enabling students to formulate newer abstractions (both procedure and data) in the above paradigms.
- Familiarizing students with writing functional and concurrent programs.
- Preparing students to solve complex real-world problems using appropriate programming paradigms.

<b>Unit I</b>	<b>15 Lectures</b>
<b>Introduction:</b> Object Oriented Programming, History and Basics of Java, JDK, JRE, JVM, Java Data Types, Operator, basic of Java and its fundamentals, conditional & looping, working with arrays and strings, String, String Buffer, and String Builder classes. <b>Introduction of Classes:</b> Fundamental of Classes and Methods, Constructors, Overloading Methods.	
<b>Unit II</b>	<b>15 Lectures</b>
<b>Extending Classes and Inheritance:</b> Fundamental of Inheritance, Type of Inheritance, Interfaces, implementing multiple inheritance using interface, built in package, creating own package. <b>Exception Handling:</b> Exception Handling basics, try, catch and finally, throw and throws clause. <b>Multithreading Programming:</b> implementing multithreading, life cycle of a thread, thread communication, suspending, resuming, deadlock and stopping threads, handling exceptions during multithreading.	
<b>Unit III</b>	<b>15 Lectures</b>
<b>Working with Abstract Windows Toolkit:</b> Creating GUI in Java Using AWT, Working with Frame and Text, GUIComponents, Menus and Layout Managers. <b>Java Swings:</b> Java Foundation Classes, Hierarchy of Java Swing classes, Swing components, JButton class, JRadioButton class, JTextArea class, JComboBox class, JTable class, JColorChooser class, JProgressBar class, JSlider class.	
<b>Unit IV</b>	<b>15 Lectures</b>
<b>Event Handling:</b> Introduction, Event Classes, and Listener Interfaces. <b>Accessing Databases with JDBC:</b> Installing MySQL, Setting up a MySQL User Account, Manipulation Databases with JDBC, RowSet Interface, ResultSet.	

  
 Dean - Academic  
 H.P. Technical University  
 Hamirpur - 177 001, HP

### Course Learning Outcomes (CLOs)

- Understand and apply the concepts that form the basis of functional, logic and concurrent programming paradigms.
- Formulate abstractions with procedures and data in different programming paradigms.
- Write programs in different programming paradigms especially functional, logic and concurrent paradigms.
- Formulate, implement and solve a given problem scenario using appropriate programming paradigm.

### Suggested Readings:

- Cay S. Horstmann and Gary Cornell, "Core Java: Volume I – Fundamentals", Eighth Edition, Sun Microsystems Press, 2008.

IKS-6200 Indian Knowledge System							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
2	0	0	2	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

#### Course Objectives (COs)

- To equip the students with the knowledge and understanding related to Indian knowledge systems, origin, evolution and the approaches used in ancient and modern times.
- To promote the youths to do research in the various fields of Bhāratīya knowledge system

<b>Unit I- Bhāratīya Civilization and Development of Knowledge System</b>	<b>8 Lectures</b>
Genesis of the land, On the trail of the Lost River, Discovery of the Saraswatī River, The Saraswati-Sindhu civilization, Traditional knowledge system, The introduction to Vedas, Main Schools of Philosophy (6+3), Ancient education system, The Takṣaśilā University, The Nālandā University, Alumni, Knowledge export from Bhārata.	
<b>Unit II- Arts, Literature and Scholars</b>	<b>8 Lectures</b>
Art, Music, and Dance, Naṭarāja– A masterpiece of Bhāratīya Art, Literature, Life and works of Agastya, Lopāmudrā, Ghōṣā, Vālmīki, Patañjali, Vedavyāsa, Yājñavalkya, Gārgī, Maitreyī, Bodhāyana, Caraka, Suśruta, Jīvaka, Kaṇāda, Patañjali, Kauṭīlya, Pāṇini, Thiruvalluvar, Āryabhaṭa, Varāhamihira, Bhāskarācārya, Mādhavācārya	
<b>Unit III- Engineering, Science and Management</b>	<b>8 Lectures</b>
Engineering, science and technology in the Vedic Age, Post-Vedic period and Saraswatī-Sindhu civilization, Concept of matter, life and universe, Bhāratīya Kāla-gaṇanā, Concepts of Zero, Pi and number system, Vedic Mathematics, Āyurveda, Astronomy in India, Agriculture in India, Water Management in India, Trades in Ancient India, Seals, Coins and Marine Technology.	
<b>Unit IV-Cultural Heritage and Indian Traditional Practices</b>	<b>6 Lectures</b>
Temple architecture in ancient India, Sculptures, Theatre, Drama and Martial arts traditions, Fairs and festivals, Yoga, Integrated approach to healthcare, Approaches and strategies to the protection and conservation of environment.	

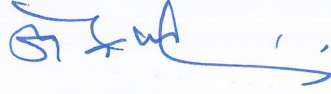

#### Course Learning Outcomes (CLOs)

- The students will be able to understand and appreciate the rich heritage that resides in our traditions.
- The students will be able to improve mindfulness and more maturity leading to an effective process of learning.
- The students will be able to create awareness amongst the youths about the true history and rich culture of the country.

## **SEMESTER-III**

CSE-7301 Research Methodology							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
3	1	0	4	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

### Course Objectives (COs)

- To introduce the basic concepts in research methodology.
- To address the issues inherent in selecting a research problem and discuss the techniques and tools to be employed in completing a research project.
- To enable the students to prepare report writing and framing Research proposals.

<b>Unit I</b>	<b>15 Lectures</b>
<b>Research:</b> Introduction, Meaning, Definition, Characteristics and Purpose of research. Research Types, Research Methods.	
<b>Unit II</b>	<b>15 Lectures</b>
<b>Research Process:</b> Introduction, Research design, Formulation of Research Problem. Review of Literature, Variables: Introduction and types. Formulation of Hypothesis, Sampling and its techniques, Data collection Tools, Data Analysis and Interpretation of Data. Research Proposal and Research Report.	
<b>Unit III</b>	<b>15 Lectures</b>
<b>Nature of Intellectual Property:</b> Introduction. Patent: Concept, Process of Patenting, Patent filling, document preparation, Patent infringement, Patent Databases. Procedure for grants of patents. Patent Rights: Scope of Patent Rights, Types of Patents.	
<b>Unit IV</b>	<b>15 Lectures</b>
<b>Designs:</b> introduction, novelty in designs, procedure for registration of design, <b>Trademarks:</b> Definition and concept, Kinds of marks, Registration procedure, <b>Copyright:</b> nature, ownership and rights. <b>Geographical Indications:</b> Meaning and Conditions, New Developments in IPR, Agencies for IPR Case study.	

### Course Learning Outcomes (CLOs)

- Ability to understand and comprehend the basics in research methodology and applying them in research/ project work.
- This course will help them to select an appropriate research design.
- With the help of this course, students will be able to take up and implement a research project/ study.
- The course will also enable them to collect the data, edit it properly and analyse it accordingly. Thus, it will facilitate students' prosperity in higher education.

  
 Dean - Academic

## **Discipline Specific Electives -I**

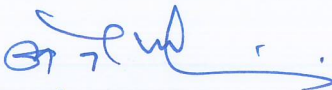

CSE-6211(i) Probability and Statistics with Queuing Theory							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
3	1	0	4	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

### Course Objectives (COs)

The objective of this course is to provide the required mathematical support in real life problems and develop probabilistic models which can be used in several areas of science and engineering.

Unit I	15 Lectures
<b>Probability &amp; mathematical expectations:</b> Introduction to Probability: Definition of Random Experiment – Events and sample space –Definition of probability, Addition and multiplication theorems, Conditional probability, Baye's theorem, Simple problems on Baye's theorem. <b>Introduction to Random variable:</b> Discrete and continuous random variables – Distribution function of random variable, Properties, Probability mass function, Probability density function, Mathematical expectation, Properties of mathematical expectation, Moments, moment generating function, Mean and variance.	
Unit II	15 Lectures
<b>Probability distributions:</b> Discrete distributions: Binomial distribution – Mean and standard deviations of Binomial distribution – Poisson distribution – Mean and standard deviations of Poisson distribution – Applications. Continuous probability distributions: Uniform distribution – Exponential distribution – Normal distribution – Properties of Normal distribution – Importance of Normal distribution –Area properties of Normal curve.	
Unit III	15 Lectures
<b>Curve fitting, correlation and regression:</b> Curve Fitting: Principle of least squares, Method of least squares, Fitting of straight lines, Fitting of second-degree curves and exponential curves. <b>Correlation:</b> Definition – Karl Pearson's coefficient of correlation – Measures of correlation – Rank correlation coefficients. <b>Regression:</b> Simple linear regression – Regression lines and properties.	
Unit IV	15 Lectures
<b>Testing of hypothesis Formulation of Null Hypothesis</b> – Critical region – Level of significance. Small Samples: Students t - distribution (Significance test of a sample mean, Significance test of difference between sample means) –F- distribution – $\chi^2$ - test – Goodness of fit. Large samples: Test of Significance of large samples – Single proportion – Difference between two proportions – Single mean and difference of means. Queuing theory: Queue description – Characteristics of a queuing model – Study state solutions of M/M/1: $\alpha$ Model and M/M/1; N Model.	

  
 Dean - Academic  
 H.P. Technical University  
 Hamirpur - 177 001, HP

### Course Learning Outcomes (CLOs)

- Demonstrate basic principles of probability and understand a random variable that describes randomness or an uncertainty in certain realistic situation. It can be of either discrete or continuous type.
- Comprehend concepts of discrete, continuous probability distributions and able to solve problems of probability using Binomial, Poisson, Uniform Distribution, Exponential Distribution, Normal distributions.
- Compute simple correlation between the variables and fit straight line, parabola by the principle of least squares.
- Analyze the statistical data and apply various small or large sample tests for testing the hypothesis.
- Understand about different Queuing models and its applications.

### Suggested Readings:

- T. Veerarajan, "Probability, Statistics and Random Processes", Tata McGraw Hill Publications.
- Kishor S. Trivedi, "Probability & Statistics with Reliability, Queuing and Computer Applications", Prentice Hall of India.
- Dr. B.S Grewal, "Higher Engineering Mathematics", Khanna Publishers.
- Sheldon M. Ross, "Probability and Statistics for Engineers and Scientists", Academic Press.
- S C Gupta and V. K. Kapoor, "Fundamentals of Mathematical Statistics".

  
Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

CSE-6211(ii) Data Mining							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
3	1	0	4	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

### Course Objectives (COs)

- Gain an understanding of what data mining is all about.
- Be able to perform the data preparation tasks and understand the implications. • Demonstrate an understanding of the alternative knowledge representations such as rules, decision trees, decision tables, and Bayesian networks.
- Be able to evaluate what has been learned through the application of the appropriate statistics.
- Be able to discuss alternative data mining implementations and what might be most appropriate for a given data mining task.

<b>Unit I</b>	<b>15 Lectures</b>
<b>Data Mining Concepts:</b> - Introduction to modern data analysis (Data visualization; probability; histograms; multinomial distributions), Data Mining and Knowledge Discovery in Data Bases, Data Mining Functionalities, Data Pre-processing, Data Cleaning, Data Integration, Data Reduction, Data Transformation Discretization.	
<b>Unit II</b>	<b>15 Lectures</b>
<b>Mining Frequent Patterns, Association, and Correlation:</b> Basic Concepts and Methods: Basic Concepts, Mining Methods, Pattern Evaluation. <b>Classification:</b> Basic Concept, Decision Tree Induction, Bayes Classification Methods, Rule Based Classification, Model Evaluation and Selection, Techniques to Improve Classification Accuracy.	
<b>Unit III</b>	<b>15 Lectures</b>
<b>Classification:</b> Advanced Methods. <b>Cluster Analysis:</b> Basic Concepts and Methods, Cluster Analysis, Partitioning Methods, Hierarchical methods.	
<b>Unit IV</b>	<b>15 Lectures</b>
<b>Outlier Detection:</b> Outliers And Outlier Analysis, Outlier Detection Methods. <b>Data Mining Trends:</b> Mining Complex data, Other Methods of data Mining, Data Mining Applications, Data Mining and Security, Data Mining Trends.	

### Course Learning Outcomes (CLOs)

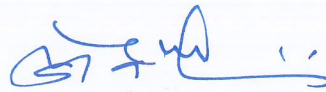

- Develop an understanding of the data mining process and issues.
- Understand various techniques for data mining.
- Apply the techniques in solving data mining problems using data mining tools and systems.
- Expose various real-world data mining applications.

  
 Dean - Academic  
 H.P. Technical University  
 Hamirpur - 177 001, HP

**Suggested Readings:**

- Jiawei han, Micheline Kamber, Jian Pei, “ Data Mining: Concepts and techniques”, 3<sup>rd</sup> Edition, Morgan Kaufmann imprint of Elsevier.
- Alex Berson, Stephen J. Smith, "Data Warehousing, Data Mining, & OLAP", Tata Mcgraw Hill, 2004.
- Jiawei Han. Data Mining: Concepts and Techniques. Morgan Kaufmann Publishers
- Anahory and Murray ., Data warehousing in the real world , Pearson Education / Addison Wesley.
- Berry Micheal and Gordon Linooff, Mastering Data Mining. John Wiley & Sons Inc.

Dean - Academic

Hamirpur - 177 001, HP

CSE-6211(iii) Cloud Computing							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
3	1	0	4	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

### Course Objectives (COs)

The main objective of this course is to provide conceptual as well as practical knowledge of basic of Cloud Computing, Various Cloud Computing terminologies and Platforms. After completing the course the student should be competent in cloud computing concepts and platforms.

<b>Unit I</b>	<b>15 Lectures</b>
<b>Introduction to Cloud Computing:</b> Overview, NIST features, Historical Development, Need for Cloud Computing, Principles of Cloud Computing, Roots of Cloud Computing, Challenges and Risk of Cloud Computing. <b>Cloud Model:</b> Cloud Reference Model, Service and Deployment Models, Cloud applications.	
<b>Unit II</b>	<b>15 Lectures</b>
<b>Virtualization Technology:</b> Virtualization Structures and Mechanisms, Hypervisor, Full virtualization, Para-virtualization, Hardware Assisted Virtualization, Types of Virtualizations, Creating A Virtual Machine. <b>Cloud Enable Technologies:</b> Service Oriented Architecture, Web Technologies, Web Services Specifications, SOAP, REST, XML, JSON, AJAX, MASHUPS: User Interface Services, Multi-Tenancy, Mobile Computing, Sky Computing, Load Balancing.	
<b>Unit III</b>	<b>15 Lectures</b>
<b>Big Data:</b> Overview, Need of Big data, Characteristics, Benefits of Big Data Processing, Big Data Technologies, <b>HADOOP:</b> Hadoop Architecture, Hadoop Ecosystem, HDFS Architecture , MapReduce , <b>Cloud Database NoSQL :</b> Relational, Non-Relational vs. DBaaS Cloud Database, Cloud Database Architectures, Cloud Databases, Amazon Dynamo Database, HBase, Cassandra, Google Big Table, Hive, MongoDB. <b>Cloud File System:</b> Google File System (GFS) Vs Hadoop Distributed File System (HDFS)	
<b>Unit IV</b>	<b>15 Lectures</b>
<b>Cloud Security:</b> Cloud Information Security Fundamentals, Cloud Security Services, Cloud Security Concerns, Security Challenges, Infrastructure Security, Cloud computing security architecture. <b>Open Source Clouds Platform:</b> Case Study on Open Source Clouds Platform, Hadoop, OpenStack, Cloud Stack, Eucalyptus, Open Nebula. <b>Case Study on Commercial Clouds:</b> Google App Engine, Microsoft Azure, Amazon, Aneka	

  
 Dean - Academic  
 H.P. Technical University  
 Hamirpur - 177 001, HP

### Course Learning Outcomes (CLOs)

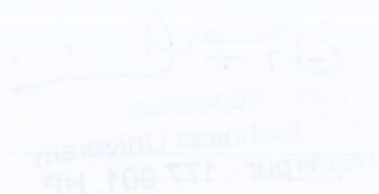

- Explain the core concepts of the cloud computing paradigm: how and why this paradigm shift came about, the characteristics, advantages and challenges brought about by the various models and services in cloud computing.
- Analyze various cloud programming models and apply them to solve problems on the cloud.

### Suggested Readings:

- GautamShroff, "Cloud Computing", Cambridge Enterprise.
- Ronald Krutz and Russell "Cloud Security Dean Vines", Wiley-India.
- Tim Malhar, S.Kumara swammy , "Cloud Security and Privacy" S. Latif (SPD,O'REILLY)
- Antohy T Velte, "Cloud Computing: A Practical Approach", et.al McGraw Hill,
- Barrie Sosinsky, "Cloud Computing Bible" by Wiley India

Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

  
H.P. Technical University  
Hamirpur - 177 001, HP

CSE-6211(iv) Natural Language Processing							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
3	1	0	4	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

### Course Objectives (COs)

The students should be able to study language and the tools that are available to efficiently study and analyze large collections of text. They should learn about and discuss the effects of electronic communication on our language.

<b>Unit I</b>	<b>15 Lectures</b>
<b>Introduction:</b> A computational framework for natural language, description of English or an Indian language in the framework, lexicon, algorithms and data structures for implementation of the framework, Finite state automata, the different analysis levels used for NLP (morphological, syntactic, semantic, pragmatic, Recursive and augmented transition networks. Applications like machine translations.	
<b>Unit II</b>	<b>15 Lectures</b>
<b>Word level and syntactic analysis Word Level Analysis:</b> Regular Expressions, Finite-State Automata, Morphological Parsing, Spelling Error Detection and correction, Words and Word classes, Part-of Speech Tagging. -- <b>Syntactic Analysis:</b> Context Machine free Grammar, Constituency, Parsing readable dictionaries and lexical databases, RTN, ATN.	
<b>Unit III</b>	<b>15 Lectures</b>
<b>Semantic Analysis:</b> Semantic analysis Probabilistic Parsing, Meaning Representation, Lexical Semantics, Ambiguity, Word Sense Disambiguation. Discourse Processing: cohesion, Reference Resolution, Discourse Coherence and Structure. Knowledge Representation, reasoning.	
<b>Unit IV</b>	<b>15 Lectures</b>
<b>Natural Language Generation (NLG):</b> Architecture of NLG Systems, Generation Tasks and Representations, Application of NLG. <b>Machine Translation:</b> Problems in Machine Translation, Characteristics of Indian Languages, Machine Translation Approaches, Translation involving Indian Languages.	

### Course Learning Outcomes (CLOs)

After successful completion of the course, the learners would be able to

- Develop speech-based applications that use speech analysis (phonetics, speech recognition, and synthesis).
- Analyse the syntax, semantics, and pragmatics of a statement written in a natural language.

  
 Dean - Academic  
 H.P. Technical University

- Develop a conversational agent that uses natural language understanding and generation.

**Suggested Readings:**

- Natural Language understanding by James Allen, Pearson Education, 2002.
- NLP: A Paninian Perspective by Akshar Bharati, Vineet Chaitanya, and Rajeev Sangal, Prentice Hall, 2016.
- Meaning and Grammar by G. Chirchia and S. McConnell Ginet, MIT Press, 1990.
- An Introduction to Natural Language Processing, Computational Linguistics, and Speech Recognition by Daniel Jurafsky and James H. Martin, Pearson Education, 2006.
- Natural language processing in Prolog by Gazdar, & Mellish, Addison-Wesley.
- <https://www.coursera.org/specializations/natural-language-processing>

Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

## Discipline Specific Electives -II

CSE-6212(i) Distributed DBMS							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
3	1	0	4	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

### Course Objectives (COs)

- To provide conceptual as well as practical knowledge of Database, various methodologies and applications software used for data base management.
- To become competent in data base handling, able to design and manage database for real life problems and
- the student should be proficient in query handling.

Unit I	15 Lectures
<b>Distributed Data Processing:</b> Introduction, Fundamentals of Distributed Data Base Management System (Transparent management of distributed & replicated data, Reliability, Improved performance, System expansion), Disadvantages of Distributed Data Base Management System (Complexity, Cost, Distribution of control, Security, Distributed database design, Query processing, Directory Mgmt, concurrency control, Deadlock Mgmt, Reliability, OS support, Heterogeneous databases, Relationship). <b>Relational Data Base Management System:</b> Basic Concepts, Data Modeling for a Database, Records and Files, Abstraction and Data Integration, The Three-Level Architecture Proposal for DBMS, Data Models, Data Associations, Data Models Classification, Entity Relationship Model, Relational Data Model. Normalization: Dependency structures, Normal forms.	
Unit II	15 Lectures
<b>Distributed Data Base Management System Architecture:</b> Architectural models for distributed DBMS (Autonomy, Distribution, Heterogeneity, Architectural alternatives), Client/server systems, Peer-to-peer Distributed Systems. <b>Distributed Database Design:</b> Design Strategies, Design issues (reasons for fragmentation, alternatives, Degree & Correctness rules of fragmentation), Allocation alternatives, Information requirement. Fragmentation: Horizontal, Vertical, Hybrid Fragmentation. Allocation: Problem, Information requirement, Allocation model, Solution methods.	
Unit III	15 Lectures
<b>Query Processing:</b> Problem, objectives, Complexity of Relational Algebra operations, Characterization of query processing (Language, Types of Optimization, Optimization timing, Statistics, Decision sites, Exploitation of network topology & Replicated fragments, Use of semijoins), Layers of Query processing (Query decomposition, Data localization, Global & Local query optimizations). <b>Distributed Concurrency Control:</b> Serializability theory, Taxonomy of concurrency control mechanism, Locking based concurrency control algorithm (centralized 2pl, primary copy 2pl, distributed 2pl), Timestamp based concurrency control algorithm (conservative &	

Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

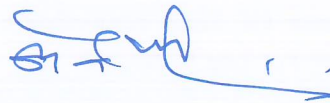

multiversion TO algorithm), Optimistic concurrency control algorithm, Deadlock management, prevention, avoidance, detection & resolution.	
Unit IV	15 Lectures
<b>Distributed DBMS Reliability:</b> Reliability concepts & measures (system, state & failures, reliability & availability, mean time between failures/repair), Failures & fault tolerance in distributed system (reason for failures, fault tolerance approaches & techniques), Failures in Distributed DBMS (transaction, system, media & communication failure), Local reliability protocols (architectural considerations, recovery, information execution of LRM commands, checkpointing, handling media failure), Distributed Reliability Protocols (Components, Two-Phase commit protocol, Variation of 2PC).	

#### Course Learning Outcomes (CLOs):

- The candidate will get knowledge of: - Query optimization. - Parallel and distributed database systems. New database architectures and query operators.
- Ability to develop new methods in databases based on knowledge of existing techniques.
- Ability to apply acquired knowledge for developing holistic solutions based on database systems/database techniques.

#### Suggested Readings:

- M. Tamer Ozsu & Patrick Valduriez, "Principles of Distributed Database Systems", Pearson Education Asia.
- Desai, B., "An Introduction to Database Concepts." Galgotia Publications, New Delhi.
- Date C.J., "An Introduction to Database Systems", Narosa Publishing House, New Delhi.
- Elimsari and Navathe, "Fundamentals of Database Systems", Addison Wesley, New York.

Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

CSE-6212(ii) Formal Languages and Automata Theory							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
3	1	0	4	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

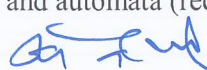

#### Course Objectives (COs)

- Introduce concepts in automata theory and theory of computation.
- Identify different formal language classes and their relationships.
- Design grammars and recognizers for different formal languages
- Prove or disprove theorems in automata theory using its properties.

<b>Unit I</b>	<b>15 Lectures</b>
<b>Finite Automata and Regular Expression:</b> Finite State System, Basic Definition, Deterministic and Non- Deterministic Finite Automata (Only Definition), Finite Automata with Output, Regular Expression. <b>Turing Machines:</b> Definition Of Various Version Of Turing Machines, Deterministic, Non- Deterministic, Two-Way, Infinite Tape, Multi Tape, Multi Head, Statements Of Their Equivalence (Without Proof), Construction Of Turing Machines (Any Model) For Log N; N!, N <sup>2</sup> .	
<b>Unit II</b>	<b>15 Lectures</b>
<b>Context Free Grammars:</b> Context Free Grammars, Derivation Trees, Simplification of Context-Free Grammars, Chomsky Normal Form, Greibach Normal Form. Properties Of Context -Free Languages: The Pumping Lemma For CFL'S Closure Properties Of CFL'S , Decision Algorithms For CFL'S.	
<b>Unit III</b>	<b>15 Lectures</b>
<b>Introduction To Compiling:</b> Compilers, Analysis of Source Program, The Phases of A Compiler, One Pass Compiler, Overview, Syntax Definition, Syntax-Directed Translation, Parsing, Lexical Analysis, Role of The Lexical Analyzer. Syntax Analysis, The Role of Parser, Context Free Grammars, Writing A Grammar, Top-Down Parsing (Recursive-Descent Parsing, Predictive Parsing, Transition Diagram For Predictive Parsing.	
<b>Unit IV</b>	<b>15 Lectures</b>
Non Recursive Predictive Parsing, First And Follow, LL(1) Grammars, Error Recovery In Predictive, Parsing . Bottom-Up Parsing: Handles, Handle Pruning, Stack Implementation In Shift Reduce Parsing, Conflicts In Shift Reducing Parsing, LR-Parsers, LR Algorithm, LR Grammars, Constructing SLR Parsing Tables, Using Ambiguous Grammars, Error Recovery In LR Parsing.	

#### Course Learning Outcomes (CLOs):

- Acquire a fundamental understanding of the core concepts in automata theory and formal languages.
- An ability to design grammars and automata (recognizers) for different language classes.

  
 Dean - Academic  
 H.P. Technical University  
 Hamirpur - 177 001, HP

- An ability to identify formal language classes and prove language membership properties.
- An ability to prove and disprove theorems establishing key properties of formal languages and automata.
- Acquire a fundamental understanding of core concepts relating to the theory of computation and computational models including (but not limited to) decidability and intractability.

**Suggested Readings:**

- Johan E. Hopcroft, Jeffery D. Ullman, "Introduction To Automata Theory Languages Computation", Narosa Publishing House.
- Alfred V. Aho, Ravi Sethi, Jeffery D. Ullman, "Compilers Principles, Techniques and Tools", Addison-Wesley Publishing Company.
- William A. Barrett, Bates, John D. Couch, "Compiler Construction Theory and Practical.

CSE-6212(iii) Soft Computing							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
3	1	0	4	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

### Course Objectives (COs)

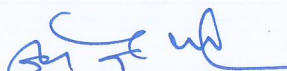

- To introduce soft computing concepts and techniques and foster their abilities in designing appropriate technique for a given scenario.
- To implement soft computing based solutions for real-world problems.
- To give students knowledge of non-traditional technologies and fundamentals of artificial neural networks, fuzzy sets, fuzzy logic, genetic algorithms.

<b>Unit I</b>	<b>15 Lectures</b>
<b>Introduction:</b> Introduction to Soft Computing and Neural Networks: Evolution of Computing: Soft Computing Constituents, From Conventional AI to Computational Intelligence: Machine Learning Basics.	
<b>Unit II</b>	<b>15 Lectures</b>
<b>Fuzzy Logic:</b> Fuzzy Sets, Operations on Fuzzy Sets, Fuzzy Relations, Membership Functions: Fuzzy Rules and Fuzzy Reasoning, Fuzzy Inference Systems, Fuzzy Expert Systems, Fuzzy Decision Making.	
<b>Unit III</b>	<b>15 Lectures</b>
<b>Neural Networks:</b> Machine Learning Using Neural Network, Adaptive Networks, Feed forward Networks, Supervised Learning Neural Networks, Radial Basis Function Networks: Reinforcement Learning, Unsupervised Learning Neural Networks, Adaptive Resonance architectures, Advances in Neural networks	
<b>Unit IV</b>	<b>15 Lectures</b>
<b>Genetic Algorithms:</b> Introduction to Genetic Algorithms (GA), Applications of GA in Machine Learning: Machine Learning Approach to Knowledge Acquisition. Recent Trends in deep learning, neural networks and genetic algorithm	

### Course Learning Outcomes (CLOs)

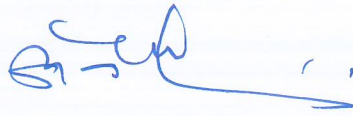

After successful completion of the course, the learners would be able to

- Identify and describe soft computing techniques and their roles in building intelligent machines.
- Apply fuzzy logic and reasoning to handle uncertainty and solve various engineering problems.
- Apply genetic algorithms to combinatorial optimization problems.
- Evaluate and compare solutions by various soft computing approaches for a given problem.

  
 Dean - Academic  
 H.P. Technical University  
 Hamirpur - 177 001, HP

**Suggested Readings:**

- Jyh:Shing Roger Jang, Chuen:Tsay Sun, Eiji Mizutani, Neuro:Fuzzy and Soft Computing, Prentice:Hall of India, 2003.
- George J. Klir and Bo Yuan, Fuzzy Sets and Fuzzy Logic:Theory and Applications, Prentice Hall, 1995.

Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

CSE-6212(iv) Data Analytics							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
3	1	0	4	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

### Course Objectives (COs)

Discuss various concepts of data analytics pipeline. Discuss and apply various data analytics methods. Discuss and apply text and sentiment analysis. Apply R tool for Data Analytics problem solving. Understand NoSQL and Data Visualisation methods and implementation in tool.

<b>Unit I</b>	<b>15 Lectures</b>
<b>Introduction:</b> Data, Types of Data, Big Data, Big data Characteristics, Business Intelligence, Levels of measurement, Introduction to Statistical Learning, Mean, Median, Mode, Standard deviation. Life cycle of Data centric projects.	
<b>Unit II</b>	<b>15 Lectures</b>
<b>Basic Analysis Techniques:</b> Chi-Square, t-Test, Correlation Analysis, Analysis of Variance. Advanced Analytics Techniques: Regression, Clustering, Classification, Association Mining.	
<b>Unit III</b>	<b>15 Lectures</b>
<b>Text Analytics &amp; Web Mining:</b> Process of Text Analytics, Topic Modelling, Sentiment Analysis, Web Mining. Time Series Analysis: Overview of Time Series Analysis, Forecasting Models, ARMA and ARIMA Models	
<b>Unit IV</b>	<b>15 Lectures</b>
<b>R language:</b> Introduction to R., Basic Syntax, Implementation basic and advanced Data analytic methods, Data visualization using R, Text Analysis Process in R. No SQL: Introduction to No SQL, Principles of No SQL Data Models, CAP, No SQL Data Model.	

### Course Learning Outcomes (CLOs)

After successful completion of the course, the learners would be able to

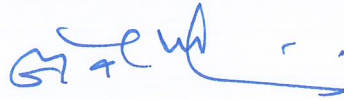

- Understand Big Data and its analytics in the real world
- Design of Algorithms to solve Data Intensive Problems using Map Reduce Paradigm
- Design and Implementation of Big Data Analytics using pig and spark to solve data intensive problems and to generate analytics

### Suggested Readings:

- Michael Berthold, David J. Hand, Intelligent Data Analysis, Springer
- An and Rajaraman and Jeffrey David Ullman, Mining of Massive Datasets, Cambridge University Press.
- Michael Minelli, Michelle Chambers, and Ambiga Dhiraj, "Big Data, Big Analytics: Emerging Business Intelligence and
- Analytic Trends for Today's Businesses", Wiley

  
Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

- David Dietrich, Barry Heller, Beibei Yang, "Data Science and Big Data Analytics", EMC Education Series, John Wiley
- Mark Gardner, "Beginning R: The Statistical Programming Language", Wrox Publication
- Glenn J. Myatt, Making Sense of Data, John Wiley & Sons
- Jiawei Han, Micheline Kamber "Data Mining Concepts and Techniques", Second Edition, Elsevier
- Scientific Articles published in International Journals and Conferences related to Data Analytics

Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

## **Inter Departmental Electives**

CSE ID-6001(i) Mobile Computing							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
2	0	0	2	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

### Course Objectives (COs)

Students taking this course will develop an understanding of the ways that mobile technologies can be used for teaching and learning. They will also consider the impact of mobile computing on the field of education.

<b>Unit I</b>	<b>8 Lectures</b>
Detailed Introduction of Mobile Computing: History, Types, Benefits, Application, Evolution, Security Concern regarding Mobile Computing, Different Propagation Modes, Wireless Architecture and its types, needs of mobile user	
<b>Unit II</b>	<b>8 Lectures</b>
The cellular concept: Cellular system, Hexagonal geometry cell and concept of frequency reuse, Channel Assignment Strategies Distance to frequency reuse ratio	
<b>Unit III</b>	<b>8 Lectures</b>
Wireless Application Protocol: Introduction of WAP, WAP applications, WAP Architecture, WAP Protocol Stack, Challenges in WAP	
<b>Unit IV</b>	<b>6 Lectures</b>
Introduction to 4G: Introduction, features and challenges, Applications of 4G, 4G network architecture	

### Course Learning Outcomes (CLOs)

After completion of this course, student will be able

- To understand concepts of Mobile Communication.
- To analyse next generation Mobile Communication System.
- To understand network and transport layers of Mobile Communication.
- Analyze various protocols of all layers for mobile wireless communication networks.

### Suggested Readings:

- Mobile Computing Technology, Applications and service creation, Asoke K Telukder, Roopa R Yavagal by TMH.
- Mobile Computing, Raj Kamal by Oxford
- Wireless Communications & Networks, Second Edition, William Stallings by Pearson
- Mobile Computing Theory and Practice-Kumkum Garg-Pearson
- TCP/IP Protocol Suite by Behrouz A Forouzan, Third Edition, TMH

  
 Dean - Academic  
 H.P. Technical University  
 H.P. Technical University

CSE ID-6001(ii) Data Storage Technologies and Networks							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
2	0	0	2	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

### Course Objectives (COs)

To provide learners with a basic understanding of Enterprise Data Storage and Management Technologies.

<b>Unit I</b>	<b>8 Lectures</b>
<b>Storage Media and Technologies</b> – Magnetic, Optical and Semiconductor Media, Techniques for read/write Operations, Issues and Limitations.	
<b>Unit II</b>	<b>8 Lectures</b>
<b>Usage and Access</b> – Positioning in the Memory Hierarchy, Hardware and Software Design for Access, Performance issues.	
<b>Unit III</b>	<b>6 Lectures</b>
<b>Storage Architecture</b> - Storage Partitioning, Storage System Design, Caching, Legacy Systems.	
<b>Unit IV</b>	<b>8 Lectures</b>
<b>Storage Area Networks</b> – Hardware and Software Components, Storage Clusters/Grids. <b>Storage QoS</b> –Performance, Reliability, and Security issues.	

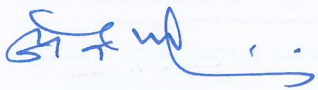

### Course Learning Outcomes (CLOs)

After completion of course, students would be:

- Learn Storage System Architecture
- Overview of Virtualization Technologies, Storage Area Network

### Suggested Readings:

- The Complete Guide to Data Storage Technologies for Network-centric Computing Paperback– Import, Mar 1998 by Computer Technology Research Corporation
- Data Storage Networking: Real World Skills for the CompTIA Storage by Nigel Poulton

  
Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

CSE ID-6001(iii) OBJECT ORIENTED TECHNIQUES							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
2	0	0	2	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

### Course Objectives (COs)

- To introduce various designing techniques and methods for object oriented
- Performance analysis with real time system
- Demonstrate a familiarity with object oriented data and system.
- To give clear idea on implementing design with UML diagram like state diagram ,activity diagram , use case diagram etc.

<b>Unit I</b>	<b>8 Lectures</b>
<b>Introduction:</b> Introduction to Programming, Characteristics of programming and stages in program development, Algorithms, Notations, Flowchart, and Types of programming methodologies.	
<b>Unit II</b>	<b>8 Lectures</b>
<b>C++ Basics :</b> Overview, Program structure, namespace, identifiers, variables, constants, enum, operators, typecasting, control structures	
<b>C++ Functions :</b> Simple functions, Call and Return by reference, Inline functions, Macro Vs. Inline functions, Overloading of functions, default arguments, friend functions, virtual functions	
<b>Unit III</b>	<b>6 Lectures</b>
<b>Objects and Classes :</b> Basics of object and class in C++, Private and public members, static data and function members, constructors and their types, destructors, operator overloading, type conversion.	
<b>Unit IV</b>	<b>8 Lectures</b>
<b>Inheritance :</b> Concept of Inheritance, types of inheritance: single, multiple, multilevel, hierarchical, hybrid, protected members, overriding, virtual base class.	
<b>Polymorphism :</b> this pointer, virtual and pure virtual functions, Implementing polymorphism	

### Course Learning Outcomes (CLOs)

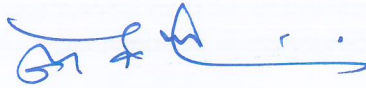

- Develop modular solutions to a given problem statement.
- Design and implement software employing the principles of encapsulation, information hiding, abstraction, and polymorphism.
- Design, implement, and use classes and methods in an object-oriented programming language.

  
 Dean - Academic  
 H.P. Technical University  
 Hamirpur - 177 001, HP

**Suggested Readings:**

- James Rumbaugh et. al, "Object Oriented Modeling and Design", PHI
- Grady Booch, James Rumbaugh, Ivar Jacobson, "The Unified Modeling Language User Guide", Pearson Education
- Object Oriented Programming With C++, E Balagurusamy, TMH
- R. S. Salaria, Mastering Object Oriented Programming with C++, Khanna Publishing House

Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

CSE ID-6001(iv) Steganography and Digital Watermarking							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
2	0	0	2	Maximum Marks: 40 Minimum Marks: 16	Maximum Marks: 60 Minimum Marks: 24	100 40	3 Hours

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

### Course Objectives (COs)

The objective of course is to provide a insight to steganography techniques. Watermarking techniques along with attacks on data hiding and integrity of data is included in this course.

<b>Unit I</b>	<b>8 Lectures</b>
<b>Steganography:</b> Overview, History, Methods for hiding (text, images, audio, video, speech etc.), Issues: Security, Capacity and Imperceptibility, <b>Steganalysis:</b> Active and Malicious Attackers, Active and passive steganalysis	
<b>Unit II</b>	<b>8 Lectures</b>
Frameworks for secret communication (pure Steganography, secret key, public key steganography), Steganography algorithms (adaptive and non-adaptive),	
<b>Unit III</b>	<b>8 Lectures</b>
Steganography techniques: Substitution systems, Spatial Domain, Transform domain techniques, Spread spectrum, Statistical steganography, Cover Generation and cover selection, Tools: EzStego, FFEncode, Hide 4 PGP, Hide and Seek, S Tools etc.)	
<b>Unit IV</b>	<b>6 Lectures</b>
Detection, Distortion, Techniques: LSB Embedding, LSB Steganalysis using primary sets, Texture based	

### Course Learning Outcomes (CLOs)

- Learn the concept of information hiding.
- Survey of current techniques of steganography and learn how to detect and extract hidden information.
- Learn watermarking techniques and through examples understand the concept.

### Suggested Readings:

- Peter Wayner, "Disappearing Cryptography–Information Hiding: Steganography & Watermarking", Morgan Kaufmann Publishers, New York, 2002.
- Ingemar J. Cox, Matthew L. Miller, Jeffrey A. Bloom, Jessica Fridrich, TonKalker, "Digital Watermarking and Steganography", Margan Kaufmann Publishers, New York, 2008.
- Information Hiding: Steganography and Watermarking-Attacks and Countermeasures by Neil F. Johnson, ZoranDuric, SushilJajodia
- Information Hiding Techniques for Steganography and Digital Watermarking by Stefan Katzenbeisser, Fabien A. P. Petitcolas

CSE-7311(i) Cryptography & Network Security							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
3	1	0	4	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

### Course Objectives (COs)

- To understand basics of Cryptography and Network Security.
- To be able to secure a message over insecure channel by various means.
- To learn about how to maintain the Confidentiality, Integrity and Availability of data.
- To understand various protocols for network security to protect against the threats in the networks.

<b>Unit I</b>	<b>15 Lectures</b>
<b>Security Concepts:</b> Introduction, The need for security, Security approaches, Principles of security, Types of Security attacks, Security services, Security Mechanisms, A model for Network Security.	
<b>Unit II</b>	<b>15 Lectures</b>
<b>Cryptography Concepts and Techniques:</b> Introduction, plain text and cipher text, substitution techniques, transposition techniques, encryption and decryption, symmetric and asymmetric key cryptography, steganography, key range and key size, possible types of attacks.	
<b>Unit III</b>	<b>15 Lectures</b>
<b>Symmetric key Ciphers:</b> Block Cipher principles, DES, AES, Blowfish, RC4, RC5, IDEA. <b>Asymmetric key Ciphers:</b> Principles of public key cryptosystems, RSA algorithm, Elgamal Cryptography, Diffie-Hellman Key Exchange.	
<b>Unit IV</b>	<b>15 Lectures</b>
<b>Cryptographic Hash Functions:</b> Message Authentication, Secure Hash Algorithm (SHA). <b>E-Mail Security:</b> Pretty Good Privacy, S/MIME IP Security: IP Security overview, IP Security architecture.	

### Course Learning Outcomes (CLOs)

After successful completion of the course, the learners would be able to

- Provide security of the data over the network.
- Do research in the emerging areas of cryptography and network security.
- Implement various networking protocols.
- Protect any network from the threats in the world.

### Suggested Readings:

- William Stallings, "Cryptography and Network security Principles and Practices", Pearson/PHI.

  
 Dean - Academic  
 H.P. Technical University  
 Hamirpur - 177 001, HP

- Wade Trappe, Lawrence C Washington, "Introduction to Cryptography with coding theory", Pearson.
- W. Mao, "Modern Cryptography – Theory and Practice", Pearson Education.
- Charles P. Pfleeger, Shari Lawrence Pfleeger – Security in computing – Prentice Hall of India

Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

CSE-7311(ii) Cyber Security							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
3	1	0	4	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

### Course Objectives (COs)

- To give students an extensive overview of cyber security issues, tools and techniques that are critical in solving problems in cyber security domains.
- To provide students with concepts of computer security, cryptography, digital money, secure protocols, detection and other security techniques.

<b>Unit I</b>	<b>15 Lectures</b>
<b>Cyber Security Concepts:</b> Essential Terminologies: CIA, Risks, Breaches, Threats, Attacks, Exploits. Information Gathering (Social Engineering, Foot Printing & Scanning). Open Source/ Free/ Trial Tools: nmap, zenmap, Port Scanners, Network scanners.	
<b>Unit II</b>	<b>15 Lectures</b>
<b>Cryptography:</b> Symmetric key Cryptography, Asymmetric key Cryptography, Message Authentication, Digital Signatures, Applications of Cryptography. Overview of Firewalls- Types Of Firewalls, User Management, VPN Security, Security Protocols: - security at the Application Layer- pGp and S/MIME, Security at Transport Layer- SSL and TLS, Security at Network Layer- IPSec.	
<b>Unit III</b>	<b>15 Lectures</b>
<b>System Security:</b> Server Security, OS Security, Physical Security, Introduction to Networks, Network packet Sniffing, Network Design Simulation. DOS/ DDOS attacks. Asset Management and Audits, Vulnerabilities and Attacks. Intrusion detection and Prevention Techniques, Host based Intrusion prevention Systems, Security Information Management, Network Session Analysis, System Integrity Validation.	
<b>Unit IV</b>	<b>15 Lectures</b>
<b>Internet Security:</b> Cloud Computing and Security, Social Network sites security, Cyber Security Vulnerabilities-overview, vulnerabilities in software, System administration, Complex Network Architectures, Weak Authentication, Authorization, Unprotected Broadband communications, Poor Cyber Security Awareness. Cyber Security Safeguards- Overview, Access control, IT Audit, Authentication. Open Web Application Security Project (OWASP), Web Site Audit and Vulnerabilities assessment.	

### Course Learning Outcomes (CLOs)

- Analyze and evaluate the cyber security needs of an organization.
- Determine and analyze software vulnerabilities and security solutions to reduce the risk of exploitation.

Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

- Implement cyber security solutions and use of cyber security, information assurance, and cyber/computer forensics software/tools.

**Suggested Readings:**

- William Stallings, "Cryptography and Network Security", Pearson Education/PHI, 2006.
- V.K. Jain, "Cryptography and Network Security", Khanna Publishing House.
- 3. Gupta Sarika, "Information and Cyber Security", Khanna Publishing House, Delhi Reference Books:
- Nina Godbole, "Information System Security", Wiley

Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

CSE-7311(iii) Cyber Forensics							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
3	1	0	4	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

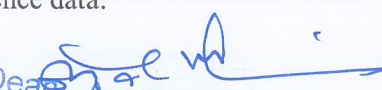

#### Course Objectives (COs)

- To identify, gather, and preserve the proof of a law-breaking.
- To track and prosecute the perpetrators in an exceedingly court of law.
- To interpret, document and gift the proof to be permissible throughout prosecution.
- To estimate the potential impact of a malicious activity on the victim and assess the intent of the offender.

<b>Unit I</b>	<b>15 Lectures</b>
<b>Cyber Crime and computer crime :</b> Introduction to Digital Forensics, Definition and types of cybercrimes, electronic evidence and handling, electronic media, collection, searching and storage of electronic media, introduction to internet crimes, hacking and cracking, credit card and ATM frauds, web technology, cryptography, emerging digital crimes and modules.	
<b>Unit II</b>	<b>15 Lectures</b>
<b>Cyber Forensic and Computer Crimes – I :</b> Introduction , Conventional Crime , Cyber Crime, Reasons for Cyber Crime, Classification of Conventional and Cyber Crime, Distinction between Conventional and Cyber Crime, Cyber Criminal Mode and Manner of Committing Cyber Crime, Computer Crime Prevention Measures, Crimes targeting Computers, Unauthorized Access, Packet Sniffing, Malicious Codes including Trojans, Viruses, Logic Bombs, etc.	
<b>Unit III</b>	<b>15 Lectures</b>
<b>Provisions in Indian Laws – I :</b> Provisions in Indian Laws , Penalties Under IT Act , Offences Under IT Act ,Establishment of Authorities under IT Act and their functions, powers, Controller, Certifying Authorities ,Cyber Regulation Appellate Tribunal ,Adjudicating officer	
<b>Unit IV</b>	<b>15 Lectures</b>
<b>Forensic Tools and Processing of Electronic Evidence :</b> Introduction to Forensic Tools, Usage of Slack space, tools for Disk Imaging, Data Recovery, Vulnerability Assessment Tools, Encase and FTK tools, Anti Forensics and probable counters, retrieving information, process of computer forensics and digital investigations, processing of digital evidence, digital images, damaged SIM and data recovery, multimedia evidence, retrieving deleted data: desktops, laptops and mobiles, retrieving data from slack space, renamed file, ghosting, compressed files.	

#### Course Learning Outcomes (CLOs)

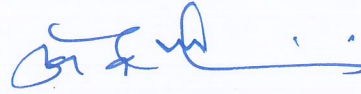

- Understand the basic terminology of cybercrimes .
- Apply a number of different computer forensic tools to a given scenario Implement various networking protocols.
- Analyze and validate digital evidence data.

  
 Dean - Academic  
 H.P. Technical University  
 Hamirpur - 177 001, HP

- Analyze acquisition methods for digital evidence related to system security.

**Suggested Readings:**

- Dejay, Murugan, Cyber Forensics Oxford university press India Edition, 2018.
- CEH official Certified Ethical Hacking Review Guide, Wiley India Edition, 2015.

Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

CSE-7311(iv) Data Security and Access Control							
Teaching Scheme			Credit	Marks Distribution			Duration of End Semester Examination
L	T	P		Internal Assessment	End Semester Examination	Total	
3	1	0	4	Maximum Marks: 40	Maximum Marks: 60	100	3 Hours
				Minimum Marks: 16	Minimum Marks: 24	40	

**Note:** In each theory paper, nine questions are to be set. Two questions are to be set from each Unit and candidate is required to attempt at least one question from each unit. Question number nine will be compulsory, which will be of short answer type questions with 6 to 8 parts, covering entire syllabus. In all, five questions are to be attempted.

### Course Objectives (COs)

- To provide fundamentals of database security.
- To provide various access control techniques mechanisms were introduced along with application areas of access control techniques.

Unit I	15 Lectures
Introduction to Access Control, Purpose and fundamentals of access control, brief history, Policies of Access Control, Models of Access Control, and Mechanisms, Discretionary Access Control (DAC), Non- Discretionary Access Control, Mandatory Access Control (MAC). Capabilities and Limitations of Access Control Mechanisms: Access Control List (ACL) and Limitations, Capability List and Limitations.	
Unit II	15 Lectures
Role-Based Access Control (RBAC) and Limitations, Core RBAC, Hierarchical RBAC, Statically Constrained RBAC, Dynamically Constrained RBAC, Limitations of RBAC. Comparing RBAC to DAC and MAC Access control policy.	
Unit III	16 lectures
Recent trends in Database security and access control mechanisms. Case study of Role-Based Access Control (RBAC) systems.	
Unit IV	15 Lectures
Smart Card based Information Security, Smart card operating system fundamentals, design and implantation principles, memory organization, smart card files, file management, atomic operation, smart card data transmission ATR, PPS Security techniques- user identification, smart card security, quality assurance and testing, smart card life cycle-5 phases, smart card terminals.	

### Course Learning Outcomes (CLOs)

- The students will be enabled to understand and implement classical models and algorithms
- Learn how to analyse the data, identify the problems, and choose the relevant models and algorithms to apply.
- Able to assess the strengths and weaknesses of various access control models and to analyse their behaviour.

### Suggested Readings:

- Role Based Access Control: David F. Ferraiolo, D. Richard Kuhn, Ramaswamy Chandramouli.
- <http://www.smartcard.co.uk/tutorials/sct-itsc.pdf> : Smart Card Tutorial.

## 1. Introduction (1000-1500 words) [Times new roman, size 16, bold]

- The introduction section should introduce to background of the research area
- The key issue is to state:
  - The overall research problem, which is discussed during the entire thesis process
  - Specific research questions:
    - Between 1-3 separate questions connected to research problem area
    - Should be formulated in a very clear language in a form of a question
  - Research question has a strong connection to method part. Generally, there are two types of questions, which define very much the applied research methodology:
    - Descriptive – How things are?
    - Normative – How things should be?
- In the introduction part, the applicant may briefly describe what the previous stages of the research are.
- If there is sub section then it may be arranged as 1.1, 1.2, 1.3, etc.

## 2. Literature Review [Times new roman, size 16, bold]

- This section is a literature review with a lot of references. The author lists recent literature dealing with the area and shows that he or she is already familiar with the problem domain.
- Literature must be given in continual manner and chronological order. *Group sentences that express and develop one aspect of your topic and may use a new paragraph for another aspect/ topic. (no need to give literature in tabular form here, however if author want, he/she can summarise all the literature review in one page tabular form)*
- **Tools and technologies** –from literature review, the author should describe how and what tools/technologies have been used in the related research (existing tools/technologies used by other peer groups).

## 3. Justification for Research [Times new roman, size 16, bold]

### 3.1 Motivation [Times new roman, size 14]

This is a short section justifying the research problem area. Basically, the author states on this part why the research is important and **what challenges are there in the area of research.**

### 3.2 Research Gaps [Times new roman, size 14, bold]

- The researcher identifies several **research gaps** based on the literature survey and the problem statement identified, which should be the basis for setting up objectives.
- This part may include references to journals, conferences and newspaper articles pinpointing the importance of the research area. Also estimations of economic and or technical value of solving the problem may be stated.

## 4. Problem Statement [Times new roman, size 16, bold]

Give a brief problem statement here.

### 4.1 Objectives (Mention 3-5 objectives) [Times new roman, size 14, bold]

Based on the research gaps in present study, the researcher needs to identify the clear and concise statement in the form of objectives of what the research will investigate.

Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

#### **4.2 Methodology** (Mention how you propose to meet these objectives) [Times new roman, size 14, bold]

Methodology part should describe in detail how the study will be conducted. For example, what type of methods may be used.

- The methods need to be described in detail that shows the connection to research question and where you are going to get the actual data. A good method describes the data collection in such detail, that somebody else could conduct this part as well based on instructions.
- If possible, methodology can also be given in **flow chart**.

#### **5. Expected Outcomes** [Times new roman, size 16, bold]

- State briefly (5-10 lines) what the expected outcomes of the research are and what will be the significance of potential results.

(1) Contributions for the research community

(2) Potential new technical implications etc.

#### **References (from separate page)** [Times new roman, size 16, bold]

List key references here for your study, all these must have been cited properly and appropriately in to the text of the research proposal. Make sure these references are up-to-date. The style of all the references (authors, dates, titles, edition, place, publisher, fonts & margins etc) must be same for all the references. There are several possible ways to organize this section. You can use either of the referencing systems, alphabetical (Harvard) or numerical (Vancouver).

- **Standard Harvard style** - The reference list at the end of your proposal using this system should be in alphabetical order.
- Examples from journal in Harvard reference style for single author and two authors:

Kozulin, A., 1993, 'Literature as a psychological tool', *Educational Psychologist* 28 (3), 253-265.

Lamb, R. & Kling, R., 2003, 'Reconceptualizing users as social actors in information systems research', *MIS Quarterly* 27 (2), 197.

- **Numerical system** - You should number your references sequentially through the text. The numbers should be given in square brackets and one number can be used to refer to several instances of the same reference. The reference list at the end of the research proposal should be numerical order.

*The style (authors, titles, edition, place, publisher, fonts & margins etc) of all references must be uniform all over and be cited properly (may be given first author's family name followed by et al) in to the text. If there are more references for one aspects, references should be written in single bracket as [5, 7, 8, 10-14, 17-22, .....etc].*

## Annexure-II

### Guidelines for preparation of Theses/Dissertations/Reports

#### **Preamble**

While it is essential to pay attention to the content of the thesis/dissertation/report (hereinafter called the 'thesis'), which is being submitted in partial fulfillment of the requirements of the respective degree, it is also imperative that a standard format be prescribed. The same format shall be followed in preparation of the final copies of the thesis to be submitted to the Department/Library in future.

#### **1. Organization of the Thesis/Dissertation/report**

This thesis shall be presented in a number of chapters, starting with Introduction and ending with Summary and Conclusions. Each of the other chapters will have a precise title reflecting the contents of the chapter. A chapter can be subdivided into *sections, subsections and sub subsection* so as to present the content discretely and with due emphasis.

##### **1.1 Introduction**

The title of **Chapter 1** shall be Introduction. It shall justify and highlight the problem posed, define the topic and explain the aim and scope of the work presented in the thesis. It may also highlight the significant contributions from the investigation.

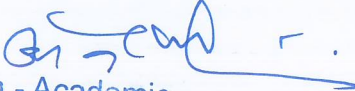

##### **1.2 Review of Literature**

This shall normally form Chapter 2 and shall present a critical appraisal of the previous work published in the literature pertaining to the topic of the investigation. The extent and emphasis of the chapter shall depend on the nature of the investigation.

##### **1.3 Report on the present investigation**

The reporting on the investigation shall be presented in one or more chapters with appropriate chapter titles.

Due importance shall be given to experimental setups, procedures adopted, techniques developed, methodologies developed and adopted. While important derivations/formulae should normally be presented in the text of these chapters, extensive and long treatments, copious details and tedious information, detailed results in tabular and graphical forms may

  
Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

be presented in Appendices. Representative data in table and figures may, however, be included in appropriate chapters.

Figures and tables should be presented immediately following their first mention in the text. Short tables and figures (say, less than half the writing area of the page) should be presented within the text, while large table and figures may be presented on separate pages.

Equations should form separate lines with appropriate paragraph separation above and below the equation line, with equation numbers flushed to the right.

## **1.4 Results and Discussions**

This shall form the penultimate chapter of the thesis and shall include a thorough evaluation of the investigation carried out and bring out the contributions from the study. The discussion shall logically lead to inferences and conclusions as well as scope for possible further future work.

## **1.5 Summary and Conclusions**

This will be the final chapter of the thesis. A brief report of the work carried out shall form the first part of the Chapter. Conclusions derived from the logical analysis presented in the Results and Discussions Chapter shall be presented and clearly enumerated, each point stated separately. Scope for future work should be stated lucidly in the last part of the chapter.

## **2. THESIS FORMAT**

### **2.1 Paper**

#### **2.1.1 Quality**

The thesis shall be printed/Xeroxed on white bond paper, whiteness 95% or above, weight 70 gram or more per square meter.

#### **2.1.2 Size**

The size of the paper shall be standard A 4; height 297 mm, width 210 mm.

#### **2.1.3 Type Setting, Text Processing and Printing**

The text shall be printed employing laser jet or Inkjet printer, the text having been processed using a standard text processor. The standard font shall be Times New Roman of 12 pts with 1.5 line spacing.

#### **2.1.4 Page Format**

The Printed Sheets shall have the following written area and margins:

Top Margin                      15 mm

  
Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

Head Height	3 mm
Head Separation	12 mm
Bottom Margin	22 mm
Footer	3 mm
Foot Separation	10 mm
Text Height	245 mm
Text Width	160 mm

When header is not used the top margin shall be 30 mm.

### **Left and Right Margins**

The candidates shall have the options of single or double sided printing

Single sided/odd number page (in double sided printing)

Left Margin 30mm

Right Margin 20 mm

### **2.1.5 Pagination**

Page numbering in the text of the thesis shall be Hindu Arabic numerals at the center of the footer. But when the candidate opts for header style the page number shall appear at the right and left top corner for the odd and even number pages, respectively.

Pagination for pages before the Introduction chapter shall be in lower case Roman numerals, e.g., “iv”.

### **2.1.6 Header**

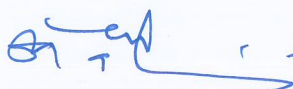

When the header style is chosen, the header can have the Chapter number .

### **2.1.7 Paragraph format**

Vertical space between paragraphs shall be about 2.5 line spacing.

The first line of each paragraph should normally be indented by five characters or 12mm. A candidate may, however, choose not to indent if (s) he has provided sufficient paragraph separation.

A paragraph should normally comprise more than one line. A single line of a paragraph shall not be left at the top or bottom of a page (that is, no windows or orphans should be left)

Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

The word at the right end of the first line of a page or paragraph should, as far as possible, not be hyphenated.

## **2.2 Chapter Format**

### **2.2.1 Chapter**

Each chapter shall begin on a fresh page (odd number page in case of double sided printing) with an additional top margin of about 75mm. Chapter number (in Hindu-Arabic) and title shall be printed at the center of the line in 6mm font size (18pt) in bold face using both upper and lower case (all capitals or small capitals shall not be used). A vertical gap of about 25mm shall be left between the Chapter number and Chapter title lines and between chapter title line and the first paragraph.

### **2.2.3 Table / Figure Format**

As far as possible, tables and figures should be presented in portrait style. Small size table and figures (less than half of writing area of a page) should be incorporated within the text, while larger ones may be presented on separate pages. Table and figures shall be numbered chapter wise. For example, the fourth figure in chapter 5 will bear the number Figure 5.4 or Fig 5.4.

Table number and title will be placed above the table while the figure number and caption will be located below the figure. Reference for Table and Figures reproduced from elsewhere shall be cited in the last and separate line in the table and figure caption, e.g. (after McGregor [12]).

## **3. Auxiliary Format**

### **3.1 Binding**

The evaluation copies of the thesis/dissertation/report may be spiral bound or soft bound. The final hard bound copies to be submitted after the viva-voce examination will be accepted during the submission of thesis/dissertation/report with the following colour specification:

M.Tech. Dissertation	Black
----------------------	-------

### **3.2 Front Covers**

The front covers shall contain the following details:

Full title of thesis in 6 mm 22 point's size font properly centered and positioned at the top.

Full name of the candidate in 4.5 mm 15 point's size font properly centered at the middle of the page.

A 40 mm dia replica of the Institute emblem followed by the name of department, name of the Institute and the year of submission, each in a separate line and properly centered and located at the bottom of page.

  
Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

### **3.2.1 Lettering**

All lettering shall be embossed in gold.

### **3.2.2 Bound back**

The degree, the name of the candidate and the year of submission shall also be embossed on the bound (side) in gold.

### **3.3 Blank Sheets**

In addition to the white sheets (binding requirement) two white sheets shall be put at the beginning and the end of the thesis.

### **3.4 Title Sheet**

This shall be the first printed page of the thesis and shall contain the submission statement: the Thesis/Dissertation/project Report submitted in partial fulfillment of the requirements of the Degree, Ph.D. /M.Tech. /B.Tech., the name and Roll No. of the candidate, name(s) of the Guide and Co-guide (s) (if any), Department, Institute and year of submission.

Sample copy of the 'Title Sheet' is appended (**Specimen 'A'**)

### **3.5 Dedication Sheet**

If the candidate so desires(s) he may dedicate his/her thesis, which statement shall follow the title page. If included, this shall form the page 1 of the auxiliary sheets but shall not have a page number.

### **3.6 Certificate**

In the absence of a dedication sheet this will form the first page and in that case shall not have a page number. Otherwise, this will bear the number two in Roman lower case 'ii' at the center of the footer. The top line shall be:

### **CERTIFICATE**

A sample copy of the Approval Sheet is appended (**Specimen 'B'**)

### **3.8 Abstract**

The 500 word abstract shall highlight the important features of the thesis/dissertation/report and shall correspond to the electronic version to be submitted to

Dean - Academic  
H.P. Technical University  
Hamirpur - 177 001, HP

the Library for inclusion in the website. The Abstract in the thesis, however, shall have two more parts, namely, the layout of the thesis giving a brief chapter wise description of the work and the key words.

### **3.9 Contents**

The contents shall follow the Abstract and shall enlist the titles of the chapters, section and subsection using decimal notation, as in the text, with corresponding page number against them, flushed to the right.

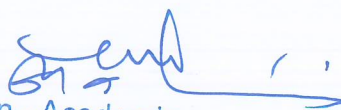

#### **3.9.1 List of Figures and Tables**

Two separate lists of Figure captions and Table titles along with their numbers and corresponding page numbers against them shall follow the Contents.

### **3.10 Abbreviation Notation and Nomenclature**

A complete and comprehensive list of all abbreviations, notations and nomenclature including Greek alphabets with subscripts and superscripts shall be provided after the list of tables and figures.(As far as possible, generally accepted symbols and notation should be used).

Auxiliary page from dedication (if any) to abbreviations shall be numbered using Roman numerals in lower case, while the text starting from the Introduction shall be in Hindu-Arabic. (The first pages in the both the cases shall not bear a page number.

### Declaration

I declare that this written submission represents my ideas in my own words and where others' ideas or words have been included, I have adequately cited and referenced the original sources. I also declare that I have adhered to all principles of academic honesty and integrity and have not misrepresented or fabricated or falsified any idea/data/fact/source in my submission. I understand that any violation of the above will be cause for disciplinary action by the Institute and can also evoke penal action from the sources which have thus not been properly cited or from whom proper permission has not been taken when needed.
